Balanced Training

Would you say your dog listens to you well? Does she come when you call her? Does he stay when you tell him to? Are you worried about his safety when you're out walking? Are you worried about YOUR safety when you're out walking (especially on ice)? This book will take you step by step through the education of your dog on these behaviors and many, many more. You can prepare your dog for success in obedience competitions if that is your goal; all the information and training techniques you will need are included. It's time to get your dog trained! Read on!

Maggie's Second Chance

When Maggie's owners leave her behind, she is taken to an animal shelter.

Max Talks to Me

A boy learns from his dog that friendship is based on mutual understanding and trust.

Autonomous Vehicles

This edited book aims to address challenges facing the deployment of autonomous vehicles. Autonomous vehicles were predicted to hit the road by 2017. Even though a high degree of automation may have been achieved, vehicles that can drive autonomously under all circumstances are not yet commercially available, and the predictions have been adjusted. Now, experts even say that we are still decades away from fully autonomous vehicles. In this volume, the authors form a multidisciplinary team of experts to discuss some of the reasons behind this delay. The focus is on three areas: business, technology, and law. The authors discuss how the traditional car manufacturers have to devote numerous resources to the development of a new business model, in which the sole manufacturing of vehicles may no longer be sufficient. In addition, the book seeks to introduce how technological challenges are creating a shift toward connected autonomous vehicles. Further, it provides insight into how regulators are responding to the insufficiently tested technology and how lawyers try to answer the liability question for accidents with these autonomous vehicles.

World Lexicon of Grammaticalization

Based on analysis of more than 1,000 languages, this volume reconstructs more than 500 processes of grammatical change in the languages of the world.

Puppy Socialization

Puppy Socialization: What It Is and How to Do It defines and demystifies the most important thing you can do for your puppy: socialization. The authors don't just tell you what you need to know about socialization. They show you with dozens of photographs and exclusive linked videos (a live internet connection is needed to view the videos). You'll see other owners socialize their puppies under the guidance of a nationally certified dog trainer and behavior consultant. These real-life examples of socialization show you what to do when things go well and when they don't go so well. You'll learn about: • The magical time. Did you know that there is a special time in a puppy's life when he is primed to accept new things? The authors tell you

when that time is, when that socialization window starts closing, and how a little effort by an owner during that time can save heartache later. • Canine body language. Puppies and dogs are talking all the time—with their body language. Learn to tell when a puppy or dog is relaxed and happy, a bit nervous about something, or outright fearful. • Myth-busting. There's a lot of advice out there about socialization and not all of it is good. Some common myths can actually cause a puppy harm. The authors give you the most up-to-date information on puppy socialization and put some harmful myths to rest. • Socializing a puppy during COVID-19. Puppies have so much to get used to: people, environments, noises, and more. The authors provide strategies for keeping humans and puppies safe while socializing puppies, even during the COVID-19 pandemic. • What supplies are needed during socialization. The authors provide checklists of things owners need when socializing a puppy at home and away from home.

We, the Robots?

Explains how artificial intelligence is pushing the limits of the law and how we must respond.

Autonomous Vehicles

Delving deep into the emerging international and federal statutory and legislative developments surrounding Autonomous Vehicle (AV) technologies, Atilla Kasap assesses whether current motor vehicle regulations, liability law and the liability insurance system are fit for purpose today and in the future.

Acceleration

An open mind can come to see perceivance shift in our realities. In whichever way this shift in sight manifests, have faith for this is the way it was meant to be. Through darkness, light is shed, illuminating the deepest lessons. Close encounters with death, injuries and sickness seem to show us our blessings, large and small, even when the perception cultivated has yet to realise. Acceleration is compiled of poetics during 4 years of recovery from a head trauma that left me in an 18 day coma. Shedding light through observations of the world and my mind, I riddle the connections between states of them both and how to heal the links that have been damaged.

Training the Best Dog Ever

Training the Best Dog Ever, originally published in hardcover as The Love That Dog Training Program, is a book based on love and kindness. It features a program of positive reinforcement and no-fail techniques that author Dawn Sylvia-Stasiewicz used to train the White House dog, Bo Obama, and each of Senator Ted Kennedy's dogs, among countless others. Training the Best Dog Ever relies on trust and treats, not choke collars; on bonding, not leash-yanking or reprimanding. The five-week training program takes only 10 to 20 minutes of practice a day and works both for puppies and for adult dogs that need to be trained out of bad habits. Illustrated with step-by-step photographs, the book covers hand-feeding; crate and potty training; and basic cues—sit, stay, come here—as well as more complex goals, such as bite inhibition and water safety. It shows how to avoid or correct typical behavior problems, including jumping, barking, and leash-pulling. Plus: how to make your dog comfortable in the world—a dog that knows how to behave in a vet's office, is at ease around strangers, and more. In other words, the best dog ever.

A Spectrum of Solutions for Clients with Autism

This book is a comprehensive resource to guide work with individuals on the autism spectrum. It reflects the true range of needs presented by individuals with autism, pulling together the most salient aspects of treatment with invaluable information from several disciplines synthesized to guide your work. Divided into topical sections with chapters from three field experts in each, this book features contributions from

therapists, educators, and medical doctors, as well as financial planners, health advocates, and innovators. The diverse disciplines and backgrounds of each author lend a different voice and perspective to each chapter, reflecting the continuum of care necessary when working with clientele on the autism spectrum, and that, for clients on the spectrum, one solution does not fit all. For use by psychotherapists, counselors, applied behavioral analysts, occupational therapists, social workers, teachers, and more, this text presents readers with expertise from various contributing disciplines to give them a treatment resource that can inform and guide their daily work with clients on the autism spectrum.

Pipeline Pedagogy: Teaching About Energy and Environmental Justice Contestations

The proliferation of pipelines to transport oil and natural gas represents a major area of contestation in the landscape of energy development. Battles over energy pipelines pit private landowners, local community representatives, and environmentalists against energy corporations and industry supporters, sometimes drawing opposition and attention from well beyond the impacted regions, as in the case of the Standing Rock/Dakota Access Pipeline. Stakeholders must navigate complex government regulatory processes, interpret technical and scientific reports, and endure lengthy and expensive court battles. As with other forms of environmental injustice, the contentious construction of pipelines often disproportionately impacts communities of lower economic development, people of color, and indigenous peoples; pipelines also pose potential short and long-term health and safety threats. With the expansion of energy pipelines carrying fracked oil and gas across the United States and abroad, the moment is ripe for teaching about pipeline projects and engaging students and community members in learning about methods for mobilization. Our volume examines pedagogical opportunities, challenges, and interventions that campus-community engagement, and other kinds of community engagement, produce in relation to infrastructuring in the form of pipeline development.

Nathan Turner's I Love California

Enjoy the California lifestyle with recipes, stylish interiors, and entertaining tips: “A must-have for locals and visitors alike.” —Architectural Digest Designer Nathan Turner’s style is synonymous with the easy glam of California living. His first book introduced readers to his casual American style and chic design sense. Now, he’s written a love letter to his home state in *I Love California*. This book is a journey up and down Highway 1 that takes you from the redwoods of northern San Francisco to the mountains of the Sierra Nevada to the beaches of Southern California. Simple recipes and tips for entertaining are featured alongside never-before-seen interiors. Lavish photographs capture the homes, people, and food of each unique location in glorious, sun-drenched detail. This book even includes Turner’s signature recipes for California comfort food, like his family’s Cioppino, Marinated Tri-tip Steak, Mexican Chocolate Cake, and more. *I Love California* is a celebration of the Golden State of Mind—for those interested in cooking, entertaining, décor, or just a little getaway to the sun-dappled coast.

Reflexive constructions in the world's languages

This landmark publication brings together 28 papers on reflexive constructions in languages from all continents, representing very diverse language types. While reflexive constructions have been discussed in the past from a variety of angles, this is the first edited volume of its kind. All the chapters are based on original data, and they are broadly comparable through a common terminological framework. The volume opens with two introductory chapters by the editors that set the stage and lay out the main comparative concepts, and it concludes with a chapter presenting generalizations on the basis of the studies of individual languages.

Model Rules of Professional Conduct

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics.

Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Implementing Strategies to Enhance Public Health Surveillance of Physical Activity in the United States

Physical activity has far-reaching benefits for physical, mental, emotional, and social health and well-being for all segments of the population. Despite these documented health benefits and previous efforts to promote physical activity in the U.S. population, most Americans do not meet current public health guidelines for physical activity. Surveillance in public health is the ongoing systematic collection, analysis, and interpretation of outcome-specific data, which can then be used for planning, implementation and evaluation of public health practice. Surveillance of physical activity is a core public health function that is necessary for monitoring population engagement in physical activity, including participation in physical activity initiatives. Surveillance activities are guided by standard protocols and are used to establish baseline data and to track implementation and evaluation of interventions, programs, and policies that aim to increase physical activity. However, physical activity is challenging to assess because it is a complex and multidimensional behavior that varies by type, intensity, setting, motives, and environmental and social influences. The lack of surveillance systems to assess both physical activity behaviors (including walking) and physical activity environments (such as the walkability of communities) is a critical gap. *Implementing Strategies to Enhance Public Health Surveillance of Physical Activity in the United States* develops strategies that support the implementation of recommended actions to improve national physical activity surveillance. This report also examines and builds upon existing recommended actions.

Justice Through Public Interest Litigations

The state of Punjab witnessed a great deal of Political turmoil between the years 1984 and 1994 on account of political uprisings demanding more power to the state. Human rights violations were rampant and were used as a means to quell anti-State rhetoric. To combat this, a group of lawyers came together and fought against State repression while forming a non-profit organization in the 1990's titled "LAWYERS FOR HUMAN RIGHTS INTERNATIONAL". Their motto was to uphold Human rights using Public Interest Litigation as a tool. This book is a compilation of the Public Interest litigations (PILs) filed in The High Court of Chandigarh by the author Advocate Navkiran Singh written with the hope of inspiring young Lawyers, Social activists and Human Rights enthusiasts. Its aim is to pass down knowledge and experience to young, pro-democracy citizens of India. It throws light on how Public Interest Litigations can be used as a tool not only to uphold justice and Human Rights but to also strengthen India as a democracy.

Bestrafte Innovation?

Autonome cyber-physische Systeme, also körperliche, selbstlernende Technologien, werden absehbar Einzug in unsere Lebenswirklichkeit finden. Wird auch das Strafrecht reagieren müssen, wenn innovative, autonome Technologien die tatbestandlichen Erfolge einer Körperverletzung oder einer Tötung herbeiführen? Zwecks Beantwortung dieser Frage untersucht Maximilian Münster die hierzulande geltenden Maßstäbe strafrechtlicher Produkthaftung, um anschließend ihre Anwendung auf das Inverkehrbringen autonomer cyber-physischer Systeme zu bewerten. Bei dieser Bewertung stehen diejenigen Grenzen im Vordergrund, welche das Verfassungsrecht der Kriminalisierung eines Verhaltens zwingend aufgibt. Die Arbeit schließt – auch mit Blick auf die Rechtslage in den USA – mit einer Stellungnahme gegen den Rückzug des Strafrechts aus dem hiesigen Anwendungsfeld.

Emotionally Intelligent Dog Training

During the chaotic evacuation of the United States from Afghanistan in 2021, a group of Congress members who were also military veterans of the War on Terror leapt into action to assist vulnerable people in Afghanistan who had aided the American war effort. This cohort of legislators and their staffs on Capitol Hill created hotlines and worked 24-hour shifts in an intense effort to save lives, often coordinating between government agencies, informal networks of veterans' groups, and contacts on the ground in Kabul. In the process, many veteran lawmakers also became vocal critics of presidential management of the crisis and said they felt a moral obligation to act. In *Staying in the Fight: How War on Terror Veterans in Congress Are Shaping U.S. Defense Policy*, author Jeffrey S. Lantis shines a spotlight on this cohort of legislators and their unique position in the American government. By using exclusive interview data, archival sources, statistics, process -tracing, and comparative case methodology, Lantis illustrates ways that policy interventions and activism by veterans on both sides of the aisle have shaped America's involvement in conflicts from Afghanistan to Ukraine. The first study of its kind to focus on this new generation of military veterans and their role in foreign and security policy decision-making, *Staying in the Fight* speaks directly to debates in

civil-military relations, veterans' studies, and research on congressional foreign policy advocacy.

Staying in the Fight

Nine poignant and empowering short stories from the author of *The Breadwinner*. The seated child. With a single powerful image, Deborah Ellis draws our attention to nine children and the situations they find themselves in, often through no fault of their own. In each story, a child makes a decision and takes action, be that a tiny gesture or a life-altering choice. Jafar is a child laborer in a chair factory and longs to go to school. Sue sits on a swing as she and her brother wait to have a supervised visit with their father at the children's aid society. Gretchen considers the lives of concentration camp victims during a school tour of Auschwitz. Mike survives seventy-two days of solitary as a young offender. Barry squirms on a food court chair as his parents tell him that they are separating. Macie sits on a too-small time-out chair while her mother receives visitors for tea. Noosala crouches in a fetid, crowded apartment in Uzbekistan, waiting for an unscrupulous refugee smuggler to decide her fate. These children find the courage to face their situations in ways large and small, in this eloquent collection from a master storyteller. Correlates to the Common Core State Standards in English Language Arts: CCSS.ELA-LITERACY.RL.6.3 Describe how a particular story's or drama's plot unfolds in a series of episodes as well as how the characters respond or change as the plot moves toward a resolution. CCSS.ELA-LITERACY.RL.6.6 Explain how an author develops the point of view of the narrator or speaker in a text. CCSS.ELA-LITERACY.RL.6.9 Compare and contrast texts in different forms or genres (e.g., stories and poems; historical novels and fantasy stories) in terms of their approaches to similar themes and topics.

Recht und Technik müssen harmonisieren. Für die gesellschaftliche Akzeptanz automatisierter und autonomer Fahrzeuge ist es von wesentlicher Bedeutung, dass klare gesetzliche Schutzmechanismen bestehen, deren zentrale Aufgabe der Opferschutz ist. Das Werk untersucht entlang des dreigliedrigen Haftungsgefüges, bestehend aus Fahrer, Halter und Hersteller, die zivilrechtliche Verantwortlichkeit der einzelnen Akteure. Besonderes Augenmerk liegt dabei auf der Rolle der Fahrzeughersteller, die durch die Automatisierung des Straßenverkehrs in Form von lernfähiger und vernetzter Software verstärkt in den Fokus rücken. Die Abhandlung soll eine fundierte Einschätzung darüber liefern, inwieweit sich die Haftung der Beteiligten neu austariert und was dies konkret für die Reformbedürftigkeit des Haftungsrechts bedeutet.

Last Lecture

In November 2018, Baptist preacher Mark Harris beat the odds, narrowly fending off a blue wave in the sprawling Ninth District of North Carolina. But word soon got around that something fishy was going on in rural Bladen County. At the center of the mess was a local political operative named McCrae Dowless.

Dowless had learned the ins and outs of the absentee ballot system from Democrats before switching over to the Republican Party. Bladen County's vote-collecting cottage industry made national headlines, led to multiple election fraud indictments, toppled North Carolina GOP leadership, and left hundreds of thousands of North Carolinians without congressional representation for nearly a year. In *The Vote Collectors*, Michael Graff and Nick Ochsner tell the story of the political shenanigans in Bladen County, exposing the shocking vulnerability of local elections and explaining why our present systems are powerless to monitor and prevent fraud. In their hands, this tale of rural corruption becomes a fascinating narrative of the long clash of racism and electioneering—and a larger story about the challenges to democracy in the rural South. In their preface to this second edition, Graff and Ochsner bring the story up to date, as accusations of voter fraud continue to pervade our national discourse. *The Vote Collectors* shows the reality of election stealing in one southern county, where democracy was undermined the old-fashioned way: one absentee ballot at a time.

The Routledge International Handbook of Autoethnography in Educational Research presents diverse and rigorous contemporary research at the intersection between autoethnography and educational research. The handbook investigates the bidirectional connection between autoethnography and educational research in relation to four themes: enhancing teaching and teacher education with autoethnography; enlarging doctoral study and supervision with autoethnography; conducting identity work and relationship-building via autoethnography; and promoting social justice through autoethnography. In addition to the synthesising introduction and conclusion chapters, the 27 main chapters in the handbook cover current research from Africa, Aotearoa New Zealand, Australia, Bangladesh, Canada, Spain, the United Kingdom, the United States and Venezuela. The chapters present novel applications of several key concepts and research methods, including activism, arts-based research, critical reflection, decolonising feminism, doctoral study and supervision, hybrid identities, Indigenous research, migrant education, racism, researcher self-efficacy, teacher identity, visual autoethnography and writing as voice. This book will be of use to all researchers, and doctoral and Masters students, using qualitative and autoethnographic methods in Education and related fields.

Technology is an important part of our everyday lives. Whether we ask Alexa to start the coffee machine, or check our phones for the traffic report, we increasingly interact with technology. As much as we may enjoy and rely upon technology, it is not without its challenges, including the inability of the law to keep pace with technological developments and the ethical issues that arise. For example, tort law is impacted by technology; the proliferation of drones requires a new look at the law of trespass, and video Zoom meetings can impose direct liability on employers, for example. Social media supports an increasing share of all advertising and endorsements and is subject to regulation, of which influencers are often not aware. Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law. In the United States, the right of publicity is governed by state rather than federal law, so there is no uniform approach. One part of the book includes a survey of the law of each US state, and proposes a new federal statute. Although most of the examples are drawn from the US, the issues raised are

fully international in scope and relevance. This book will appeal to legal practitioners trying to manage new technology issues facing their clients; academics teaching students how the law is changing, and needs to continue to change, as technology develops; and teachers and researchers in business and management schools, needing to address technology and governance issues.

Access to the radio spectrum is vital for modern digital communication. It is an essential component for smartphone capabilities, the Cloud, the Internet of Things, autonomous vehicles, and multiple other new technologies. Governments use spectrum auctions to decide which companies should use what parts of the radio spectrum. Successful auctions can fuel rapid innovation in products and services, unlock substantial economic benefits, build comparative advantage across all regions, and create billions of dollars of government revenues. Poor auction strategies can leave bandwidth unsold and delay innovation, sell national assets to firms too cheaply, or create uncompetitive markets with high mobile prices and patchy coverage that stifles economic growth. Corporate bidders regularly complain that auctions raise their costs, while government critics argue that insufficient revenues are raised. The cross-national record shows many examples of both highly successful auctions and miserable failures. Drawing on experience from the UK and other countries, senior regulator Geoffrey Myers explains how to optimise the regulatory design of auctions, from initial planning to final implementation. Spectrum Auctions offers unrivalled expertise for regulators and economists engaged in practical auction design or company executives planning bidding strategies. For applied economists, teachers, and advanced students this book provides unrivalled insights in market design and public management. Providing clear analytical frameworks, case studies of auctions, and stage-by-stage advice, it is essential reading for anyone interested in designing public-interested and successful spectrum auctions.

Rich Pickings: Creative Professional Development Activities for University Teachers offers both inspiration and practical advice for academics who want to develop their teaching in ways that go beyond the merely technical, and for the academic developers who support them. Advocating active engagement with literary and nonliterary texts as one way of prompting deep thinking about teaching practice and teacher identities, Daphne Loads shows how to read poems, stories, academic papers and policy documents in ways that stay with the physicality of words: how they sound, how they look on the page or the screen, how they feel in the mouth. She invites readers to bring into play associations, allusions, memories and insights, to examine their own ways of meaning making and to ask what all of this means for their development as teachers. Bringing together scholarship and experiential activities, the author challenges both academics and academic developers to reject narrowly instrumental approaches to professional development; bring teachers and teaching into view, in contrast with misguided interpretations of student-centredness that tend to erase them from the picture; claim back literary writings as a source of wisdom and insight; trust readers' responses; and reintroduce beauty and joy into university teaching that has come to be perceived as bleak and unfulfilling. This book does not attempt to construct a single, coherent argument but rather to indicate a range of good things to choose from. Readers are encouraged to explore the overlaps and the gaps.
