Trattato di chimica applicata alle arti del signor Dumas. Volume primo [-ottavo]

Questo libro è indirizzato a chiunque affronti lo studio della chimica a livello universitario e in particolar modo agli studenti di ingegneria. Il testo è una raccolta schematica, sintetica e rigorosa di tutte le informazioni teoriche necessarie per capire i concetti fondamentali della chimica, affrontare con serenità il preposto esame universitario e sapersi districare nella crescente giungla di informazioni pseudoscientifiche che ci circonda. Il libro è strutturato come se si trattasse di una raccolta di diapositive, ognuna delle quali riguardante un argomento specifico. Alla fine di ogni argomento sono proposti un numero minimo di esercizi mirati per verificare subito il proprio apprendimento, mentre una più ampia raccolta si trova alla fine del testo. Per ridurre il consumo di carta e limitare i costi di vendita, le soluzioni dettagliate degli esercizi sono raccolte sulla piattaforma TextinCloud. Esercizi di chimica

This book presents a unique historical view of American English. It chronicles year by year the contributions Americans have made to the vocabulary of English and the words Americans have embraced through the evolution of the nation. For important years from the settlement of Jamestown until 1750, and for every year

from 1750 through 1998, a prominent word is analyzed and discussed in its historical context. The result is a fascinating survey of American linguistic culture through past centuries. The authors -- both lifelong students of American English -- bring great depth of understanding to these key words that have made America, and American English, what they are today.

The autobiography of Levi-Montalcini, who won the Nobel Prize for Medicine in 1986. Born in Torino into a middle-class Jewish family, she experienced the rise of fascism and antisemitism in the 1930s-40s (discussed on pp. 73-105). After the promulgation of the racial laws in 1938, it was impossible for her to pursue research at the Neurological Clinic and she continued her work in private. She survived the war hiding in a small town in Italy and later emigrated to the United States. ?c (From the Bibliography of the Vidal Sassoon International Center for the Study of Antisemitism).

Veterinary Anatomy and Physiology

The chapters in this volume describe bottom-up strategies and chronicle cutting-edge advances from several of the world's leading laboratories engaged in the development of molecular machines. The Nobel Prize in Chemistry 2016 was awarded jointly to Jean-Pierre Sauvage, Sir J. Fraser Stoddart and Bernard L. Feringa \"for the design and synthesis of molecular machines\". Both Jean-Pierre Sauvage and Sir J. Fraser Stoddart have also contributed to this book.

La domenica del Corriere supplemento illustrato del Corriere della sera

By Richard Evans Schultes, Harvard University, Cambridge, Massachusetts, and Albert Hofmann, Basel, Switzerland. With Forewords by I. Newton Kugelmass and Henrich Kluver. The Second Edition of this book encompasses all of the advances that have been made in this field since publication of the original text. Newly discovered hallucinogenic plants have been incorporated into the discussions along with new information on some well-known drugs. The authors continue to focus on the botany and chemistry of hallucinogens, although they also consider ethnobotanical, historical, pharmacological and psychological aspects. Initial chapters delineate definition, botanical distribution, and structural types of hallucinogenic plants. Plants of known, possible and dubious hallucinogenic potential are then covered in separate sections. The bibliography for this new edition has been enlarged to accommodate all of the recent activity in botanical and chemical investigation of psychoactive plants. Readers will also appreciate the excellent illustrations that accompany the text.

Design of Pulse Oximeters describes the hardware and software needed to make a pulse oximeter, and includes the equations, methods, and software required for them to function effectively. The book begins with a brief description of how oxygen is delivered to the tissue, historical methods for measuring oxygenation, and the invention of the pulse oximeter in the early 1980s. Subsequent chapters explain oxygen saturation display and how to use an LED, provide a survey of light sensors, and review probes and cables. The book closes with an assessment of techniques that may be used to analyze pulse oximeter performance and a brief overview of pulse oximetry applications. The book contains useful worked examples, several worked equations, flow charts, and examples of algorithms used to calculate oxygen saturation. It also includes a glossary of terms, instructional objectives by chapter, and references to further reading.
