Proceedings of the International Renewable Energy Storage Conference (IRES 2022)

This is an open access book. Energy storage systems are the key to the successful energy transition to full renewable energy supply and are more relevant today than ever before. They address numerous challenges of the energy transition at once: stabilise the electricity grids, support the shutdown of power plants, make regionally generated electricity available locally and compensate for fluctuations in renewable energy generation. For more than 15 years now, EUROSOLAR has dedicated the annual International Conference on Renewable Energy Storage (IRES) to this important topic. The conference, which has been organised in partnership with Messe Düsseldorf since 2015, addressed the current state of research and the social, political and legal framework conditions of energy storage technologies from 20 to 22 September 2022, as part of its exhibitions on decarbonised industries. In up to three parallel series of lectures, experts from science, practice, politics and society focused on the current state of knowledge about energy storage. In recent years, more than 4000 visitors attended Energy Storage Europe, the predecessor of Messe Düsseldorf's decarbXpo and IRES, each year. In plenary sessions, topic-specific lecture series and discussion rounds, around 150 lectures were presented including a large poster exhibition. We look forward to welcoming you to the 17th IRES in 2023.

How the Coming Global Crash Will Create a Historic Gold Rush

How the Coming Global Crash Will Create a Historic Gold Rush demonstrates the causal relationship between a deep economic crisis and a historical increase in the price of gold. Through the last years of his presidency, Jimmy Carter struggled with the legacy of the OPEC oil embargo causing large lines at the gas pump to pay surging gasoline costs. After the 1973 embargo, the price of oil quadrupled, forcing the United States into a deep recession that lasted into 1975. Gold surged during this period of stagflation, the unusual economic condition in which stagnant economic growth and high inflation coincide. In 1980, when Ronald Reagan was elected president, gold hit a high of \$843/ounce. In 2008–2009, the collapse of the subprime mortgage market and the bursting of the real estate bubble caused a Great Recession in which prestigious financial institutions failed across the globe and serious investors poured their money into gold to maintain their total asset value. In 2010, gold's price hit a high of \$1,426/ounce. In the wake of the economic collapse caused by the COVID-19 lockdown, gold hit a yearly high of \$2,058.40 in 2020, on the way to an all-time high of \$2,074.60 on March 8, 2022. The global economy faces an economic meltdown in 2023, the magnitude of which we have not seen since the Great Depression in the 1930s. When the bubble in hedge funds and derivative contracts bursts, financial institutions worldwide will have to absorb billions and possibly even trillions of dollars in losses, an amount of money almost inconceivable in any other era of global financial history. In this book, Dean Heskin and Jerome R. Corsi explain the reality of 2022–2023: the dollar may collapse, and mounting unemployment and plummeting property values may accelerate the near disappearance of the middle class. In the dystopian world we are entering, gold and silver may be the only “money” that will hold its value.

Sociology and the Holocaust

For some time the conventional wisdom in the interdisciplinary field of Holocaust studies is that sociologists have neglected this subject matter, but this is not really the case. In fact, there has been substantial sociological work on the Holocaust, although this scholarship has often been ignored or neglected including in the discipline of sociology itself. *Sociology and the Holocaust* brings this scholarly tradition to light, and in doing so offers a comprehensive synthesis of the vast historical and social science literature on the before, during, and after of the Holocaust—a tour d’horizon from an explicitly sociological perspective. As such, the aim of the book is not simply to describe the chronology of events that culminated in the deaths of 6 million Jews but to draw upon sociology’s “theoretical toolkit” to understand these events and the ongoing legacy of the Holocaust sociologically.

OECD Economic Surveys: Germany 2023

Oak Cliff and the Missing Pieces

Oak Cliff and the Missing Pieces is the first book written about the area's history in over three decades. It not only captures the beginnings of the early settlement, it takes the reader beyond a century and a half of growth and tracks how the community has evolved. The book is unique in that it captures the history of West Dallas in conjunction with its Oak Cliff neighbor and how the two transformed together over time into what we see today. The collection of historical accounts and hundreds of photos identify individuals and places of prominence finally memorialized in one anthology. The narrative also takes readers through facts and stories that have been ignored or concealed, revealing an authentic depiction of how the community was, at times, abused and neglected. Readers will enjoy this introspective examination of the area south and west of the Trinity and will once and for all put together the missing pieces of the storied land that has long been

misunderstood. All proceeds from the sale of Oak Cliff and the Missing Pieces will go to benefit non-profit organizations in Oak Cliff and West Dallas.

International Trade, Economic Crisis and the Sustainable Development Goals

The economy is recovering supported by higher global energy prices and the rebound of the non-energy sector. Inflation has increased driven by imported energy and food prices, partial liberalization of fuel prices, and domestic weather-related shocks. The financial sector appears well-capitalized, liquid, and profitable.

Higher global energy prices helped improve the external position, turn the FY2022 fiscal position into a surplus, and lower public debt.

By 2050, an additional 2.5 billion people will be living in the world’s towns and cities, almost 50% of them in the 56 Commonwealth countries. To a significant extent, the future of the planet hangs on how cities and human settlements are managed. It is in our cities that the emissions creating climate catastrophe are stoked and where change can – and must – make a difference at scale. Food security, water, basic services, migration, shelter, jobs, environment: sustainable urbanisation is about changing direction to strive for a fairer and less environmentally damaging future. This well-illustrated book by authors from around the Commonwealth tells how the Commonwealth Association of Planners across five decades has campaigned to make a difference. It also looks ahead, scoping the urgent, practical action that is now required.

The Second World War – an unparalleled catastrophe. With millions of victims, destruction and immeasurable suffering. But without this catastrophe, the ‘light freight locomotive’ of the Deutsche Reichsbahn would probably never have achieved the importance it has today. It would probably never have become the most built steam locomotive in the world. With probably the most modern production logistics of that time and with the help of forced labour, more than 10,000 units were built. After the war they became a decisive factor in the reconstruction of Europe. More than 80 years later traces could be found in at least 25 countries and on three continents. Find out more about the history of this locomotive, which had a major impact on the railways of the continent.

PPI Detailed Report

In Citizenship and the Diaspora in the Digital Age: Farooq Kperogi and the Virtual Community, Toyin Falola examines how the members of the Nigerian diaspora create a virtual community and instrumentalize the digital age to speak about the nation and its failures, possibilities, and promises. This book depicts

individuals' relationships with society and how the world's progressive shift toward technology and globalization does not disregard the concept of society and its members. As a result of this shift, people have been migrating to new places without giving up their citizenship in their home countries. This book explores how migrants are focused on the idea of a virtual community, examines how citizens' roles have evolved through time, and displays society's essential principles in this light. Furthermore, it evaluates social commentaries enhanced by the dynamics of the digital age, such as societal issues like education in Nigeria, the question of democracy, challenges facing the country, and the development of a national language. Many of these societal challenges are examined in this book from the perspective of Farooq Kperogi, who has conducted extensive studies and published on the above themes. This is balanced against emerging facts, Nigerians' positions, and disregarded realities. Kperogi's relentless writings on Nigeria make him a preeminent figure whose positions are valuable to the understanding of modern Nigeria.

Planning, Sustainable Urbanisation and the Commonwealth

We once idolized tech entrepreneurs for creating innovations that seemed like modern miracles. Yet our faith has been shattered. We now blame them for spreading lies, breaking laws, and causing chaos. Yesterday's Silicon Valley darlings have become today's Big Tech villains. Which is it? Are they superheroes or scoundrels? Or is it more complicated, some blend of both? In *The Venture Alchemists*, Rob Lalka demystifies how tech entrepreneurs built empires that made trillions. Meta started as a cruel Halloween prank, Alphabet began as a master's thesis that warned against corporate deception, and Palantir came from a campus controversy over hateful speech. These largely forgotten origin stories show how ordinary fears and youthful ambitions shaped their ventures—making each tech tale relatable, both wonderfully and tragically human. Readers learn about the adversities tech entrepreneurs overcame, the troubling tradeoffs they made, and the tremendous power they now wield. Using leaked documents and previously unpublished archival material, Lalka takes readers inside Big Tech's worst exploitations and abuses, alongside many good intentions and moral compromises. But this story remains unfinished, and *The Venture Alchemists* ultimately offers hope from the people who, decades ago, warned about the risks of the emerging Internet. Their insights illuminate a path toward more responsible innovations, so that technologies aren't dangerous weapons but valuable tools that ensure progress, improve society, and enhance our daily lives.

Citizenship and the Diaspora in the Digital Age

With the transformation of the human disease spectrum, chronic non-infectious diseases have become the main killer of human health in modern society. The interaction between genes and the environment will cause the body's immune function to be disordered, thereby affecting the body's homeostasis and causing various chronic non-infectious diseases. It has been revealed that the occurrence and development of most chronic diseases, such as cancer, cardiac disease, diabetes mellitus, autoimmune disease, and neuroimmune disorders, are associated with the dysregulation of the immune system.

The Venture Alchemists

This handbook explores two guiding questions – how can university-community partnerships in planning education work, and how can they be transformative? University-community partnerships – often referred to as service-learning or community-engaged teaching and learning – are traditionally based on a collaborative relationship between an academic partner and a community-based partner, in which students from the academic partner work within the community on a project. Transformational approaches to university-

community partnerships are approaches that develop and sustain mutually beneficial collaborations where knowledge is co-created and new ways of knowing and doing are discovered. This edited volume examines a variety of university-community partnerships in planning education, from a number of different perspectives, with a focus on transformative models. The authors explore broader theoretical issues, including topics relating to pedagogy, planning theory, and curriculum; along with more practical topics relating to best practices, logistics, institutional support, outcome measures, and the various forms these partnerships can take – all through an array of case studies. The authors, which include academics, professional practitioners, academic practitioners, and students, bring an incredible depth and breadth of knowledge and experience from across the globe – Australia, Canada, Chile, Europe (including Germany, Spain, Slovakia, and Sweden), India, Jamaica, South Korea, and the United States.

Proceedings of IAC in Vienna 2022

Around the world, people and societies are at risk of being affected by disasters, both natural and man-made. In the face of climate change and human activity, the threat posed by unexpected disasters is likely to increase in future. This book, the first of its kind in Hong Kong, offers insights from experts in healthcare and higher education both locally and further afield. Some of the authors have first-hand experience with various elements of disaster management through such events as the 2008 earthquake in Sichuan, the COVID-19 pandemic, and large-scale competitions including the Standard Chartered Hong Kong Marathon. Key learnings and recommendations are presented in three sections: disaster management and reconstruction, including what we can learn from past earthquakes; the importance of healthcare and emergency medicine in disasters and community events; and the way forward, in particular how technology and systems thinking can be used for disaster mitigation. By shedding light onto future work in disaster management and emergency medicine in Hong Kong and East Asia, this book aims to contribute to community resilience in the region and beyond. It will be useful for tertiary and postgraduate programmes, teachers and academics, practitioners, healthcare providers, policymakers, and community leaders.

These proceedings represent the work of contributors to the 22nd European Conference on e-Learning (ECEL 2023), hosted by University of South Africa, Pretoria, South Africa on 26-27 October 2023. The Conference Co-Chairs Associate Professor Sarah Jane Johnston and Associate Professor Shawren Singh both from University of South Africa, Pretoria, South Africa. ECEL is now a well-established event on the academic research calendar and now in its 22nd year the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research. It is especially relevant that the conference is being hosted by UNISA this year as the university celebrates its 150th anniversary. UNISA has been a pioneer in first distance and now e-Learning. The conference will also host the final round of the 9th e-Learning Excellence Awards where innovative case histories will be presented. The opening keynote presentation is given by Professor Thenjiwe Meyiwa, Vice Principal for the Research, Postgraduate Studies, Innovation and Commercialisation at University of South Africa who will speak on, “The Role of African Feminisms in Shaping a Sustainable Future of Being and Learning”. An afternoon keynote on Thursday will be made by Dr Zolile Martin Mguda, University of South Africa on the topic of “ChatGPT: The first year”. The second day of the conference will open with an address by Dr Isabel Tarling, MD, Limina, South Africa with the title “Developing Digital Standards for Learning and Teaching in South Africa’s Schools”. With an initial submission of 100 abstracts, after the double blind, peer review process there are 45 Academic research papers, 3 PhD research papers and 1 Masters Research paper published in these Conference Proceedings. These papers represent research from Belgium, Canada, Chile, Czech Republic, France, Germany, Ghana, Greece, Hong Kong, Ireland, Japan, Malaysia, Mozambique, Norway, Oman, Perú, Poland, Portugal, Romania, Singapore, South Africa, Sri Lanka, Sweden, Switzerland, Turkey and the United Kingdom.

\\section{Background} There are some scientific researches covering the topic of this research. In what follows, there are some discussion and literature reviews about them date back on January 22, 2023. **\\\\ First article is titled ``properties of SuperHyperGraph and neutrosophic SuperHyperGraph" in \\textbf{Ref.} \\cite{HG1} by Henry Garrett (2022). It's first step toward the research on neutrosophic SuperHyperGraphs. This research article is published on the journal ``Neutrosophic Sets and Systems" in issue 49 and the pages 531-561. In this research article, different types of notions like dominating, resolving, coloring, Eulerian(Hamiltonian) neutrosophic path, n-Eulerian(Hamiltonian) neutrosophic path, zero forcing number, zero forcing neutrosophic- number, independent number, independent neutrosophic-number, clique number, clique neutrosophic-number, matching number, matching neutrosophic-number, girth, neutrosophic girth, 1-zero-forcing number, 1-zero- forcing neutrosophic-number, failed 1-zero-forcing number, failed 1-zero-forcing neutrosophic-number, global- offensive alliance, t-offensive alliance, t-defensive alliance, t-powerful alliance, and global-powerful alliance are defined in SuperHyperGraph and neutrosophic SuperHyperGraph. Some Classes of SuperHyperGraph and Neutrosophic SuperHyperGraph are cases of research. Some results are applied in family of SuperHyperGraph and neutrosophic SuperHyperGraph. Thus this research article has concentrated on the vast notions and introducing the majority of notions. \\\\ The seminal paper and groundbreaking article is titled ``neutrosophic co-degree and neutrosophic degree alongside chromatic numbers in the setting of some classes related to neutrosophic hypergraphs" in \\textbf{Ref.} \\cite{HG2} by Henry Garrett (2022).
