

Who Was George Washington Carver

George Washington Carver

George Washington Carver (1864-1943), best known for his work as a scientist and a botanist, was an anomaly in his own time—a black man praised by white America. This selection of his letters and other writings reveals both the human side of Carver and the forces that shaped his creative genius. They show us a Carver who was both manipulated and manipulative who had inner tensions and anxieties. But perhaps more than anything else, these letters allow us to see Carver's deep love for his fellow man, whether manifested in his efforts to treat polio victims in the 1930s or in his incredibly intense and emotionally charged friendships that lasted a lifetime. The editor has furnished commentary between letters to set them in context.

Federer discusses how the evolution of the American tolerance for various religious beliefs evolved into intolerance of traditional Judeo-Christian belief.

George Washington Carver

She also sets out how these roles served both whites and blacks; reminds the reader of Carver's personal and circumstantial reasons for not demurring; and reaffirms, in particular, his impact on individuals (prominent among whom was Southern radical Howard Kester--viz. Anthony Dunbar's *Against the Grain*, above). An intellectually satisfying study and no less an affecting biography.

George Washington Carver

Born a slave near the end of the Civil War, George Washington Carver was a small and sickly child. Too frail to work in the fields of the Missouri farm where he grew up, George did chores around the house. But when his work was done, he headed for the woods. There his lifelong love of nature was born. As a teacher and scientist at Alabama's Tuskegee Institute in the 1900s, George Washington Carver became famous for his work helping farmers grow better crops while sharing with them his love of nature's beauty. Follow George's inspiring life through this beautifully illustrated and engagingly written book.

My Work Is That of Conservation

George Washington Carver (ca. 1864-1943) is at once one of the most familiar and misunderstood figures in American history. In *My Work Is That of Conservation*, Mark D. Hersey reveals the life and work of this fascinating man who is widely--and reductively--known as the African American scientist who developed a wide variety of uses for the peanut. Carver had a truly prolific career dedicated to studying the ways in which people ought to interact with the natural world, yet much of his work has been largely forgotten. Hersey rectifies this by tracing the evolution of Carver's agricultural and environmental thought starting with his childhood in Missouri and Kansas and his education at the Iowa Agricultural College. Carver's environmental vision came into focus when he moved to the Tuskegee Institute in Macon County, Alabama, where his sensibilities and training collided with the denuded agrosystems, deep poverty, and institutional racism of the Black Belt. It was there that Carver realized his most profound agricultural thinking, as his efforts to improve the lot of the area's poorest farmers forced him to adjust his conception of scientific agriculture. Hersey shows that in the hands of pioneers like Carver, Progressive Era agronomy was actually considerably "greener" than is often thought today. *My Work Is That of Conservation* uses Carver's life story to explore

aspects of southern environmental history and to place this important scientist within the early conservation movement.

The Secret Garden of George Washington Carver

The inspirational story of George Washington Carver and his childhood secret garden is brought to life in this picture book biography by the author-illustrator team behind Muhammad Ali: A Champion Is Born. When George Washington Carver was just a young child, he had a secret: a garden of his own. Here, he rolled dirt between his fingers to check if plants needed more rain or sun. He protected roots through harsh winters, so plants could be reborn in the spring. He trimmed flowers, spread soil, studied life cycles. And it was in this very place that George's love of nature sprouted into something so much more--his future. Gene Barretta's moving words and Frank Morrison's beautiful paintings tell the inspiring life and history of George Washington Carver, from a baby born into slavery to celebrated botanist, scientist, and inventor. His passion and determination are the seeds to this lasting story about triumph over hardship--a tale that begins in a secret garden.

A 2011 Notable Social Studies Trade Book for Young People 2012-2013 Children's Crown Gallery Nominee 2011 Growing Good Kids—Excellence in Children's Literature Award Dr. Carver knew everything in nature was connected. Sally is a young girl living in rural Alabama in the early 1900s, a time when people were struggling to grow food in soil that had been depleted by years of cotton production. One day, Dr. George Washington Carver shows up to help the grown-ups with their farms and the children with their school garden. He teaches them how to restore the soil and respect the balance of nature. He even prepares a delicious lunch made of plants, including \"chicken\" made from peanuts. And Sally never forgets the lessons this wise man leaves in her heart and mind. Susan Grigsby's warm story shines new light on a Black scientist who was ahead of his time.

Christian Encounters, a series of biographies from Thomas Nelson Publishers, highlights important lives from all ages and areas of the Church. Some are familiar faces. Others are unexpected guests. But all, through their relationships, struggles, prayers, and desires, uniquely illuminate our shared experience. A generation of 20th-century Americans knew him as a gentle, stoop-shouldered old black man who loved plants and discovered more than a hundred uses for the humble peanut. George Washington Carver goes beyond the public image to chronicle the adventures of one of history's most inspiring and remarkable men. George Washington Carver was born a slave. After his mother was kidnapped during the Civil War, his former owners raised him as their own child. He was the first black graduate of Iowa State, and turned down a salary from Thomas Edison higher than the U.S. President to stay at the struggling Tuskegee Institute, where he taught and encouraged poor black students for nearly half a century. Carver was an award-winning painter

and acclaimed botanist who saw God the Creator in all of nature. The more he learned about the world, the more convinced he was that everything in it was a gift from the Almighty, that all people were equal in His sight, and that the way to gain respect from his fellow man was not to demand it, but to earn it.

George Washington Carver: Agricultural Innovator

In graphic novel format, tells the life story of plant scientist and inventor George Washington Carver.

George Washington Carver

George Washington Carver was born into slavery in the final weeks of the Civil War. When he was growing up, George was so good at growing plants that the neighbors called him the “plant doctor.” Since George was African American, he wasn’t allowed to go to school with white children. But George was so eager for an education that he walked for miles and moved all over the country to go to school. He studied agriculture in college so he could learn to help others. After college, he moved to the South and taught poor farmers how to grow crops better and keep their soil healthier. He became a respected teacher and scientist during the Great Depression because of his knowledge and kindness to others.
