Business Process Re Engineering BPR - Business Process Re Engineering BPR 1 hour, 24 minutes - Download the presentation:

BUSINESS PROCESS RE-ENGINEERING (BPR)

What is a Process? A specific ordering of work activities across time and space, with a beginning, an end, and clearly identified inputs and outputs: a structure for action. (Davenport, 1993)

A group of logically related tasks that use the firm's resources to provide customer-oriented results in support of the organization's objectives

What is a Re-Engineering? Re-Engineering is fundamental re-thinking, radical re-design and dramatic Improvement.

Reengineering is the fundamental rethinking and radical redesign of business processes to achieve dramatic improvements in critical, contemporary measures of performance, such as cost, quality, service and speed.

Business Process Improvement (BPI) Working within the Existing Framework Make processes Effective, Efficient, Adaptable

Several jobs are combined into one Decentralized decision making The steps in the process are performed in a natural order Processes have multiple versions Work is performed where it makes the most sense Checks and controls are reduced Reconciliation is minimized A process manager provides a single point of contact Hybrid centralized / decentralized operations are prevalent

Advancement criteria change - from performance to ability Values change - from protective to productive Managers change - from supervisors to coaches Organization structures change - from hierarchical to flat Executives change - from scorekeepers to leaders

Choose the processes to reengineer - Broken Processes - Important Processes - Feasible Processes Understand the current proces Understand not analyze the process from the customers - Watch the customers, do it yourself

Leader - A senior management executive Process Owner - The manager responsible for the process being reengineered Reengineering Team

Key Characteristics OF BPR Systems Philosophy Global Perspective on Business Processes Radical Improvement Integrated Change People Centred Focus on End-Customers Process-Based

ERP (Enterprise Resource Planning) ERP is a tool for implementation of BPR. Enterprise resource planning (ERP) is business process management software that allows an organization to use a system of integrated applications to manage the business and automate many back office functions related to technology, services and human resources
