Nairobi Travel Guide

Soon enough I found myself outside the airport in what felt like a market - a wall of people shouting and heckling, selling newspapers, phone cards, even boiled eggs. But it wasn't the people that stopped me in my tracks, it was the heat. The heat made New Orleans on a hot summer day feel like spring. Humid, thick and salty to taste, that was Nairobi heat. When a beautiful blonde girl is found murdered on the porch of an African university professor in a small town in Wisconsin, USA, hard-working detective Ishmael Fofona knows immediately that it will be the news event of the year. What he cannot know however is that the discovery of the dead girl will change his life forever and that barely seventy-two hours after being called to the scene he will find himself on African soil, hunting for clues in a case that seemingly makes no sense. Why would Joshua Hakizimana - hero of the Rwandan genocide, a man who had saved hundreds of people from the machetes of genocidaires - kill a random white girl and then dump her body outside his house? The answers, it would seem, lie in Africa. And there is only one way to get at them.

Echoing the edgy, disjunctive, ever-emergent city of Nairobi that it explores, *Nairobi Becoming: Security, Uncertainty, Contingency* strives to be several things-in-the-making. It is a historically and anthropologically minded examination of a shifting cityscape, an experimental, collaborative exercise in curated juxtaposition and assemblage, and an interdisciplinary, subjunctive urban ethnography. It brings together curated interventions by twenty-seven artists, scholars, and writers to trace Nairobi's becoming. Methodologically experimental and multimodal, it seeks to balance an appreciation of Nairobi's fragmented character while also recognizing its contingent coherency. *Nairobi Becoming* curates an eclectic collection of different voices and interventions to evoke something of the city's manifold guises and historicities – an urban mosaic of partial experiences as well as dawning possibilities for future becomings. Assembling scholarship, literature,

creative non-fiction, and visual art, the contributions are arranged around particular themes, while resisting the urge to develop a singular coherent voice. Security – in its various guises – is the linking thread, the point of articulation that connects apparently disparate elements of Nairobi life, from sex work to roadbuilding, goat markets to funerals. Security is here an analytical operator: a concept that refracts the seemingly diverse modalities of life in Nairobi, and, with the related domains of uncertainty and contingency, brings the city's dynamics of fragmentation and coherence to the surface in surprising ways. If confronting Nairobi's will to coherence amidst the strains of fragmentation is the empirical and analytical challenge of *Nairobi Becoming*, then it is through collaboration and juxtaposition, curation and contrast, and the messiness of assemblage, that this book chimes with the fraught multiplicities of a city-in-the-making. As such, this book is also an exploration of the inevitable tension that exists between curatorial intent and the possibility of allowing each contribution to stand for itself.

In this book Kyama Mugambi and Mark Shaw examine the diverse expressions of Christianity in Metropolitan Nairobi, a city boasting a population of ten million, which is one of the most religiously pluralistic cities in the world. Founded in 1899 as little more than a train depot for the Uganda Railway, Nairobi has come a long way; mosques, megachurches and temples serve as the backdrop for examining Christianity and public life in this vibrant city. This volume covers all the major Christian traditions practiced in the city, including Protestantism, Orthodoxy and Catholicism. The city is a laboratory of a new global pluralism, and a vital centre of a new global Christian pluralism specifically. Mugambi and Shaw argue that this kind of pluralism is reshaping religion everywhere in the majority world. Other themes include the role of women in Christianity, Kenyan Independent Churches, and the Christian youth movement. The book illuminates how through Christianity, Africans have begun to come to terms with modern urban realities, including religious pluralism, hypothesising how this process could unfold in other parts of the world.

This study formulates conditions for sustainable impacts of inclusive and responsive governance through 'invited spaces' offered by the government and 'claimed spaces' created by the poor. The study questions how increased contributions to poverty reduction and improvement of quality of life for Nairobi citizens can be realised in an equitable and responsible way, while contributing to development of the city and country. To adequately address this two-sided objective of economic growth and poverty reduction in the contemporary context, the study analyses both processes and impacts; moreover it examines impacts in terms of quality of life as well as influence and political rights. The study explores the individually claimed spaces of households in Nairobi's slums, the collectively claimed spaces of hybrid mechanisms for access to peri-urban land and tenure, and the invited spaces of city-wide governance networks.

Street vending represents a significant share of the urban informal economy. Poverty and high levels of unemployment in Nairobi City have seen the number of women street vendors increase as they take up street trading as a means of survival and a livelihood strategy. However, there is limited understanding about the socio-economic characteristics of the women vendors, challenges they experience and the effects of the regulatory framework on their activity. This study used a human rights perspective to examine the situation of women street vendors because policies dealing with street trading should be based explicitly on the norms and values set out in the international law of human rights so as to promote and protect the rights of women street vendors. Data was collected from women street vendors who were selected from the streets using interview schedules while interview guides gathered data from key informants in the public and private sectors. Data analysis employed quantitative techniques on the questionnaires and hypothesis testing and qualitative methods for content analysis.

The City Makers of Nairobi re-examines the history of the urban development of Nairobi in the colonial period. Although Nairobi was a colonial construct with lasting negative repercussions, the African population's impact on its history and development is often overlooked. This book shows how Africans took an active part in making use of the city and creating it, and how they were far from being subjects in the development of a European colonial city. This re-interpretation of Nairobi's history suggests that the post-colonial city is the result of more than unjust and segregative colonial planning. Merging historical documentation with extensive contemporary urban theory, this book provides in-depth knowledge of the key historical roles played by locals in the development of their city. It argues that the idea of agency, a popular inroad to urban development today, is not a current phenomenon but one that has always existed with its many social, spatial, and physical ramifications. This is an ideal read for upper-level undergraduate and graduate students studying the history of urban development and theories, providing an in-depth case study for reference. The City Makers of Nairobi broaches interdisciplinary themes important to urban planners, social scientists, historians, and those working with popular settlements in cities across the world.

Kenya has been the third major outlet through which hundreds of thousands of refugees from Somalia, Ethiopia, Eritrea, and South Sudan flee from political persecution and for better livelihoods. This book is a commentary of Nairobi as an urban refugee space. It provides an in-depth ethnographic account and analysis of state-refugee relations in Nairobi focusing mainly on the lived experience of Ethiopian refugees. In addition, the author employs Henry Lefebvre's work on "right to the city" to explore and qualify whether the literature in urban citizenship can speak to the Kenyan experience. This book is a timely and remarkable addition into the cannon of scholarship in comparative urban studies, African studies, and refugee studies.

Public open spaces play a significant role in the life, form, and experience of cities. The growth of towns and cities results in greater urbanization within countries. Urban growth means increased numbers of people in cities who require access to social amenities. These social amenities include public open spaces in cities such as Nairobi, Kenya. In Nairobi's case, multiple public open spaces in its Central Business District (CBD) are under-utilized, and do not fully perform their role as publicly accessible areas for commerce, transportation, transit, and recreation. There is, therefore, a dichotomy comprising an increased demand for public open spaces on one hand and a non-optimal use of such existing spaces on the other. Through an analysis of the spatial evolution of public open spaces and components of sustainability, this book establishes factors that contribute to spaces that are better utilized and more suitable for their users. It employs a systematic, comparative analysis of spatial changes in Nairobi's CBD. Through comprehensive data, it provides information on the shifts in sustainability of the city's public open spaces over time. For Nairobi, the connection between spatial evolution and sustainability regarding its public open spaces has required greater evidence-based articulation. This book, therefore, serves to fill a knowledge gap through its investigation of urban spatial elements as they relate to social, economic, environmental, and governance aspects of sustainability. By presenting statistical models of sustainability, it also highlights the drivers of sustainability of public open spaces in the CBD.
