States of Matter | #aumsum #kids #science #education #children - States of Matter | #aumsum #kids #science #education #children 2 minutes, 22 seconds - Our topic for today is States **of**, Matter. Matter is made **of**, particles. It exists in three states, namely solid, liquid and gas. The different ...

Matter is made of particles

The different states of matter are due to the different arrangement of particles of matter.

In solid state, the particles of matter are very close to each other.

The solid particles hold each other very tightly, i.e. there is a strong force of attraction between them.

Solids have a definite shape and volume.

In liquid state, the particles are packed closely together.

The particles in liquids are much farther apart than the particles in solids

The force of attraction in liquids is weaker than it is in solids.

Liquids have a definite volume, but they do not have a definite shape.

Liquids take up the shape of the container in which they are kept

In gases, the particles of matter are very far away from each other.

The force of attraction between particles of matter in gases is very weak

Gases have neither a definite shape nor volume.

Gases can fill the entire space or volume of a container irrespective of the container size

States of Matter : Solid Liquid Gas in Hindi - States of Matter : Solid Liquid Gas in Hindi 19 minutes - States of Matter : Let's explore the 3 States of Matter: Solid, Liquid and Gas. Properties such as shape and volume, compressibility, ...

States of Matter | Educational Videos for Kids - States of Matter | Educational Videos for Kids 3 minutes, 54 seconds - What are you waiting for? Did you know that matter, can be in three forms? Solid liquid and gas ! We can also change from ...

Did you know that matter, can be in three forms?

Matter can be in three states: solid form, liquid form and gas form.

Solid state is characterised by having a fixed size and volume, although in some cases we can change its size, like with plasticine or clay.

Do you know how we can change from one state to another?

Changes in state happen after cooling or heating matter, and there are different types: melting, solidification, evaporation and condensation.

Melting happens when matter changes from its solid form to liquid form, and happens after rising temperature.

Solidification is the opposite change as in melting.

Matter changes from liquid to solid form.

Evaporation is when matter changes from liquid to gas, after liquids are heated.

Condensation is the step from gas, to liquid, and it happens when matter, in gas state is cooled.

Triple Point of Water - Triple Point of Water 1 minute, 55 seconds - The triple point occurs where the solid, liquid, and gas transition curves meet. The triple point is the only condition in which all ...

Ice water is placed inside a vacuum chamber and turned on to lower the pressure.

At this point in time the water is starting to boil.

The water is now at the triple point. The temperature and pressure are at the point where all three phases (gas, liquid, and solid) of that substance coexist in thermodynamic equilibrium.

Observe how the water is melting, freezing and boiling at the same time.
