Let's discuss the Output Type specification.

The output type can be PNP or NPN which determines how the load is connected to the sensor.

An important specification is Operating Voltage or Supply Voltage Limits.

Let's look at the Switching Function or Discrete Output Function specification.

Another important specification is the Voltage Drop or Maximum Voltage Drop.

Another specification to consider is Switching Frequency.

An important specification is the Rated Operating Distance or Nominal Sensing Distance.

Let's talk about the specification called Switching State Indicator or Status LED.
