Do you feel stuck? Unsure of how to get your life on track? You are not alone! With all the current social challenges facing individuals today, it isn't unusual to feel stuck. We long to move toward health, freedom, and life, but we are unsure how to get there. This new edition of Dr. Trent's popular book LifeMapping sees him joined by his daughter, Kari Trent Stageberg. Together they provide an effective method to help everyday people learn to navigate the many detours and distractions impacting their careers, families, and ministries so that they can build a more positive life plan for the future. LifeMapping® is a powerful tool developed by Dr. John Trent that teaches people a creative device called "storyboarding." It helps us gather key pictures and events of our own life stories. Utilizing the biblical truth that Jesus can and does change our pictures and bring us new capacities, it helps us lay out a map toward an even more positive future. Specifically, you'll learn how to create a clear path to close relationships; turn many pieces into masterpieces; recognize your strengths, successes, and acceptance levels as well as your emotional freeze points and your individual flash points; live authentically instead of constantly worrying about your image; storyboard your positive life plan; practice learned hopefulness; and much more!

Where Do I Go From Here?

Life has a way of tilting. Jobs are lost. Children leave. Homes foreclose. Spouses die. Everyone experiences the loss of something or someone precious at some point. And more often than not a loss is unexpected, certainly unwanted, and can be our undoing. Miriam Neff, M.A. in counseling, has experienced loss in many manifestations from her beloved soul mate Bob going home to the Lord to a close family member's incarceration. Yet, she has learned "that good things are still possible." "Life is like a kaleidoscope. We point our sphere toward the light, peer in, and see a beautiful array of glass and stones reflecting beauty, diversity, and contrast. We adjust the lens, and another beautiful, yet different combination of color evolves. Then suddenly the kaleidoscope is thrust to face a black hole. No light means no beautiful display. When you timidly, maybe fearfully, tilt your kaleidoscope back toward the light, you'll see a new combination you've never seen before, colors you didn't know existed. Location and contrast create new and unexpected beauty.

“ More than a “survival” book, Where Do I go From Here raises the bar in life after loss to include love, laughter, and adventure. This is a book about facing forward, not backwards. It is about purposely moving into a bolder and broader future. Includes practical help and chapter discussion questions for individual or group study.

An engaging introduction for very young children to the basic facts of life in a way that is gentle, age-appropriate and accessible. Research shows that children are learning about sex at an increasingly young age and often from undesirable sources. The Q&A format, with questions posed in the child's voice and answers starting simply and becoming gradually more in-depth, allows the adult to guide the conversation to a natural and satisfying conclusion. Additional questions at the back of the book allow for further discussion. Child psychologist Dr. Jillian Roberts designed the Just Enough series to empower parents/caregivers to start conversations with young ones about difficult or challenging subject matter. Other books in the series deal with diversity, death, separation and divorce.

However, what I am saying I can do for you is to teach you life skills that we all wished we learned in the classroom - Skills such as: 1. Throughout this book I will be teaching you how to create your own system - a system where you control the outcome and more importantly, a system that allows you to put yourself in the right direction in order to accomplish the goals you have always dreamed of. Join me on this journey, and let's change your life!

The Four Great Questions of Life

Rare is the person who, at some time or another, has not found himself/herself pondering one or more of the four great questions of life Who am I? Where did I come from What is my purpose? And, Where am I going? Such questions invariably arise when there is some crisis in ones personal affairs, but due to the emotional confusion that usually accompanies such crises it is difficult to reason out answers to such profound metaphysical questions. Answers appear in the worlds religions, but there is such a variance of opinion between the different theologies that trying to find a definitive solution among all of those divergent teachings only develops more confusion. There is, however, a common inner or mystical foundation to all

religions that supports their man-made dogmas, creeds and rituals which provides the clear answers all of us are looking for. This consistency and enduring nature of the ideas that form this foundation or ground of religion has resulted in those ideas being collectively referred to as the Perennial Philosophy of mysticism. There can be some difficulty, however, in finding the answers within this Perennial Philosophy because the concepts are metaphysical in nature; and this means they are beyond the range of our normal linear way of thinking and, so, not readily obvious. They are, so to speak, locked-up, and a key is needed for us to be able to discover their wisdom. In this book, *The Four Great Questions of Life*, Dr. Judd provides that key and, Clearly shows where these answers appear in various religious teachings Uses down-to-earth illustrations to explain what they mean Shows the universal application of the ideas embodied in the Christian Trinity Describes how the Law of Karma (cause/effect) and Reincarnation are compatible with Christianity Provides a logical explanation and definition that removes the mystery of the nature of good and evil. For anyone who has ever struggled to find any meaning in such questions as, Who am I? What is my purpose in living? and so on, this book offers clear-cut and practical answers which, irrespective of ones religious background, show the way to a happy and fulfilling life.

Where Did I Come From? Where Am I Going? How Do I Get There?

Where Did I Come From? Where Am I Going? How Do I Get There? is a complete course on Catholicism, featuring concise, reader-friendly, relevant prose. Straight answers are tailored for today's generation. Topics addressed include: Can I know anything? Can I know what God is like? How am I really in the image and likeness of God? What about my conscience? Am I a gift to others? What about my freedom? Is any sexual activity OK before marriage? Do we have to keep Grandma on a feeding tube forever? This book adapts a wildly successful high-school curriculum developed by Charles E. Rice, who taught for years at an Indiana high school in addition to his storied career at Notre Dame Law School. This classroom-tested curriculum has had life-changing effects. Rice's students, who took the course in the late 1970s and early 1980s, credit this course for keeping them Catholic, while their peers turned to Zen, politics, or drugs in their search for ultimate meaning. Rice, with the valuable assistance of co-author and philosopher Theresa Farnan, updates this curriculum by incorporating the Catechism and the personalist philosophy of John Paul II into the timeless wisdom of the Church. Today's young Catholics admire the faith more than ever, but need clear answers about what it is and who they are. The straight answers found in this book are a sure antidote to the confusion of the culture of death. Book jacket.

Where Good Ideas Come From

Where do good ideas come from? And what do we need to know and do to have more of them? In *Where Good Ideas Come From*, Steven Johnson, one of our most innovative popular thinkers, explores the secrets of inspiration. Steven Johnson has spent twenty years immersed in creative industries, was active at the dawn of the internet and has a unique perspective that draws on his fluency in fields ranging from neurobiology to new media. Why have cities historically been such hubs of innovation? What do the printing press and Apple have in common? And what does this have to do with the creation and evolution of life itself? Johnson presents the answers to these questions and more in his infectious, culturally omnivoracious style, using examples from thinkers in a range of disciplines - from Charles Darwin to Tim Berners-Lee - to provide the complete, exciting, and encouraging story of inspiration. He identifies the five key principles to the genesis of great ideas, from the cultivation of hunches to the importance of connectivity and how best to make use of new technologies. Most exhilarating is his conclusion: with today's tools and environment, radical innovation is extraordinarily accessible to those who know how to cultivate it. By recognizing where and how patterns of creativity occur - whether within a school, a software platform or a social movement - he shows how we can make more of our ideas good ones.
