The Austin's are preparing for self-sufficiency and relocating to live off-grid due to increased surveillance, economic uncertainty, and rising crime.

The Austin's abandoned traditional farming for a self-sufficient, permaculture-based food forest that mimics nature, providing a diverse and sustainable source of food, medicine, and ecosystem benefits.

A self-sufficient permaculture farm uses natural methods to grow a diverse array of fruit trees, bushes, and herbs with minimal maintenance, producing abundant food year-round.

The Austin's share their self-sufficient farm practices, including using a greenhouse for food and household necessities, conserving water, and raising goats for milk to prepare for emergency situations.

The Austin's are building a sustainable farm by raising goats for dairy, rabbits and pigs for meat, ducks for eggs and pest control, and bees for honey, using efficient and alternative methods.

The Austin's are expanding their sustainable animal farm, raising pigs for meat, and creating a community event called Prepper Camp to teach survival and homesteading skills.

Being prepared through self-sufficiency and sustainability is key to surviving disasters and crises.
