

B Density

Force density

\mathbf{B} , where ρ is the charge density, E is the electric field, J is the current density, c is the speed of light, and B is the...

Relative density

Relative density, also called specific gravity, is a dimensionless quantity defined as the ratio of the density (mass of a unit volume) of a substance...

Density of air

The density of air or atmospheric density, denoted ρ , is the mass per unit volume of Earth's atmosphere at a given point and time. Air density, like air...

Probability density function

In probability theory, a probability density function (PDF), density function, or density of an absolutely continuous random variable, is a function whose...

Area density

The area density (also known as areal density, surface density, superficial density, areic density, column density, or density thickness) of a two-dimensional...

Density meter

density either has the units of kg/m^3 or lb/ft^3 . The most basic principle of how density...

Natural density

In number theory, natural density, also referred to as asymptotic density or arithmetic density, is one method to measure how "large" a subset of the...

Energy density

In physics, energy density is the quotient between the amount of energy stored in a given system or contained in a given region of space and the volume...

Bulk density

In materials science, bulk density, also called apparent density, is a material property defined as the mass of the many particles of the material divided...

Charge density

electromagnetism, charge density is the amount of electric charge per unit length, surface area, or volume. Volume charge density (symbolized by the Greek...

Population density

Population density (in agriculture: standing stock or plant density) is a measurement of population per unit land area. It is mostly applied to humans...

Density gradient

Density gradient is a spatial variation in density over a region. The term is used in the natural sciences to describe varying density of matter, but can...

Osteopenia (redirect from Decreased bone mineral density)

Osteopenia, known as "low bone mass" or "low bone density", is a condition in which bone mineral density is low. Because their bones are weaker, people with...

List of cities proper by population density

This is a list of cities worldwide by population density. The population, population density and land area for the cities listed are based on the entire...

Polarization density

electromagnetism, polarization density (or electric polarization, or simply polarization) is the vector field that expresses the volumetric density of permanent or induced...

Knot density

Knot density is a traditional measure for quality of handmade or knotted pile carpets. It refers to the number of knots, or knot count, per unit of surface...

Magnetic field (redirect from Magnetic flux density)

vector fields denoted by the symbols B and H . In the International System of Units, the unit of B , magnetic flux density, is the tesla (in SI base units:...

Kernel density estimation

In statistics, kernel density estimation (KDE) is the application of kernel smoothing for probability density estimation, i.e., a non-parametric method...

Current density

electromagnetism, current density is the amount of charge per unit time that flows through a unit area of a chosen cross section. The current density vector is defined...

Lebesgue's density theorem

of \mathbb{R}^n . Define the approximate density of A in a δ -neighborhood of a point x in \mathbb{R}^n as $d_\delta(x) = \frac{|A \cap B_\delta(x)|}{|B_\delta(x)|}$ $\{\displaystyle d_{\delta}(x) = \frac{|A \cap B_\delta(x)|}{|B_\delta(x)|}$
