

# 5 Of Earth's Surface

## Earth

liquid surface water. Almost all of Earth's water is contained in its global ocean, covering 70.8% of Earth's crust. The remaining 29.2% of Earth's crust...

## Earth's outer core

Earth's outer core is a fluid layer about 2,260 km (1,400 mi) thick, composed of mostly iron and nickel that lies above Earth's solid inner core and below...

## Earth's inner core

Earth's inner core is the innermost geologic layer of the planet Earth. It is primarily a solid ball with a radius of about 1,230 km (760 mi), which is...

## Moon (redirect from Earth's moon)

The Moon is Earth's only natural satellite. It orbits around Earth at an average distance of 384399 km (238854 mi; about 30 times Earth's diameter). Its...

## List of sovereign states and dependent territories in South America

South America has an area of approximately 17,840,000 square kilometres (6,890,000 sq mi), or almost 3.5% of Earth's surface. As of 2018, its population is...

## Earth's magnetic field

Earth's magnetic field, also known as the geomagnetic field, is the magnetic field that extends from Earth's interior out into space, where it interacts...

## Earth's orbit

time Earth has traveled 940 million km (584 million mi). Ignoring the influence of other Solar System bodies, Earth's orbit, also called Earth's revolution...

## Internal structure of Earth

its mass. Astronomers can also calculate Earth's mass by observing the motion of orbiting satellites. Earth's average density can be determined through...

## Atmosphere of Earth

The atmosphere of Earth consists of a layer of mixed gas that is retained by gravity, surrounding the Earth's surface. Known collectively as air, it contains...

## Earth's internal heat budget

Earth's internal heat budget is fundamental to the thermal history of the Earth. The flow of heat from Earth's interior to the surface is estimated at...

## **Earth's energy budget**

Earth's energy budget (or Earth's energy balance) is the balance between the energy that Earth receives from the Sun and the energy the Earth loses back...

## **Gravity of Earth**

Earth's surface, the acceleration due to gravity, accurate to 2 significant figures, is 9.8 m/s<sup>2</sup> (32 ft/s<sup>2</sup>). This means that, ignoring the effects of...

## **Ocean (redirect from Earth's oceans)**

essential to life on Earth, harbouring most of Earth's animals and protist life, originating photosynthesis and therefore Earth's atmospheric oxygen, still...

## **Remembrance of Earth's Past**

Remembrance of Earth's Past (Chinese: 地球往事; pinyin: Dìqiú Wǎngshì; lit. 'Earth's Past') is a science fiction novel series by Chinese writer Liu Cixin....

## **Empirical evidence for the spherical shape of Earth**

number of effects and phenomena that when combined disprove flat Earth beliefs. These include the visibility of distant objects on Earth's surface; lunar...

## **Lithosphere (redirect from Surface of the earth)**

from Long Period Surface Wave Dispersion" (PDF). Retrieved 2014-04-25. Barrell, J. (1914). "The strength of the Earth's crust". Journal of Geology. 22 (4):...

## **Origin of water on Earth**

content of the mantle due to limited samples, approximately three times the mass of the Earth's oceans could be stored there. Similarly, the Earth's core...

## **Figure of the Earth**

of the Earth. The simplest model for the shape of the entire Earth is a sphere. The Earth's radius is the distance from Earth's center to its surface...

## **Mars (redirect from Mars surface features)**

of permafrost and ice caps (with seasonal CO<sub>2</sub> snow), but no liquid surface water. Its surface gravity is roughly a third of Earth's or double that of...

## **Greenhouse effect (category Effects of climate change)**

case of Earth, the Sun emits shortwave radiation (sunlight) that passes through greenhouse gases to heat the Earth's surface. In response, the Earth's surface...
