

11 Issue

50th Conference on Glass Problems, Volume 11, Issue 1/2

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.

Government Publications

Undercurrent is the only student-run national undergraduate journal publishing scholarly essays and articles that explore the subject of international development. The journal is a refereed publication dedicated to providing a non-partisan, supportive, yet critical and competitive forum exclusively for undergraduate research, writing, and editing.

Undercurrent Journal: Vol. 11, Issue 2 (Summer 2015) [COLOR]

United for Truth: The ACFEI story recounts the founding and the growth of the American College of Forensic Examiners Institute, the world's leading forensic science association. It includes fascinating forensic science case stories as well as profiles of leading forensic science professionals.

United for Truth

Written in non-technical, everyday language, and requiring no background in economic analysis, this text offers an understanding of the practice of economics. The authors address 14 economic issues, covering both micro- and macro-economics, and offer analyses and proposed solutions for each from Conservative, Liberal, and Radical perspectives.

Economic Issues Today

The #1 CPA exam review self-study leader The CPA exam review self-study program more CPA candidates turn to take the test and pass it, Wiley CPA Exam Review 39th Edition contains more than 4,200 multiple-choice questions and includes complete information on the Task Based Simulations. Published annually, this comprehensive two-volume paperback set provides all the information candidates need to master in order to pass the new Uniform CPA Examination format. Features multiple-choice questions, new AICPA Task Based Simulations, and written communication questions, all based on the new CBT-e format Covers all requirements and divides the exam into 47 self-contained modules for flexible study Offers nearly three times as many examples as other CPA exam study guides With timely and up-to-the-minute coverage, Wiley CPA Exam Review 39th Edition covers all requirements for the CPA Exam, giving the candidate maximum flexibility in planning their course of study—and success.

Minerals Yearbook

Accomplishing sustainability in the agribusiness sector is a significant, yet time-sensitive, challenge, especially when balanced with the need to grow sufficient quantity and quality of food to keep the growing global population healthy. Through both quantitative and qualitative methods, this book explores the extent to which the agribusiness sector is already evolving to become sustainable and the ways in which innovation in the industry can help address sustainable development goals, particularly around zero hunger, gender equality, decent work, responsible consumption and production, and climate action. The contributors to this volume address the following key questions: What are the drivers and barriers for the agribusiness sector to become sustainable? Which business models best facilitate the implementation of sustainable goals? How can we measure the extent to which the agribusiness sector is becoming more sustainable? How can the agribusiness sector leverage recent technological advancements to achieve its sustainability goals? The analysis of the sustainability challenges for the sector ranges across various facets of the industry including employment, pre-production industries, agriculture, food processing, distribution, and trade. This book will be of significant interest to readers in agribusiness, innovation management, and sustainability.

Wiley CPA Examination Review, Problems and Solutions

What ethical challenges are faced by researchers studying social and political movements? Should scholars integrate their personal politics and identities into their research? What role should activists have in shaping the purposes or processes of social scientific research? How do changing political contexts affect the ethical integrity of a research project over time? These are some of the live issues of research ethics that face students and scholars whose research ‘subjects’ are located in contentious political terrain. The contributors to this volume expose their own ethical thinking as they have met such challenges head on. Each explores real dilemmas of ethical practice on the ground as they carry out research on social movements across the globe. Authors examining pro-democracy activists in Malaysia, sanctions-breakers in the Gaza Freedom Flotilla, environmental health organisations in North America and much else find that the narrow confines of Research Ethics Committees and Institutional Review Boards offer little guidance on the questions that really matter. They offer instead a demonstration of continual reflexivity that is both personal and political in its approach. This book opens up debate on research ethics, delineating key challenges and offering hopeful and practical ways forward for real-world, ethical social science. This book was published as a special issue of Social Movement Studies.

Sustainability in Agribusiness

Indian Ocean studies, which once lagged behind studies of the Atlantic and the Pacific, is an important emerging academic field which has come into its own. In the next fifty years, the Indian Ocean Region will become very significant as a result of enormous demographic changes. What was the Ocean of the South is rapidly becoming the Ocean of the Centre, the Ocean of the Future. Curtin University, Western Australia, has a long and distinguished history of engagement with the Indian Ocean region and with Indian Ocean Studies, and its Australia-Asia-Pacific Institute of Curtin University continues to maintain a focus on the Indian Ocean -past, present and future. This book examines a number of themes emerging from its 2014 Conference entitled \"Indian Ocean Futures\"

Research Ethics and Social Movements

'Advances in Optics: Reviews' Book Series is a comprehensive study of the field of optics, which provides readers with the most up-to-date coverage of optics, photonics and lasers with a good balance of practical and theoretical aspects. Directed towards both physicists and engineers this Book Series is also suitable for audiences focusing on applications of optics. The Vol.3 is devoted to various topics of applied optics and contains 17 chapters written by 49 experts in the field from 14 countries: Australia, China, India, Israel, Italy, Japan, Malaysia, Mexico, The Netherlands, Poland, Taiwan, UK, USA, Vietnam A clear comprehensive presentation makes these books work well as both a teaching resources and a reference books. The book is intended for researchers and scientists in physics and optics, in academia and industry, as well as postgraduate students.

Indian Ocean Futures

Highlights the Progression of Meshing Technologies and Their Applications Finite Element Mesh Generation provides a concise and comprehensive guide to the application of finite element mesh generation over 2D domains, curved surfaces, and 3D space. Organised according to the geometry and dimension of the problem domains, it develops from the basic meshing algorithms to the most advanced schemes to deal with problems with specific requirements such as boundary conformity, adaptive and anisotropic elements, shape qualities, and mesh optimization. It sets out the fundamentals of popular techniques, including: Delaunay triangulation Advancing-front (ADF) approach Quadtree/Octree techniques Refinement and optimization-based strategies From the geometrical and the topological aspects and their associated operations and inter-relationships, each approach is vividly described and illustrated with examples. Beyond the algorithms, the book also explores the practice of using metric tensor and surface curvatures for generating anisotropic meshes on parametric space. It presents results from research including 3D anisotropic meshing, mesh generation over unbounded domains, meshing by means of intersection, re-meshing by Delaunay-ADF approach, mesh refinement and optimization, generation of hexahedral meshes, and large scale and parallel meshing, along with innovative unpublished meshing methods. The author provides illustrations of major meshing algorithms, pseudo codes, and programming codes in C++ or FORTRAN. Geared toward research centers, universities, and engineering companies, Finite Element Mesh Generation describes mesh generation methods and fundamental techniques, and also serves as a valuable reference for laymen and experts alike.

Advances in Optics, Vol. 3

Dynamic fuzzy problem are problems that are universally focused by academics. Mathematicians and cybernetic experts have used fuzzy logic to developed theories and solve static problems in so called subjective and objective worlds. This book includes 12 chapters. Chapter 1 is about basic conceptions of Dynamic Fuzzy Sets (DFS). Chapter 2 introduces Dynamic Fuzzy (DF) decomposition theorem. Chapter 3 is about L form of DFS module structure. Chapter 4 is about representation theorem of DFS. Chapter 5 introduces extension theorem of DFS. Chapter 6 is about DF measure theory. In chapter 7 it is Dynamic Fuzzy Logic (DFL). Chapter 8 is about reasoning methods of DFL. Chapter 9 is about bases of DFL

programming language. Chapter 10 introduces multi-agent learning model based on DFL. Chapter 11 is about autonomic computing model based on DFL. The last Chapter introduces application of DFL in machine learning.

Finite Element Mesh Generation

For years, Vine's Expository Dictionary has been the standard word study tool for pastors and laypeople, selling millions of copies. But sixty-plus years of scholarship have shed extensive new light on the use of biblical Greek and Hebrew, creating the need for a new, more accurate, more thorough dictionary of Bible words. William Mounce, whose Greek grammar has been used by more than 100,000 college and seminary students, is the editor of this new dictionary, which will become the layperson's gold standard for biblical word studies. Mounce's is ideal for the reader with limited or no knowledge of Greek or Hebrew who wants greater insight into the meanings of biblical words to enhance Bible study. It is also the perfect reference for busy pastors needing to quickly get at the heart of a word's meaning without wading through more technical studies. What makes Mounce's superior to Vine's? The most accurate, in-depth definitions based on the best of modern evangelical scholarship Both Greek and Hebrew words are found under each English entry (Vine's separates them) Employs both Strong's and G/K numbering systems (Vine's only uses Strong's) Mounce's accuracy is endorsed by leading scholars

Federal Communications Commission Reports

Globalisation, the wired planet, the global village, these are a few of the terms associated with the social and political changes that are said to describe the world at the beginning of the new millennium. One of the most important institutions of the social ordering has been that of policing, but very little has been written on how the practices of social control are affected by the processes of transnationalisation. This book brings together contributions by experts on policing that focus on some of the newly emergent policing issues connected with these changes: *the global private security industry *cross national networking between police *the establishment of an international criminal court *money laundering *policing cyberspace *the drug war Issues in Transnational Policing crosses the boundaries between criminology, international relations and international law to provide a thought-provoking picture of the complex issues surrounding the politics of policing in the future.

National Forests in Alabama, Summary Final Environmental Impact Statement and Proposed Revised Land and Resource Plan, January 2004

Theorising Noumenal Power is a critical engagement with Rainer Forst's theory of what he calls \"noumenal power.\" Forst is the most significant younger generation critical theorist of the Frankfurt School, and his critics include several of the most influential contemporary political power theorists. The concept of noumenal power locates the sources of social and political power in the space of reasons or justifications – using a normatively neutral account of \"justification.\" To exercise power, on that account, means to be able to determine, use, close or open up the space of justifications for others. Going back to Kant, the social subject is theorized as a reasoning being who confers legitimacy upon political structures based upon the cognitive faculty of justification. As argued by Max Weber, authority is the foundation of political institutions and authority presupposes a belief in legitimacy. On the one hand such beliefs can be distorted, as in ideology, or they can be based upon a process of reasoned justification relative to normatively desirable principles. Critiquing the former, while building upon the latter, serves as the foundation for theorising just democratic politic institutions. For Forst's critics, a key theme is how to differentiate ideological (bad) justification, typically based upon emotion, from normatively right democratic reasoning. Other important themes are the analysis of structural domination or the use of threats or other means of exercising power. The debate in this volume constitutes an exciting new way of re-thinking the foundations of ideology, political power, democracy and justice. Providing a state-of-the-art discussion concerning the relationship between political power and justification Theorising Noumenal Power is essential for students and scholars interested

in the theoretical foundations of political power, democracy and justice. The chapters were originally published in the Journal of Political Power.

Dynamic Fuzzy Logic and Its Applications

Based on the commonly held assumption that we now live in a world that is 'on the move', with growing opportunities for both real and virtual travel and the blurring of boundaries between previously defined places, societies and cultures, the theme of this book is firmly grounded in the interdisciplinary field of 'Mobilities'. 'Mobilities' deals with the movement of people, objects, capital, information, ideas and cultures on varying scales, and across a variety of borders, from the local to the national to the global. It includes all forms of travel from forced migration for economic or political reasons, to leisure travel and tourism, to virtual travel via the myriad of electronic channels now available to much of the world's population. Underpinning the choice of theme is a desire to consider the important role of languages and intercultural communication in travel and border crossings; an area which has tended to remain in the background of Mobilities research. The chapters included in this volume represent unique interdisciplinary understandings of the dual concepts of mobile language and border crossings, from crossings in 'virtual life' and 'real life', to crossings in literature and translation, and finally to crossings in the 'semioscape' of tourist guides and tourism signs. This book was originally published as a special issue of Language and Intercultural Communication.

Practicals in Cost Accounts

This volume continues documenting the well-known excavations at Morgantina, a Greek town in central Sicily, in a presentation of the largest body of coins ever unearthed at an Italian site and published as a group. The excavations, conducted by Princeton University, The University of Illinois, and The University of Virginia between 1955 and 1981, produced nearly 10,000 identifiable coins--most of them at of Sicilian Greek and Roman issues, struck before the end of the first century B.C. The numismatic evidence not only made possible the initial identification fo the side as Morgantina, but has subsequently opened the way to reconstructing the history of early Roman Republican coinage and the bronze coinage of Greek Sicily. The catalogue presents a full list of the coins found at Morgantina through the 1981 season, with discussion of significant issues and illustrations of 679 specimens. A completed corpus and study of the coins struck at Morgantina is also included. Theodore V. Buttrey is Professor Emeritus of Classical Studies at the University of Michigan. Kenan T. Erim is Professor of Classical Archaeology at New York University. Thomas. D. Groves is a graduate student in the Department of Classical Archaeology at Princeton University. R. Ross Holloway is Professor of Classical Archaeology at Brown University. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Mounce's Complete Expository Dictionary of Old and New Testament Words

This book represents a bold statement concerning the excitement and energy of the field of sports ethics and philosophy in contemporary terms. It is comprised of a collection of commissioned essays from the leading international scholars in the field to celebrate the ten year editorship of Mike McNamee for the journal: Sport, Ethics and Philosophy. The collection includes essays familiar sport philosophers on work about the nature and nuances of sports and games playing, winning and losing, role models and strategic fouling. It also celebrates in phenomenological terms the complex and heterogeneous experience and values of sports in both phenomenological and analytic modes. Finally, it addresses the most serious threats to sport integrity and governance, in the shape of doping, and the unchecked power of sports institutions, and the charisma of sport that is at the mercy of commercialism. This book was originally published as a special issue of Sport,

Issues in Transnational Policing

'A fascinating and challenging story' New York Review of Books 'This is an incredibly absorbing and insightful book about the most important scientific question of our age' Mark Miodownik, author of *Stuff Matters* 'The story of the quest to understand life's genesis is a universal one, in which everyone can find pleasure and fascination. By asking how life came to be, we are implicitly asking why we are here, whether life exists on other planets, and what it means to be alive. This book is the story of a group of fragile, flawed humans who chose to wrestle with these questions. By exploring the origin of life, we can catch a glimpse of the infinite.' How did life begin? Why are we here? These are some of the most profound questions we can ask. For almost a century, a small band of eccentric scientists has struggled to answer these questions and explain one of the greatest mysteries of all: how and why life began on Earth. There are many different proposals, and each idea has attracted passionate believers who promote it with an almost religious fervour, as well as detractors who reject it with equal passion. But the quest to unravel life's genesis is not just a story of big ideas. It is also a compelling human story, rich in personalities, conflicts, and surprising twists and turns. Along the way the journey takes in some of the greatest discoveries in modern biology, from evolution and cells to DNA and life's family tree. It is also a search whose end may finally be in sight. In *The Genesis Quest*, Michael Marshall shows how the quest to understand life's beginning is also a journey to discover the true nature of life, and by extension our place in the universe.

Theorising Noumenal Power

The world's fastest growing continent demographically, Africa displays nearly all the features of today's global security challenges: armed conflict, terrorism, irregular migration, organized crime, great power competition, public discontent, and economic turbulence. John Siko and Jonah Victor present their lessons from professional practice and pedagogical approach from the classroom in a concise guidebook that leads students and professionals through the most important issues, dynamics, challenges, and considerations for analysing and planning responses to security developments in Africa. This book provides issue-by-issue primers on the causes and consequences of Africa's security challenges that include: -how to anticipate security problems across current political and economic events -how to analyse African security institutions and military capabilities -how to understand historical trends across the African continent and appreciate unique variations among countries. -how to identify key drivers of future trends -how to connect security analysis to policy planning Learning is supported through the following features: - Thematic chapters which are optimized to help the reader quickly connect to the key concepts and analytic frameworks within the field. - The most relevant historical case studies, enabling students to engage in sophisticated analysis and discussion. - Connections and contrasts between the situations in North Africa and sub-Saharan Africa, which are traditionally studied separately. - Special sections on understanding race and ethnicity, and advice on traveling in Africa. - Chapter-end checklists of key questions to enable practical engagement with the topics covered.

Special Isotope Separation Project Construction & Operation Using Atomic Vapor Laser Isotope Technology (ID,WA,SC)

Insurance Law and the Financial Ombudsman Service is an in depth look at the workings and insurance decisions of the Financial Ombudsman Service. The book analyses how the Ombudsman Service decides insurance cases and compares its approach to that of a court. This book sets out the rules, procedure and approach of the Ombudsman Service, succinctly summarises the relevant insurance law and compares and analyses it against a comprehensive review of material about insurance complaints gathered since the formation of the Ombudsman Service in 2001.

Travelling Languages

A historic crossover seventy-five years in the making! The Shadow, Doc Savage, and The Avenger, the three iconic crime-fighters first introduced in the pulp magazines of Street & Smith Publications, come together for the first time ever to avert global catastrophe! Out of tragedy, a hero is born... and an alliance formed! When an airliner carrying industrialist Richard Henry Benson and his family disappears, it's the first strike in a secret cabal's master plan for world conquest. As genius adventurer Doc Savage and brutal vigilante The Shadow attempt to avert disaster with their science and bullets, Benson rises from the ashes with a fearsome new identity: The Avenger. Can three men of contrasting ideology and methodology cast aside their inherent differences and band together to conquer the overwhelming threat of the Voodoo Master and his mysterious allies?

Family Economics Review

Crossing Borders examines how translocal, transnational, and internal borders of various kinds distribute uneven capabilities for moving, dwelling, and circulating. The contributors offer nuanced understandings of the politics of mobility across various kinds of borders and forms of cultural circulation, showing how people experience and practice crossing many different borders. Several chapters draw on interviews and ethnographic methods to analyze transnational migration, while others focus on material relations and cultural practices. Rather than the usual narrative of mobility as a kind of freedom, border crossing emerges here as an instrumental practice for building translocal livelihoods, a tactic for simply getting by, and a material practice potentially generating new forms of future sociality. Ultimately these diverse perspectives on crossing borders offer new ways to think about the mobility of political relations and the politics of mobile relations in a world of growing circulation across borders, but also flexible forms of (re)bordering. This book was originally published as a special issue of *Mobilities*.

Morgantina Studies, Volume II

The role of the father in a family and for his children has varied greatly throughout history. However, scientific research into fatherhood began relatively late at the end of the 1960s and early 1970s, with a strong focus on the impact of the father on child development. This book focuses on the role of the father in the contemporary two-parent heterosexual family. Of eight longitudinal studies from several Western countries, six focus on the socialization outcomes of the children, and two concentrate on parental satisfaction. Although the father is in focus, family dynamics cannot be conclusively described without a look at the mother and parental interaction. Therefore, all of the studies examine mothers and their role in the family system. Thus, the book gives a contemporary insight into the father and his role in changing family dynamics. This book was originally published as a special issue of the *European Journal of Developmental Psychology*.

Sport, Ethics and Philosophy

This book begins by discussing the fundamentals of Artificial Intelligence, the Internet of Things, and their convergence. It then covers techniques, algorithms, and methods of analysing and processing data over the Artificial Intelligence of Things. The text elaborates on important concepts such as body sensor networks for safety in smart factories, smart energy management, smart robotic assistive systems, and service-oriented smart manufacturing. This book: • Discusses the security and privacy aspect of Artificial Intelligence of Things (AIoT) for smart real-time applications. • Explores challenges and issues of Artificial Intelligence and the Internet of Things in the field of industrial automation. • Includes case studies in Artificial Intelligence of Things (AIoT) convergence for data processing. • Showcases algorithms, techniques, and methods of analysing and processing data over the Artificial Intelligence of Things. • Highlights operation management using human-robot, smart maintenance, and autonomous production. It will serve as an ideal reference text for senior undergraduate, graduate students, and professionals in fields including industrial engineering,

production engineering, manufacturing engineering, operations research, and computer engineering.
