Chance Compare Hypotheses

Hypothesis (redirect from Hypotheses)

reject several hypotheses before solving the problem. According to Schick and Vaughn, researchers weighing up alternative hypotheses may take into consideration:...

Occam's razor

razor advocates that when presented with competing hypotheses about the same prediction and both hypotheses have equal explanatory power, one should prefer...

Testing hypotheses suggested by the data

In statistics, hypotheses suggested by a given dataset, when tested with the same dataset that suggested them, are likely to be accepted even when they...

Null hypothesis (redirect from Null hypotheses)

samples; all have null hypotheses. There are also at least four goals of null hypotheses for significance tests: Technical null hypotheses are used to verify...

Data dredging

significant at the 1% significance level, and so on, by chance alone. When enough hypotheses are tested, it is virtually certain that some will be reported...

Alternative hypothesis (redirect from Alternative hypotheses)

Hypotheses are formulated to compare in a statistical hypothesis test. In the domain of inferential statistics, two rival hypotheses can be compared by...

Statistical hypothesis test (redirect from Testing statistical hypotheses)

simple hypotheses, this is the test's probability of incorrectly rejecting the null hypothesis. The false positive rate. For composite hypotheses this is...

Sudden unexplained death in childhood (section Hypotheses)

febrile seizure hypotheses SUDC is rare, with a reported incidence in the United States of 1.2 deaths per 100,000 children, compared to 54 deaths per...

Misuse of p-values (section Representing probabilities of hypotheses)

likelihood of hypotheses. The p-value does not in itself allow reasoning about the probabilities of hypotheses, which requires multiple hypotheses or a range...

Plaque hypotheses

Plaque hypotheses are theories to explain the role of plaque bacteria in dental caries and in periodontal disease. They rely heavily on the postulates...

Analysis of variance

statistical methods used to compare the means of two or more groups by analyzing variance. Specifically, ANOVA compares the amount of variation between...

Power (statistics)

as this where several hypotheses are under consideration, it is common that the powers associated with the different hypotheses differ. For instance,...

P-value

the hypotheses of interest about its distribution, different null hypothesis tests have been developed. Some such tests are the z-test for hypotheses concerning...

68–95–99.7 rule

probability not just to the hypothesis itself but to all possible alternative hypotheses. For this reason, statistical hypothesis testing works not so much by...

Carbonado (section Hypotheses for origin)

scarce." The origin of carbonado is controversial, and some proposed hypotheses are as follows: Direct conversion of organic carbon under high-pressure...

Technological singularity (redirect from Singularity Hypotheses)

intelligence (specifically seed AI) is the most popular option among the hypotheses that would advance the singularity.[citation needed] The possibility of...

Fine-tuned universe (category Astronomical hypotheses)

possible categories of hypotheses concerning fine-tuning and order: (i) chance, (ii) regularity, (iii) combinations of regularity and chance, (iv) uncaused,...

Marcan priority (category Hypotheses)

agreements. Different answers to this question give rise to different synoptic hypotheses. The most widely accepted hypothesis is the two-source hypothesis, that...

Nominative determinism (category Hypotheses)

technology (with references that check out, please) together with any hypotheses you may have on how it comes about. The editors of Feedback, John Hoyland...

Research design

research tests a priori hypotheses — outcome predictions that are made before the measurement phase begins. Such a priori hypotheses are usually derived from...
