

Che Cos'è L'atto Di Creazione

The Evolution of Language

This volume comprises refereed papers and abstracts of the 10th International Conference on the Evolution of Language (EVOLANGX), held in Vienna on 14-17 April 2014. As the leading international conference in the field, the biennial EVOLANG meeting is characterised by an invigorating, multidisciplinary approach to the origins and evolution of human language, and brings together researchers from many subject areas, including anthropology, archaeology, biology, cognitive science, computer science, genetics, linguistics, neuroscience, palaeontology, primatology and psychology. For this 10th conference, the proceedings will include a special perspectives section featuring prominent researchers reflecting on the history of the conference and its impact on the field of language evolution since the inaugural EVOLANG conference in 1996.

Dialogic Education

Dialogue has long been used in primary classrooms to stimulate thinking, but it is not always easy to unite the creative thinking of good dialogue with the need for children to understand the core concepts behind knowledge-rich subjects. A sound understanding of key concepts is essential to progress through the national curriculum, and assessment of this understanding along with effective feedback is central to good practice. Dialogic Education builds upon decades of practical classroom research to offer a method of teaching that applies the power of dialogue to achieving conceptual mastery. Easy-to-follow template lesson plans and activity ideas are provided, each of which has been tried and tested in classrooms and is known to succeed. Providing a structure for engaging children and creating an environment in which dialogue can flourish, this book is separated into three parts: Establishing a classroom culture of learning; Core concepts across the curriculum; Wider dialogues: Educational adventures in the conversation of mankind. Written to support all those in the field of primary education, this book will be an essential resource for student, trainee and qualified primary teachers interested in the educational importance of dialogue.

The Cambridge History of Medieval Political Thought C.350-c.1450

This volume examines the history of a complex and varied body of ideas over a period of more than a thousand years.

Power and Society in the GDR, 1961-1979

The communist German Democratic Republic, founded in 1949 in the Soviet-occupied zone of post-war Germany is, for many people, epitomized by the Berlin Wall; Soviet tanks and surveillance by the secret security police, the Stasi, appear to be central. But is this really all there is to the GDR's history? How did people come to terms with their situation and make new lives behind the Wall? When the social history of the GDR in the 1960s and 1970s is explored, new patterns become evident. A fragile stability emerged in a period characterized by 'consumer socialism', international recognition and détente. Growing participation in the micro-structures of power, and conformity to the unwritten rules of an increasingly predictable system, suggest increasing accommodation to dominant norms and conceptions of socialist 'normality'. By exploring the ways in which lower-level functionaries and people at the grass roots contributed to the formation and transformation of the GDR from industry and agriculture, through popular sport and cultural life, to the passage of generations and varieties of social experience the contributors collectively develop a more complex approach to the history of East Germany.

Elements of Software Science

Book Designed for Computer Professional Linguists, Psychologists, & Mathematicians. Summarizes the Research in Field of Human/Machine Interaction.

Dr. Montessori's Own Handbook

One of the truly great books on early childhood development, Maria Montessori's illustrated guide was written nearly a century ago in response to thousands of requests from American parents and teachers. In it, the noted educator provided copious information on how to use familiar, simple, easy-to-obtain classroom materials to make any home an effective learning environment. It was to be a \"children's house,\" where youngsters would be their own masters, and free to learn at their own pace. Sound cylinders, sandpaper letters, and numerical rods became features of the typical Montessori classroom. Designed to hone the child's visual, auditory, and tactile perceptions, tools such as these enabled the child to experiment and learn through the powers of observation, recognition, judgment, and classification. An essential teaching aid for parents and educators, this handbook features sections on teaching music, arithmetic and language, and developing sensory and motor skills.

Developing Corporate Social Responsibility

'Perrini et al provide a detailed, authoritative look at the evolving European perspective on corporate social responsibility. They show how Europe has moved from follower status to leading edge practice. The book is the best current indicator of what the next stages of CSR will look like.' - Thomas W. Dunfee, University of Pennsylvania, US The rapidly increasing attention devoted to Corporate Social Responsibility (CSR) has resulted in the term 'CSR' being applied to myriad dissimilar phenomena. The authors therefore aim to dispel this confusion by presenting a multi-faceted view of socially responsible corporate behavior and related themes. They provide a conceptualization of CSR that emphasizes the role of the adoption and implementation of specific CSR strategies and their impact on corporate social and economic performance.

STRUCTURED COMPUTER ORGANIZATION

Geographic Information Research is a broad discipline, and is being actively pursued world-wide. A group of researchers in both North America and Europe have come together as contributors to this volume as a way of combining their expertise. The emphasis is on matters of political, strategic and organizational importance, rather than on technology or systems, and covers the theory and social and political practice which goes hand-in-hand with GIS.

Geographic Information Research

A cumulative index to the \"Iter Italicum\" volumes 1-6, encompassing the indexes previously published to the individual volumes. Reorganised for ease of use, this invaluable aid to users of Kristeller's monumental work will greatly facilitate access to the huge amount of information found here.

Iter Italicum

The protracted economic crisis since 2008, terrorist attacks, and mass immigration have been changing our democracies during the first decades of this century. The crucial questions which emerge are how and why these phenomena had an impact on the effective implementation of the two critical democratic values, freedom and equality, as well as the impact of the European Union. The book analyses France, Germany, Italy, Poland, Spain, and the United Kingdom in the 1990-2020 period, and reveals a pattern of relative decline in these values. The book explores the demand for equalities and freedoms by citizens and the

political commitments of party leaders, as well as how and why equalities and freedoms are affected by domestic aspects, and the role of external factors. In doing so, Equality, Freedom and Democracy demonstrates three different paths for the future of democracy; balanced democracy, protest democracy, and unaccountable democracy. Book jacket.

Counterpoints on a Cantus Firmus

Illustrating his ideas with examples of his own stunning graphic work, as well as an eclectic collection of masterpieces, Rand discusses such topics as: the relation between art and business: the presentation of design ideas and sketches to prospective clients: the debate over typographic style; and the aesthetics of combinatorial geometry as applied to the grid. His book will engage and enlighten anyone interested in the practice or theory of graphic design.

Equality, Freedom, and Democracy

At the start of the 21st century, some 2 million Europeans were detained against their will in prisons, police stations, mental health institutions or other detention centres. It is generally recognised that protection against the arbitrary deprivation of liberty and the prevention of ill-treatment reflect the extent to which states respect human rights and human dignity, when these can be jeopardised by demands for security and efficiency. This book describes the European system for the protection of people deprived of their liberty and how this has evolved over the past fifty years. It discusses the different initiatives taken by the Council of Europe in this area, of which the European Convention on Human Rights and the Convention for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment are the most significant.

From Lascaux to Brooklyn

In our everyday lives we struggle with the notions of why we do what we do and the need to assign values to our actions. Somehow, it seems possible through experience and life to gain knowledge and understanding of such matters. Yet once we start delving deeper into the concepts that underwrite these domains of thought and actions, we face a philosophical disappointment. In contrast to the world of facts, values and morality seem insecure, uncomfortably situated, easily influenced by illusion or ideology. How can we apply this same objectivity and accuracy to the spheres of value and morality? In the essays included in this collection, Peter Railton shows how a fairly sober, naturalistically informed view of the world might nonetheless incorporate objective values and moral knowledge. This book will be of interest to professionals and students working in philosophy and ethics.

The Treatment of Prisoners

"The Road to Wigan Pier" is a book by the English writer George Orwell, first published in 1937. The first half of this work documents his sociological investigations of the bleak living conditions among the working class in Lancashire and Yorkshire in the industrial north of England before World War II. The second half is a long essay on his middle-class upbringing, and the development of his political conscience, questioning British attitudes towards socialism. Orwell states plainly that he himself is in favour of socialism, but feels it necessary to point out reasons why many people who would benefit from socialism, and should logically support it, are in practice likely to be strong opponents. According to Orwell biographer Bernard Crick, publisher Victor Gollancz first tried to persuade Orwell's agent to allow the Left Book Club edition to consist solely of the descriptive first half of the book. When this was refused Gollancz wrote an introduction to the book. "Victor could not bear to reject it, even though his suggestion that the 'repugnant' second half should be omitted from the Club edition was turned down. On this occasion Victor, albeit nervously, did overrule Communist Party objections in favour of his publishing instinct. His compromise was to publish the book with [an introduction] full of good criticism, unfair criticism, and half-truths." The book grapples "with the social and historical reality of Depression suffering in the north of England, – Orwell does not wish merely to

enumerate evils and injustices, but to break through what he regards as middle-class oblivion, – Orwell's corrective to such falsity comes first by immersion of his own body – a supreme measure of truth for Orwell – directly into the experience of misery.\."

Facts, Values, and Norms

In the spirit of Daniel Stern's landmark "Interpersonal World of the Infant," this is the first book to extend the model of mother-infant dialogue to the larger family system.\"

The Road to Wigan Pier

An initiate's guide to the healing practices, spiritual exercises, and secret rites of the Mother Mantra tradition

- Explains the practice of the Mother Mantra, which allows us to overcome subconscious programming, release our fears, and awaken to the dream nature of reality
- Includes instructions for the practice of the Egyptian mantra to attract wealth and abundance and the Mystical Marriage Mantra for transformation and rebirth
- Presents five spiritual rituals that can be incorporated into daily life to reestablish the universal balance between humanity and the divine

Hidden at the heart of nearly all spiritual and esoteric traditions lies the powerful teachings of the Mother Mantra. Its initiates have preserved its consciousness-expanding techniques for millennia. Originating in the ancient practice of shamanic yoga, this tradition allows us to perceive the full complexity of reality. It helps us see both the visible and the invisible, moving beyond the consciousness of duality that limits us to only the material world. Operating in this heightened state of non-ordinary consciousness, we can see beyond our subconscious programming and behavior patterns and understand our possibilities and powers. By removing all fear, it allows you to love yourself exactly as you are. In this spiritual and philosophical guide, initiate Selene Calloni Williams shares the healing practices and spiritual exercises of the Mother Mantra tradition. She explains how these practices bypass the thinking mind to access our higher spiritual consciousness, allowing us to awaken to the dream nature of reality and release us from all fear. She details the exercises and practices of the four-part Mother Mantra: The first series, which dissolves the constructs of the ego; the second, which invokes ancient spirits and deities for their aid in this endeavor; the third, where we experience a divine androgynous tantric union to transcend sexual identity and spiritually fuse with the divine; and the fourth, where the first three rituals are combined to unlock an expanded state of consciousness and a true seeing of the complexity of both the visible and invisible worlds. The author also describes the practice of the Egyptian mantra, a soul-making ceremony that unites the initiate with the Chthonian realms and attracts wealth and abundance, and the Mystical Marriage Mantra, which opens a path to authentic transformation and rebirth. Additionally, Williams presents five spiritual rituals, including yogic poses and exercises, that can be incorporated into daily life to allow divine communication through the chakras, awaken the mind and body from the aging process, and reestablish the universal balance between humanity and the divine.

Najdorf for the Tournament Player

Inspired by the rhythms of the Periodic Table, Primo Levi assesses his life in terms of the chemical elements he associates with his past. From his birth into an Italian Jewish family through his training as a chemist, to the pain and darkness of the Holocaust and its aftermath, Levi reflects on the difficult course of his life in this heartfelt and deeply moving book.
