6. Easter Island - Where Giants Walked - 6. Easter Island - Where Giants Walked 1 hour, 43 minutes - On one of the world's most isolated **islands**,, hundreds of vast stone statues lie mouldering in the grass. In this episode, we take a ...

It Became Clear that this Was no Vast Continent Only a Small Island a Dot of Land in the Middle of the Ocean Nevertheless Roggeveen Was Curious and He Ordered His Three Ships To Prepare for Landing It Was Easter Day 1722 as the Dutch Got Closer It Became Clear that the Island Ahead of Them Was Inhabited They Saw Smoke Rising from the Villages along the Coast but It Was a Seemingly Barren Land We Originally from Further Distance Considered Easter Island To Be Sandy the Reasons for that Is that We Counted His Sand that with a Grass Hay or Other Scorched and Burnt Vegetation

It's So Vast that if You Were To Look at Earth from Outer Space It's Just about Possible To Position Yourself so that Only the Pacific Ocean Is Visible and You Could Imagine that You Were Looking at a Planet Completely Composed of Water but the Pacific Is Not an Unbroken Sea across Its Blue Expanse There Are over 25 , 000 Islands of Varying Size Many of Them Thrown Up by Volcanic Eruptions That Burst from the Lively Tectonics of the Pacific Plate Easter Island Is at the Eastern Corner of an Area We Call the Polynesian Triangle a Vast Region of the Pacific Ocean Broken

They Were the Most Successful Ocean-Going Settlers in History They Built Large Sturdy Canoes with Two Hulls in Fact Effectively Two Canoes Joined by a Deck and with Two Masts with Sails the Catamaran Design of these Ships Was Incredibly Sophisticated and in Fact They Look like a Modern Sailing Boat Used for Racing They Were both Stable and Fast and They Allowed the Polynesians To Gradually Settle the Entire Pacific Ocean these Early Settlers Navigated the Oceans without any Physical Navigation Devices They Knew the Stars Well Enough that They Could Make Astonishing Calculations about Latitude and Longitude Using Only the Night Sky

These Early Settlers Navigated the Oceans without any Physical Navigation Devices They Knew the Stars Well Enough that They Could Make Astonishing Calculations about Latitude and Longitude Using Only the

Night Sky and They Didn't Write this Detailed Knowledge Down but Used Only Songs and Stories To Memorize the Properties and Positions of the Stars Islands and Known Sea Routes the Polynesians Also Used the Natural World as an Aid to Their Navigation They Followed the Flight Paths of Seabirds like the Black Turn and this Ancient Polynesian Sailors Song Shows the Significance of these Birds the Black Turn the Black Turn Is My Bed Burden Whom My Eyes Are Gifted with Unbounded Vision

Against the Winds the Explorers Developed a Sailing Technique Known as Tacking Where the Craft Zigzags against a Prevailing Wind in Order To Catch some Forward Motion and Storms in the Pacific Could Be Deadly to these Early Explorers It's Been Recorded that When a Severe Typhoon Struck these Sailors Had a Method of Surviving that Seems Unthinkable to a Modern Sailor They Would Actually Purposefully Flood the Hulls of Their Canoes and because the Wooden Hulls Provided Enough Flotation the Ship Would Stay Afloat but with Most of Its Body Submerged It Would Survive Being Buffeted About in the Gale Force Winds

They Would Actually Purposefully Flood the Hulls of Their Canoes and because the Wooden Hulls Provided Enough Flotation the Ship Would Stay Afloat but with Most of Its Body Submerged It Would Survive Being Buffeted About in the Gale Force Winds while the Storm Went on the Sailors Would Climb inside Their Flooded Hulls Keeping Their Heads above Water and Wait for the Winds To Pass There Has Long Been a Debate about When Exactly these Intrepid Polynesian Adventurers Arrived on Easter Island It Was Long Assumed that They Had Arrived Sometime in the Fourth or Fifth Centuries

These Accounts Come Down to Us either in the Form of Ships Logs or in the Form of Memoirs Written Down When these Explorers Return to Their Homelands the Biggest Problem for Researchers of Rapa Nui Sister Ii Is that these Early Visitors to the Island Left behind Accounts That Are Extremely Limited in Their Content and Their Reliability and that Sometimes Directly Contradict each Other Most of Them Stayed for Only a Few Days They Rarely Wandered Far from Their Landing Spot and They Commented Little on the Culture Language or Society of the Islanders in the Debate That Has Raged over What Happened on Easter Island Many Writers Have Tried To Use a Selective Reading of these Accounts

And It's Worth Mentioning that the Landscape these First Settlers Would Have Seen Was Very Different to the One We See Today on Rapa nui the Bare Grassy Slopes First Spied by Roggeveen in the 18th Century and Which We Know from Images Today Would Have Been Nowhere To Be Seen in Fact They Would Have Been Covered by a Thick Forest of Tropical Palm Trees if You Dig Down into the Earth of Easter Island Today You Can Still See the Hollow Molds Left by the Roots of these Trees Studies of these Root Molds As Well as Pollen Analysis Shows that When Humans Arrived on Rapa Nui

I'll Put an Image of this Tree Up on Twitter and Patreon for You To See As Well as a Digital Reconstruction of What the Original Easter Island Might Have Looked like the Soil of Easter Island Has Never Been Rich but the Forest Would Have Provided a Small Amount of Food for the New Settlers Palm Nuts and Fruits- along with the Birds in the Trees That Could Be Trapped Luckily for Archaeologists the Sand of Anakena Beach the Site of that First Settlement Is Particularly Good at Preserving Bone and Human Remains because of this Skeletons Examined Here Have Given Scientists Insight into the Lives of the Ancient Rapa Nui Studies

They Made Textiles from the Fibers of the Paper Mulberry Tree and Spun Rope from a Tree Known as the Howl Tree and with this Healthy and Diverse Mix of Foodstuffs and Resources Their Settlement Became Incredibly Successful from There Using Slash-and-Burn Agricultural Methods the Original Settlers Spread Quickly across the Small Land Mass of the Island and They Soon Began To Clear the Forests in Order To Plant Their Crops

The Loss of Trees on the Island Resulted in an Ecological Collapse That Destroyed the Fertility of the Soil and the Productive Potential of the Island Fell Apart along with the Collapse of the Islands Ecology the Complex and Centralized Society That Had Built the Hundreds of Stone Statues on the Coast Began To

Collapse to Resources Became Scarce Starvation Ran Rampant and this Led to a Period of Violent Civil War Shortly before the Arrival of the Europeans in 1722 the Whole of Rapa Nui Society Had Come Apart and Only a Few Thousand Survivors Were Left Jared Diamond Perhaps the Greatest Champion of this Theory Today Puts It Bluntly in Just a Few Centuries the People of Easter Island Wiped Out Their Forests Drove Their Plants and Animals to Extinction

Since Ancient Times It Commonly Occurs in Italy for Instance and the Romans Often Used It in Their Buildings Most of the Moai Statues Were Carved in a Quarry on the Outer Cliff Edge of the Rano Raraku Crater this Quarry Is an Eerie Sight Today Here and There the Faces of Half-Finished Giants Still Peer out of the Stone the Rano Raraku Crater Is 700 Metres across Formed of Ash and Volcanic Tuff Thrown Up in an Ancient Explosion and Rings by Cliffs 160 Metres High the Wide Volcanic Bowl Is One of the Three Places on Easter Island Where Freshwater Pools To Form a Lake

It's on the Outer Slopes of the Craters Cliffs That the Truly Important Activity Took Place Here the Island Has Chipped Their Statues Directly from the Bedrock Using a Kind of Stone Chisel Known as a Toki That Was Made of Dense Basalt Perfectly Suited for Carving the Softer Volcanic Tuff this Would Have Been Incredibly Slow Work Work That Might Take a Modern Craftsman with a Steel Chisel One Hour Might Take an Easter Islander with a Stone Toki a Whole Day or Two Days To Complete and although Estimates Vary It's Thought that an Entire Statue Could Take Over a Year for a Team of 12 People To Carve One Fascinating Aspect of this Quarry Is that There Are a Huge Number of Incomplete Moai Abandoned Here 397

And this Shows Just How Difficult the Carving of these Statues Was these Abandoned Moai Have Been Discarded for Different Reasons some More Obvious than Others on some Statues It's Clear that the Workmen Discovered a Seam of Hard Rock Somewhere on the Moai's Body Which Would Have Been Virtually Impossible To Carve with Their Stone Tools Others Have Obvious Flaws or Cracks in Them while some Moai Have Fallen Over while Raising Them Other Moai Simply Seemed To Have Been Too Ambitious in Size the Largest of these Nicknamed El Gigante Is Nearly 22 Metres in Height That's Twice the Height of a Telephone Pole or the Size of a Six-Story Building El Gigante Still Lying on His Back in the Cliff Face Is Almost Twice the Size of any Moai Ever Completed this Enormous Statue Would Have Weighed an Estimated 270 Tons and It's Hard To Imagine How the Islanders Ever Intended To Move It

Others Have Obvious Flaws or Cracks in Them while some Moai Have Fallen Over while Raising Them Other Moai Simply Seemed To Have Been Too Ambitious in Size the Largest of these Nicknamed El Gigante Is Nearly 22 Metres in Height That's Twice the Height of a Telephone Pole or the Size of a Six-Story Building El Gigante Still Lying on His Back in the Cliff Face Is Almost Twice the Size of any Moai Ever Completed this Enormous Statue Would Have Weighed an Estimated 270 Tons and It's Hard To Imagine How the Islanders Ever Intended To Move It We Might Imagine an Ambitious Ancient Craftsman Overseeing the Carving of this Vast Statue Determined To Create the Largest Moai That the Island Has Ever Seen or Perhaps

As We'll Find Out Later the Islanders Believed They Had To Summon a Truly Enormous Protective Spirit To Defend Their Island against the Threat To Get a Sense for How these People Must Have Felt about these Statues Let's Imagine Ourselves into the Role of a Team of Moai Carvers during the Golden Age of Rapa Nui Statue Carving the Work Would Have Been Slow and Painstaking but It Would Also Have Carried a Great Deal of Responsibility while You Were Carving a Moai You Weren't Working in the Fields

The Workers Hands Must Have Been Covered in the Blackish Dust of the Stone and They Would Take Breaks To Eat Meals of Sweet Potato and Taro along with the Chicken Baked White in Earth Ovens Nearby after Much Arduous Work the Whole Outline of the Moai Would Be Carved Out They Would Then Deepen the Cuts and Hollow Out the Cliff behind the Statue Two Clambering into the Narrow Space and Lying on Their Bellies as They Carved but Even with the Back Carved Out the Statue Would Still Be Attached to the Bedrock below with a Narrow Keel That Ran the Length of Its Spine

And They Would Take Breaks To Eat Meals of Sweet Potato and Taro along with the Chicken Baked White in Earth Ovens Nearby after Much Arduous Work the Whole Outline of the Moai Would Be Carved Out They Would Then Deepen the Cuts and Hollow Out the Cliff behind the Statue Two Clambering into the Narrow Space and Lying on Their Bellies as They Carved but Even with the Back Carved Out the Statue Would Still Be Attached to the Bedrock below with a Narrow Keel That Ran the Length of Its Spine and So the Final and Most Painstaking Stage of the Process Would Begin

But Even with the Back Carved Out the Statue Would Still Be Attached to the Bedrock below with a Narrow Keel That Ran the Length of Its Spine and So the Final and Most Painstaking Stage of the Process Would Begin They Would Gather Up Stones and Earth in Order To Support the Moai so that It Didn't Fall and Then this Spine of Stone Would Slowly Be Chipped Away It Must Have Been an Incredible Moment When that Last Stone Umbilical Cord Was Cut It Was the Culmination of So Much Time and Sweat of Course but It Must Have Sent Shivers down Their Spines Too as the Great Statue of Their Ancestor Broke Free of Its Stony Slumbers

The I Was Edged Clear of Its Quarry Resting Place with Huge Teams of Workers Pulling Ropes Spun from the Hou Tree When the Statue Was Clear They Slid It down the Grassy Slope of the Volcano so that It Could Be Stood Upright at the Bottom of the Slope this Was One of the Most Dangerous Parts of the Moai's Journey as the Great Number of Cracked and Abandoned Statues on the Slope below the Quarry Shows Us They Looked like an Army of Stony Wanderers Marching Down from the Volcano and Somewhat Ironically these Abandoned Statues Buried Up to Their Necks in the Refuse from the Quarry

So They Could Finish Carving the Details on Its Back Using Soft Pumice to Where It's Smooth and Then They Would Prepare To Transport the Statue in to Its Final Resting Place on Its Ahoo the Carver's Could Wipe the Sweat from Their Foreheads and Share Congratulations but this Was Just the Beginning of another Long and Arduous Chapter in the Moai's Journey at this Point I Think It's Worth Noting that We Don't Actually Know for Sure How the Ancient Islanders Moved these Vast Statues this Question Was Something That Obsessed Early Visitors to the Island

This Point I Think It's Worth Noting that We Don't Actually Know for Sure How the Ancient Islanders Moved these Vast Statues this Question Was Something That Obsessed Early Visitors to the Island They Looked Around at the Seemingly Barren Landscape of Rapa Nui as Its Grassy Slopes Seemingly Devoid of Large Trees and Asked How Are People without Metal Tools Pulleys or Wheels Could Transport Nearly 500 of these Vast Statues the Largest Successfully Transported Moai Nicknamed Paro Was 10 Metres Tall Which Is Longer than Allen Bus It's Estimated that this Statue Weighed About 82 Tons Heavier than a Boeing 737 Aircraft When Fully Loaded with Passengers and Fuel and the Ancient Islanders Would Sometimes Transport these Statues for Distances of 20 Kilometers across the Islands Rough Undulating Terrain

It's Estimated that this Statue Weighed About 82 Tons Heavier than a Boeing 737 Aircraft When Fully Loaded with Passengers and Fuel and the Ancient Islanders Would Sometimes Transport these Statues for Distances of 20 Kilometers across the Islands Rough Undulating Terrain It's a Question That Has Been Asked of the Islanders since Europeans First Arrived How Did Your Ancestors Move these Statues and for a Long Time the Islanders Would Always Give the Same Reply They Would Simply Say They Walked Foreign Visitors Would Always Roll Their Eyes at this Answer They Assumed this Must Be a Piece of Local Folklore a Kind of Magical Thinking That Imagined the Statues To Be the Living Spirits of the Ancestors some May Even Have Thought that the Rapa Nui Were Making Fun of Them

Heads Are Cracked from Bodies Decapitated Statues Lie Moldering and Moss Covered in the Long Grass for the Ancient Islanders this Must Have Been a Heart-Rending Sight a Whole Team Had Worked for a Year or More Then Successfully Slid this Statue down the Slope of the Volcano Then Somewhere along Its Journey It Had Cracked and the Broken Statue Would Have To Be Abandoned by the Side of the Road these So-Called Road Moai Have a Number of Interesting Features for Instance We Know that the Islanders Waited To Carve the Eyes of the Moai until the Statues Were in Place on Their Platforms

Then Somewhere along Its Journey It Had Cracked and the Broken Statue Would Have To Be Abandoned by the Side of the Road these So-Called Road Moai Have a Number of Interesting Features for Instance We Know that the Islanders Waited To Carve the Eyes of the Moai until the Statues Were in Place on Their Platforms this May Have Had a Ceremonial Purpose Which Has Parallels around the World for Instance in Sri Lanka When New Statues of the Buddha Are Built the Eyes Are Always the Last Part To Be Painted

These So-Called Road Moai Have a Number of Interesting Features for Instance We Know that the Islanders Waited To Carve the Eyes of the Moai until the Statues Were in Place on Their Platforms this May Have Had a Ceremonial Purpose Which Has Parallels around the World for Instance in Sri Lanka When New Statues of the Buddha Are Built the Eyes Are Always the Last Part To Be Painted and Only the Painter Is Allowed in the Shrine Room while Doing Their Work but a Team of Archaeologists Led by Terry Hunt and Carly Poe Also Found Something Else Interesting about these Abandoned Statues

This Is Indeed How the Statues Were Moved It Must Have Been an Incredible Sight To See the Tallest Moai Weighed over 80 Tons and each One of the Statues Footsteps Would Have Thundered on the Earth so that It Really Seemed like a Giant Was Stamping Its Way towards the Platform There Would Have Likely Been a Huge Amount of Ceremonial Activity around the Walking of these Statues to People Coming from All over the Island To Watch Singing and Dancing and all Kinds of Activity

Would Have Likely Been a Huge Amount of Ceremonial Activity around the Walking of these Statues to People Coming from All over the Island To Watch Singing and Dancing and all Kinds of Activity for the Days and Weeks It Took To Transport One of these Statues It Would Have Really Felt like a God Had Come Down to Earth I Love the Romance and Imagination behind Li Po and Hunt's Theory and I Think They Build a Convincing Case that this Was Indeed How the Statues Were Moved but You Might Ask Well Why Does It Matter How the Statues Were Moved Isn't this a Minor Detail of the Story of this Society's Collapse
