

# Why

## Start with Why

The inspiring, life-changing bestseller by the author of **LEADERS EAT LAST** and **TOGETHER IS BETTER**. In 2009, Simon Sinek started a movement to help people become more inspired at work, and in turn inspire their colleagues and customers. Since then, millions have been touched by the power of his ideas, including more than 28 million who have watched his TED Talk based on Start With Why -- the third most popular TED video of all time. Sinek opens by asking some fundamental questions: Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? Start With Why shows that the leaders who've had the greatest influence in the world--think Martin Luther King Jr., Steve Jobs, and the Wright Brothers--all think, act, and communicate the same way -- and it's the opposite of what everyone else does. Sinek calls this powerful idea 'The Golden Circle,' and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

## The Book of Why

The hugely influential book on how the understanding of causality revolutionized science and the world, by the pioneer of artificial intelligence 'Wonderful ... illuminating and fun to read' Daniel Kahneman, Nobel Prize-winner and author of *Thinking, Fast and Slow* 'Correlation does not imply causation.' For decades, this mantra was invoked by scientists in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer, or carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl's discoveries have enabled machines to think better, *The Book of Why* explains how we too can think better. 'Pearl's accomplishments over the last 30 years have provided the theoretical basis for progress in artificial intelligence and have redefined the term "thinking machine"' Vint Cerf

## Find Your Why

Start With Why has led millions of readers to rethink everything they do, in their personal lives, their careers and their organisations. Now Find Your Why picks up where Start With Why left off. It shows you how to apply Simon Sinek's powerful insights so that you can find more inspiration at work and in turn inspire those around you. This hands-on, step-by-step guide will help you to find your WHY. With detailed exercises, illustrations and action steps for every stage of the process, Find Your Why can help you address many important concerns including: -What if my WHY sounds like my competitors? -Can I have more than one WHY? -If my work doesn't match my WHY, what should I do? -What if my team can't agree on our WHY? Whether you've just started your first job, are leading a team or are CEO of your own company, the exercises in this book will help guide you on a path to long-term success and fulfilment, both for you and your colleagues.

## Why? Why? Why?

Shares the answers to over one thousand questions on such topics as animals, natural resources, technology, and history.

## **National Geographic Kids Why Not?**

This volume consists of five books, which deal with generalized history, the changed nature of morality, the cause of business cycles, unions and their future, and the dominance of money in modern democracy.

## **Why V**

**Why?: Scientific Answers to Fundamental Questions** sets out to provide simple answers to the most fundamental questions about the world.

## **Why?**

The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914, Europeans conquered 84 percent of the globe. But why did Europe establish global dominance, when for centuries the Chinese, Japanese, Ottomans, and South Asians were far more advanced? In *Why Did Europe Conquer the World?*, Philip Hoffman demonstrates that conventional explanations—such as geography, epidemic disease, and the Industrial Revolution—fail to provide answers. Arguing instead for the pivotal role of economic and political history, Hoffman shows that if certain variables had been different, Europe would have been eclipsed, and another power could have become master of the world. Hoffman sheds light on the two millennia of economic, political, and historical changes that set European states on a distinctive path of development, military rivalry, and war. This resulted in astonishingly rapid growth in Europe's military sector, and produced an insurmountable lead in gunpowder technology. The consequences determined which states established colonial empires or ran the slave trade, and even which economies were the first to industrialize. Debunking traditional arguments, *Why Did Europe Conquer the World?* reveals the startling reasons behind Europe's historic global supremacy.

## **Why Did Europe Conquer the World?**

What reasons do we have to be moral, and are these reasons more compelling than the reasons we have to pursue non-moral projects? Ever since the Sophists first raised this question, it has been a focal point of debate. *Why Be Moral?* is a collection of new essays on this fundamental philosophical problem, written by an international team of leading scholars in the field.

## **Why Be Moral?**

Summary of *Start with Why* *Start with Why* is a book written by Simon Sinek. Someone may ask, what is so special about this book? In this book, Sinek discusses success, but not in the usual, “follow these steps to achieve anything you want,” way. Sinek uses a different approach than readers tend to find in other literature of the same type. The very first premise that the author uses to lead us into his book is a premise that contains one simple word: why. Why do some people reach success while others do not? Why do some groups manage to team-up and endure challenges, thus succeeding, while others fail to do so? What is it that makes some people different from others when it comes to achieving success? The entire book revolves around that question word. But the interesting thing about it, which eventually leads to even more interesting conclusion, is that there is an answer to this “why.” Sinek uses many examples from real life and from people he knew or had researched, and shows how they managed to succeed. By using these examples, the author shows his readers that if others can succeed, so can we. When it comes to practical answers to “why,” the author invests significant effort in finding all the answers. *Start with Why* is an intriguing and fascinating read, which will surely make readers ask themselves this simple, yet tricky question: why? Here is a Preview of What You

Will Get: A Full Book Summary An Analysis Fun quizzes Quiz Answers Etc Get a copy of this summary and learn about the book.

## **The Why and How of Child Discipline**

This book explores the recent changes in U.S. foreign policy, examines the roles that the six primary actors (the President, the Congress, the bureaucracy, non-governmental organizations, the media and the public) play in policy decisions, and assesses the potential for improvement within this system.

## **Summary of Start with Why**

This volume compares international and institutional accounts as alternative perspectives to explain why elections fail to meet international standards.

## **Why American Foreign Policy Fails**

Describes the physiological effect of laughter.

## **Why Elections Fail**

An insightful and passionately written book explaining why a return to Enlightenment ideals is good for the world. The greatest challenges facing humankind, according to Deirdre McCloskey, are poverty and tyranny, both of which hold people back. Arguing for a return to true liberal values, this engaging and accessible book develops, defends, and demonstrates how embracing the ideas first espoused by eighteenth-century philosophers like Locke, Smith, Voltaire, and Wollstonecraft is good for everyone. With her trademark wit and deep understanding, McCloskey shows how the adoption of Enlightenment ideals of liberalism has propelled the freedom and prosperity that define the quality of a full life. In her view, liberalism leads to equality, but equality does not necessarily lead to liberalism. Liberalism is an optimistic philosophy that depends on the power of rhetoric rather than coercion, and on ethics, free speech, and facts in order to thrive.

## **Why We Laugh**

If all my thoughts can be captured, then I will be a photographer, if all that I see in this world is as straight forward, then I will live a simple life, if I understand all that I heard and all the thoughts coming in and out of my head, then I won't be a poet. This is a collection of poems that most people can relate to about everyday life events - love, life, death, animals, family amongst others. These poems are as fictional and factual, and hence complex, a glimpse into my life and yours.

## **Why Liberalism Works**

Find out what connects logic and humor in this alternative guide to logical reasoning. Combining jokes, stories, and ironic situations, Stan Baronett shows how it is possible to ground the language of logic in everyday experience. Each chapter introduces a basic logical reasoning concept based on happenings in daily life. Using jokes as his examples, Baronett reveals the inner workings of logic. After all an effective joke often relies on an unanticipated assumption that leads to an unexpected result. The assumption changes the normal context of an everyday situation, so we are surprised by the ending. A complex mind that learns from experience, and builds a storehouse of regularly recurring patterns, is a great survival tool. But for a joke to work, the punch line has to be something our minds don't logically anticipate. The ending jolts our minds for a split second while we grasp the absurdity of the situation. This is how logic works: one part of your mind determines whether the information you are receiving is true or false, while another part of your mind deals with logical consequences. Injecting a sense of humor into logical language, Baronett helps us understand

how to analyze basic logical reasoning and provides light relief for anyone daunted by the complex world of logic.

## **Why Ask Why**

Why be a journalist? It can be a difficult job with long hours, hard work and an uncertain future. Journalists face relentless criticism and an industry in transition. Aaron Chimbel has put together a collection of essays from working journalists who answer the question — why be a journalist? — with their personal stories of coming up, toiling in the field and writing important, career-defining stories. These journalists come from different platforms, beats and locations, offering varying accounts of the travails and rewards of being a working journalist across changing landscapes and timelines. The essays in *Why I'm a Journalist* offer encouragement and wisdom about the path to being a reporter, a broadcaster, an editor or a media professional. This is a collection for students interested in the field, early upstarts engaged with building their careers and seasoned pros looking to learn from their colleagues.

## **Why Did the Logician Cross the Road?**

If there is one thing Lincee Ray has learned over the years, it's that the majority of women on the planet struggle with insecurities. Our skinny jeans mock us. Our just-trying-to-help mothers are just driving us crazy. Our social media feeds taunt us with everyone else's picture-perfect lives. It's enough to send you on a gummy-bear bender while binge-watching *Friends* reruns and not showering for a week. Lincee knows. She's been there. Right there, in fact. Gummy bears and all. For every woman who's ever wondered if she's unlovable, uninteresting, or unattractive, Lincee offers her particular brand of hilarious (and hard-hitting) self-reflection. Like a true friend, she shows us that the fastest way to happiness is to embrace ourselves in all our imperfection, trust that God knew what he was doing when he made us, and maybe go buy a new tube of mascara. Walk alongside Lincee as she discovers that her identity is not found in her job, her relationship status, her bank account, or her social circle. It's found in Christ.

## **Why I'm a Journalist**

This book has been written to help Christians become more aware of how the devil takes advantage of several conditions of their lives. It has also been written to unveil various aspects of life which believers and unbelievers must know. It exposes the identities of Satan and his accomplices, as well as their activities; and provides revelations by which Christians will be able to overcome them. It also highlights a number of things that Christians must be conscious of, that they may stand firm lest they fall. This book above all challenges the unbeliever to give his/her life to Christ; for salvation comes only through Jesus Christ. If the readers will consider this book seriously, by practicing what is learned from it, they will be fully equipped and be able to resist the devil in all his endeavours.

## **Why I Hate Green Beans**

In this compelling work on a subject that touches us all, Nancy C Gaughan shares her discovery in the Scriptures of God's reasons for allowing suffering in the lives of his people. She relates many of her own experiences from the days of her childhood, as well as those of friends and people in the Bible to show us how -- even in suffering's worst moments -- God's love and joy will flood our souls. For anyone who has asked, 'Why does God let me suffer?'.

## **Why Is Satan Against Christians?**

Here's a book intended to challenge you. Here's a book meant to inspire you. This book is a wake-up call to the global problems and roadblocks for you as a guitarist. This book is meant to be a reality check. Even if

guitar playing is a hobby for you, your level of enjoyment and satisfaction will increase exponentially if you get better, start to like your playing and sound, and then continue to move forward. But if you aspire to be a part-time gigging and recording musician or full-time musician/guitarist, this book is filled with the ten reasons that are seriously holding you back. (It might even give you enough clues to help you teach guitar lessons for years to come!) I want you to attack any or all of these problems that apply to you, and get your momentum back as a guitarist. I've always believed that the expression "momentum builds motivation" is the key to developing as a musician. Once you're truly excited about your playing, your creativity, and your growth, amazing things can happen with your music. If you're here reading a book called "Why You Suck at Guitar" then it means that you're finally ready to deal with those issues that plague aspiring musicians everywhere. It means that you're brave. Brave enough to face the facts. I wrote this to help you, and not to make you feel bad — or worse — about your music. This is your wake-up call — a musician-to-musician intervention — with the goal of helping you get back on the right path. Music should be fun, and it's always fun to get better. I wrote this to help all guitarists because I know that if we don't like our sound, our abilities, or our playing, then music isn't fun at all. It's an annoying feeling. By the way, if you're just looking for a book of guitar exercises, that's not what you'll find here. If you wanted to buy another book of riffs that some random musician-author thinks every guitarist in the world should know, that's fine -- but maybe you don't understand what being a real musician means. What you need is clear. You need a personal sound — and that takes a very personal, grounded approach. That means that you need to deal with some big, global issues in your music-making and not worry about which new lick or riff will suddenly transform your playing. On the other hand, if you've already totally decided what you — as a guitarist — need to do to get better, but you're kind of pissy and stubborn about it, then may I suggest that you just go and do that thing. Don't read this book to see if I can or will change your mind. Do what you want! Follow your musician instincts. If you pretty much know what you want as a musician, and you already have a sense about what you need to work on, seriously, just practice that! But if you do need some more input, some more ideas, some feedback, and a dose of outside inspiration, then you are my ideal reader because: 1) You want to get better now and 2) You admit that you don't have all the answers 3) You have enough of an open mind to check out what I'm going to say and work on removing those roadblocks that apply to you.

## **Why God Lets People Suffer**

Ilsa and her family become the catalyst for global transformation. It's about politics, artificial intelligence, and psychology; about the WHY of life, love, corporate success, systems thinking, and our everyday lives. The story is incredible yet now realistic. It depicts the intricacy of political challenges and the complexity of life. Still, it is compellingly woven into the life of an exceptionally empathetic family. On one hand, we can identify with the lives of the protagonists, and on the other, there are many discussions surrounding the climate catastrophe, geopolitics, robotics, social cohesion, and the driving forces behind human actions. The book is not light reading, yet in many places it remains breezy enough to be enjoyed. The narrative leaves gaps, plays with pacing, and varies in style and focus. It will inspire reflection for many years to come and, hopefully, spark interest in the second part.

## **Why You Suck at Guitar**

'Outstanding...Overy has written a masterpiece of analytical history, posing and answering one of the great questions of the century' Niall Ferguson, Sunday Times The Allied victory in 1945 – though comprehensive – was far from inevitable. By 1942 almost the entire resources of continental Europe were in German hands and Japan had wiped out the western colonial presence in Asia. Democracy appeared to have had its day. In this remarkable study, Richard Overy provides a reinterpretation of the war through an account of the decisive military campaigns that created the astonishing revival in Allied fortunes. He also explores the deeper factors that determined success and failure: industrial strength, fighting ability, the skills of leaders and the moral contrasts between the two sides. Today the modern world is once more in the throes of painful transformation. It is essential to establish why and how the last great war was won. Richard Overy casts a brilliant light on the most important turning-point of the modern age. 'A compelling analysis...skilful and

## **Philosophy: What It Is and Why We Need It**

Chock-full of peculiar puzzles, mind-bending mythbusters, and quirky questions, the fifth pop science book in the bestselling Science of Why series is perfect for anyone curious about the weird and wondrous world we live in. Have you ever wondered if octopuses are from outer space? What Mexican jumping beans are? Or if banana peels are really slippery? If questions like these are keeping you up at night, you can rest easy. Bestselling author Jay Ingram is here to answer all the whimsical and whacky wonderings that have baffled people since the dawn of time. From our bodies to our pets (and other beasts) to the natural world around us, Jay tackles science topics big and small, such as: Did dinosaurs sit on their eggs? What is our funny bone? Is there a specific muscle that makes dogs cute? Because who hasn't pondered whether plants have feelings? Or if Robin Hood was a real person? Or what humans will look like in the future? Teeming with amusing answers to bemusing questions—and handy and hilarious illustrations—this latest volume separates fact from fiction, lesson from legend, and myth from marvel. Endlessly illuminating and entertaining, The Science of Why, Volume 5 is five times the fun for new and old readers of the series.

## **Why Enter Heaven Unannounced?**

• See the Invisible • Feel the Intangible • Achieve the Impossible We have been setting goals for ourselves and achieving them since the beginning of time. We must work hard to get what we want. But what's that main ingredient that all winners possess? What drives them in the face of defeat and adversity? In Why Positive Thinkers have the Power, author Ken Bossone studies the poignant stories of great thinkers, leaders and winners such as Napoleon, Benjamin Franklin and Oprah Winfrey. Laced with humour, coupled with many pragmatic quotes from the living and the deceased pundits of the world such as Shakespeare and Cicero, and Lance Armstrong and Muhammad Ali, this book welcomes you to become a dreamer. It will motivate you to take the reins and navigate confidently through life. Ken Bossone is a financial and business advisor. He is the president of the World Positive Thinkers Club, which includes more than 500 celebrities of the sports and business world, including Tom Brady, Lance Armstrong, Peyton Manning and even the late Dr. Norman Vincent Peale.

## **The WHY of life**

The anointing is one of the most celebrated themes in Christianity especially among Charismatics. In his usual practical and easy – to - follow style, Bishop Tackie - Yarboi, answers the following questions in this book: · What is and what the anointing is not? · Must the Christian seek the anointing at all? · What difference does the anointing make? · Is the anointing applicable to every endeavor of life? · Who can be anointed and how can you receive an anointing? In a systematic way, this book challenges you to go deeper in pursuit of the anointing and takes you through the practical steps of obtaining the anointing.

## **Why The Allies Won**

An original ebook from the current US senator to Utah, explaining why Chief Justice Roberts was wrong to disregard the Constitution in making his historic and controversial healthcare decision. During Chief Justice Roberts's first seven terms on the Supreme Court of the United States, he distinguished himself as a fair-minded jurist and a true constitutional scholar—a man seemingly committed to the rule of law and to core constitutional principles. That hard-earned distinction was turned on its head when, on June 28, 2012, the Chief Justice—writing for a five-to-four majority in *National Federation of Independent Businesses v. Sebelius*—essentially re-wrote key provisions of Obamacare in order to uphold the law, and allow it to be approved, in the face of a justified constitutional challenge. Now United States Senator Mike Lee presents a conservative critique of this controversial ruling, and explains why John Roberts in particular was wrong to vote to preserve the act. In an attempt to be perceived as fair in the mainstream media, Roberts allowed

himself to be swayed by outside influences -- influences to which a Supreme Court justice is supposed to be absolutely immune. Not only that, Senator Lee explains, Roberts conceded that much of the Obamacare act was unconstitutional; yet he instructed states simply to ignore those parts, instead of recognizing that those parts made the entire act invalid. A smart, fair and evenhanded argument, *Why John Roberts Was Wrong* provides a definitive, concise argument against Obamacare.

## **The Science of Why, Volume 5**

The story is about a young man (myself) who grew up in a small village, raised by a single mother who had to endure a lot of stress, trials and tribulation. In the midst of all the stresses and the going up and down of life, with two kids to raise, with a condition of High Blood pressure, sugar diabetes, she fought to keep her kids happy and in the process made them stronger, although it was hard for them, they had to grow up quickly and in the process giving up a lot of privileges. Today they are all grown, even though they still experience the pain and the hurt they had to go through, they do understand that other things have a reason why they happen, they know that if they hadn't gone through other things, life wouldn't be the same for them.

## **WHY POSITIVE THINKERS HAVE THE POWER.**

Children are taught from a young age that drugs and alcohol are bad. This informative book explores the reasons why. Using accessible language and full-color images, this text explains what drugs are and what they do to your body. Readers will learn that some types of drugs, such as medicines, are helpful, but can be dangerous when used inappropriately. Tough topics such as addiction and dealing with friends and relatives who may have drug problems are also covered.

## **Why the Anointing?**

A crystal-clear, scientifically rigorous argument for the existence of free will, challenging what many scientists and scientifically minded philosophers believe. Philosophers have argued about the nature and the very existence of free will for centuries. Today, many scientists and scientifically minded commentators are skeptical that it exists, especially when it is understood to require the ability to choose between alternative possibilities. If the laws of physics govern everything that happens, they argue, then how can our choices be free? Believers in free will must be misled by habit, sentiment, or religious doctrine. *Why Free Will Is Real* defies scientific orthodoxy and presents a bold new defense of free will in the same naturalistic terms that are usually deployed against it. Unlike those who defend free will by giving up the idea that it requires alternative possibilities to choose from, Christian List retains this idea as central, resisting the tendency to defend free will by watering it down. He concedes that free will and its prerequisites—intentional agency, alternative possibilities, and causal control over our actions—cannot be found among the fundamental physical features of the natural world. But, he argues, that's not where we should be looking. Free will is a “higher-level” phenomenon found at the level of psychology. It is like other phenomena that emerge from physical processes but are autonomous from them and not best understood in fundamental physical terms—like an ecosystem or the economy. When we discover it in its proper context, acknowledging that free will is real is not just scientifically respectable; it is indispensable for explaining our world.

## **Why John Roberts Was Wrong About Healthcare**

For decades now, serial killers have taken center stage in the news and entertainment media. The coverage of real-life murderers such as Ted Bundy and Jeffrey Dahmer has transformed them into ghoulish celebrities. Similarly, the popularity of fictional characters such as Hannibal “The Cannibal” Lecter or Dexter demonstrates just how eager the public is to be frightened by these human predators. But why is this so? Could it be that some of us have a gruesome fascination with serial killers for the same reasons we might morbidly stare at a catastrophic automobile accident? Or is something more? In *Why We Love Serial Killers*, criminology professor Dr. Scott Bonn explores our powerful appetite for the macabre, while also

providing new and unique insights into the world of the serial killer, including those he has gained from his correspondence with two of the world's most notorious examples, David Berkowitz ("Son of Sam") and Dennis Rader ("Bind, Torture, Kill"). In addition, Bonn examines the criminal profiling techniques used by law enforcement professionals to identify and apprehend serial predators, he discusses the various behaviors—such as the charisma of the sociopath— that manifest themselves in serial killers, and he explains how and why these killers often become popular cultural figures. Groundbreaking in its approach, *Why We Love Serial Killers* is a compelling look at how the media, law enforcement agencies, and public perception itself shapes and feeds the “monsters” in our midst.

## **Now I Understand Why It Had to Happen**

Is there a reason why you exist? In this lesson, you will find answers to why you were born and what your future will be. Inside this Bible study lesson: -- Introduction -- Something More to Man? -- The Limitations of Science -- Man in the Image of God -- What is Man? -- Was Jesus Christ Truly a Man? -- Why the Son of Man? -- Jesus Christ: Man and the Image of God -- Reward and Punishment -- Is Heaven the Reward of the Saved? -- God the Father -- God's Great Purpose for Man -- How to Learn More from this Bible Study Course Lesson -- David: A Shepherd Learns from the Creation -- Glossary -- Points to Ponder -- <http://www.ucg.org/bible-study-course/>

## **Why Are Drugs and Alcohol Bad for Me?**

Presented in the form of letters from a rabbi to his sons, *Why Israel (and its Future) Matters* argues that young Jews need Israel as a source of pride, connection, and Jewish renewal, and Israel needs them for the liberal values that they can bring to the Zionist enterprise. Exploring the roots and the occasionally antisemitic branches of the campaign against Israel, Rabbi Rosove demonstrates why it's wrong to characterize Israel as an “oppressor state” and damn it with blanket condemnations. A 15-page appendix features a timeline/mini-history of Zionism and Israel from the 19th century through October 2023. “A must-read!” —Isaac Herzog, President of Israel “This thoughtful and passionate book reminds us that commitment to Israel and to social justice are essential components of a healthy Jewish identity.” —Yossi Klein Halevi, author, *Letters to My Palestinian Neighbor* “In its call for ‘aspirational Zionism,’ the book is honest and tough about Israel’s flaws, but optimistic about the country’s direction and filled with practical strategies for promoting change. This is a no-nonsense, straight-talking work, intellectually rigorous but deeply personal.” —Rabbi Eric H. Yoffie, President Emeritus, Union for Reform Judaism “A moving love letter to Israel from a rabbinic leader who refuses to give into despair, but instead recommits to building a democratic Israel that lives up to the vision of its founders.” —Rabbi Jill Jacobs, Executive Director, T’ruah: The Rabbinic Call for Human Rights “Rabbi Rosove grapples with modern Israel, Jewish identity, relations between Israelis and Diaspora Jews, and perhaps most significantly whether ‘you can maintain your ethical and moral values while at the same time being supporters of the Jewish state despite its flaws and imperfections.’ It is a book that many of us wish we had written for our own children.” —Daniel Kurtzer, Former U.S. Ambassador to Egypt (1997-2001) and to Israel (2001-2005)

## **Why Free Will Is Real**

Why is my son so clumsy? Why is my daughter's handwriting so messy? My children only want to play video games: will lack of movement really hurt them? Movement is essential in helping children develop not only motor skills but also intellect

## **Why We Love Serial Killers**

Big cities don't have to mean a dystopian future. They can be turned around to be powerhouses of well-being and environmental sustainability – if we empower women. This book is a unique collaboration between C40 and Friends of the Earth showcasing pioneering city mayors, key voices in the environmental and feminist

movements, and academics. The essays collectively demonstrate both the need for women's empowerment for climate action and the powerful change it can bring. A rallying call – for the planet, for women, for everyone.

## **Bible Study Course: Lesson 3 - Why Did God Create Mankind?**

This book is for Jews and Christians. Jesus said, \"Salvation is of the Jews\" (John 4:22), and in Revelation 14:12 Jesus tells us that we must 'keep the commandments of God' have the 'faith of Jesus'. The Jewish Jesus told us to keep his teachings, and he said unless we do we will never see eternal life. I will compare the Jewish faith and the Christian faith to see which one best complies with Jesus' teachings. It will then be evident to you that most Christians are not saved according to Jesus' criteria, but 'Biblical Jews' are. I know that's a bold statement. But Jesus said, if we don't keep his teachings, we are not saved. I always thought that salvation was of the Christian faith - but Jesus said 'Salvation is of the Jews', now I know what he meant, and Christians had better take note before Judgment Day. Also read about evangelism Jesus' style, Jesus' parables, saving grace, Mark of the Beast, Seal of God, synagogue of Satan, why the church today is Laodicea and much more.

## **Why Israel (and its Future) Matters**

\"With refreshingly clear-sighted analysis, Jerome Booth spells out how political, financial and social groupthink has damaged Britain – and, crucially, how we can tackle it. Highly recommended.\" – Liam Halligan, Daily Telegraph \"Most of the worst political decisions of recent years were made when all the mainstream politicians thought the same thing and no one challenged them. Jerome Booth wisely analyses why this situation happens so often and what can be done about it. Every politician and every decision-maker should read this book.\" – Lord Frost, former Cabinet Office minister \"It is a long time since I read a book with which I agreed so comprehensively.\" – Lord Lilley, former Secretary of State \*\*\* We like to think of ourselves as rational, but human beings are fundamentally irrational creatures – and nowhere is that more apparent than in the fog of groupthink we see around us, from the boardroom to social media. Of the various forms of collective irrationality, groupthink is particularly dangerous. It involves adherence to a faulty consensus, often has a binary moral dimension (one is seen as either virtuous or evil) and is sustained through fear to challenge. Counter-intuitively, the most intelligent and erudite amongst us are particularly susceptible, and when groupthink takes hold, vigorous efforts are made to shut down debate and to bully and punish transgressors. As a result, toleration, liberalism, history, reason and science are under threat. Mass groupthink amongst both the elite and the masses affects millions of people. It has led to financial mismanagement leading up to the 2008 crisis and beyond; poor decision-making at the onset of Covid-19; exaggerated, unchallenged claims which have motivated nonsensical policies; and distortions in academia and journalism. In this remarkable and prescient book, Dr Jerome Booth investigates why some of us have abandoned reason in favour of trite memes, intolerance and hatred. Have we all gone mad? Or can we identify the patterns and causes of what is happening and try to stop it?
