Why the World Does Not Exist

Where do we come from? Are we merely a cluster of elementary particles in a gigantic world receptacle? And what does it all mean? In this highly original new book, the philosopher Markus Gabriel challenges our notion of what exists and what it means to exist. He questions the idea that there is a world that encompasses everything like a container life, the universe, and everything else. This all-inclusive being does not exist and cannot exist. For the world itself is not found in the world. And even when we think about the world, the world about which we think is obviously not identical with the world in which we think. For, as we are thinking about the world, this is only a very small event in the world. Besides this, there are still innumerable other objects and events: rain showers, toothaches and the World Cup. Drawing on the recent history of philosophy, Gabriel asserts that the world cannot exist at all, because it is not found in the world. Yet with the exception of the world, everything else exists; even unicorns on the far side of the moon wearing police uniforms. Revelling in witty thought experiments, word play, and the courage of provocation, Markus Gabriel demonstrates the necessity of a questioning mind and the role that humour can play in coming to terms with the abyss of human existence.

ADHD Does not Exist

In this groundbreaking and controversial book, behavioral neurologist Dr. Richard Saul draws on five decades of experience treating thousands of patients labeled with Attention Deficit and Hyperactivity Disorder—one of the fastest growing and widely diagnosed conditions today—to argue that ADHD is actually a cluster of symptoms stemming from over 20 other conditions and disorders. According to recent data from the Centers for Disease Control and Prevention, an estimated 6.4 million children between the ages of four and seventeen have been diagnosed with attention deficit hyperactivity disorder. While many skeptics believe that ADHD is a fabrication of drug companies and the medical establishment, the symptoms of attention-deficit and hyperactivity are all too real for millions of individuals who often cannot function without treatment. If ADHD does not exist, then what is causing these debilitating symptoms? Over the course of half a century, physician Richard Saul has worked with thousands of patients demonstrating symptoms of ADHD. Based on his experience, he offers a shocking conclusion: ADHD is not a condition on its own, but rather a symptom complex caused by over twenty separate conditions—from poor eyesight and giftedness to bipolar disorder and depression—each requiring its own specific treatment. Drawing on in-

depth scientific research and real-life stories from his numerous patients, ADHD Does not Exist synthesizes Dr. Saul's findings, and offers and clear advice for everyone seeking answers.

Laziness Does Not Exist

From social psychologist Dr. Devon Price, a conversational, stirring call to “a better, more human way to live” (Cal Newport, New York Times bestselling author) that examines the “laziness lie”—which falsely tells us we are not working or learning hard enough. Extra-curricular activities. Honors classes. 60-hour work weeks. Side hustles. Like many Americans, Dr. Devon Price believed that productivity was the best way to measure self-worth. Price was an overachiever from the start, graduating from both college and graduate school early, but that success came at a cost. After Price was diagnosed with a severe case of anemia and heart complications from overexertion, they were forced to examine the darker side of all this productivity. Laziness Does Not Exist explores the psychological underpinnings of the “laziness lie,” including its origins from the Puritans and how it has continued to proliferate as digital work tools have blurred the boundaries between work and life. Using in-depth research, Price explains that people today do far more work than nearly any other humans in history yet most of us often still feel we are not doing enough. Filled with practical and accessible advice for overcoming society’s pressure to do more, and featuring interviews with researchers, consultants, and experiences from real people drowning in too much work, Laziness Does Not Exist “is the book we all need right now” (Caroline Dooner, author of The F*ck It Diet).

Why Fish Don't Exist

Longlisted for the Women's Prize for Non-Fiction 2025: the profound and life-affirming memoir about finding our way in a chaotic world'A sumptuous, surprising, dark delight' Carmen Maria Machado 'Fast-moving, deftly balanced, full of surprises' Guardian's Book of the Day 'A bold and original blend of memoir and science' Elizabeth Buchanan If fish don't exist, what else do we have wrong? As a child, Lulu Miller's scientist father taught her that chaos will come for us all. There is no cosmic destiny, no plan. Enter David Starr Jordan, 19th-century taxonomist and believer in order. A fish specialist devoted to mapping out the great tree of life, who spent his days pinning down unruly fins, studying shimmering scales and sealing new discoveries into jars of ethanol. At a time when Lulu's life is unravelling, David Starr Jordan beckons. Reading about Jordan's sheer perseverance after an earthquake shattered his collection, Lulu stumbles upon an unexpected antidote to life's unpredictability. But lurking behind the lore of this mighty taxonomist lies a darker tale waiting to be told: one about the human cost of attempting to define the form of things unknown. This is a story unlike any other you've read before. It's about a very tall man with a walrus moustache, the injustices and unexpected deliverances of the universe, love that strikes like lightning and about why fish don't exist after all.

Race Does Not Exist

Our books address the notion that human suffering will always exist as long as superiority persists. We must recognize that we are selfless. Our human experience is without meaning or unworthy of analysis until we mindfully recognize what it means to be grateful for our well-being, to be happy, or until we question why we habitually inflict unhappiness on each other, where the seedbed of loathing, opprobrium, and odium resides. As you will find in our books, it is now well known that mindfulness can help you reap a cauldron of benefits, not to mention reach higher brain functioning, achieve loving-kindness toward others, as well as help with the management of emotional trauma, abuse, and addictive behavior. This clearly shows that like many snowmen, most of our ancestry can consist of ocean water, filtered water, carrots, coal, and, in some cases, even some toilet water. And the fact that we all descend from the same maternal lineage became evident when ancestry.com unleashed my ancestral DNA. The unraveling clearly showed that my pastoral ancestors lived somewhere in Senegal in the westernmost cape of Africa, which brings to mind the famous Senegalese soccer player, Sadio Mane, who has spent years helping improve the lives life for people in Senegal and achieve loving-kindness.

The Solar System As We Know It Does Not Exist

For many centuries we have been told that the earth is a Globe and that it rotates on its axis and itself is revolving around the sun. According to the astrophysicists, our sun is 93 million miles away from the earth, on the average. Our earth is one of many planets that revolve around the sun. Almost all of us have never questioned this information, we just run away with it as if it is a fact. In this book, the author has examined and analyzed this information, logically and scientifically and has concluded that it is not true. The author has given everyone a challenge to debunk his analyses and prove otherwise. All you must do is buy his book and follow the instruction on how to accept his challenge. You stand to gain \$ 50,000 if you win

The Christians' God Does Not Exist! Yes, He/She Does!

The Christians' God Does Not Exist! Yes, He/She Does! By: Proncell F. Johnson Jr. Carl Sagan, popular astronomer, cosmologist, astrophysicist, and astrobiologist wrote: "We are Star Stuff which has taken its destiny into its own hands." The scientific community basically agrees that everything is made of atoms. Proncell F. Johnson Jr. says that they are all wrong! Johnson shows that the material universe (along with us mortals) is one big illusion for all things are actually incorporeal/spiritual, the manifestation of the spiritual being we Christians have come to call God. He says that the realization of and utilization of this fact will enable one to duplicate for himself the "so-called" miracles of Christ Jesus in degrees, thus proving the existence of this God, and the non-existence of matter. Johnson's proof is based upon a law of physics that make it all but impossible to refute as the below reviews confirm.

101 Reasons Why God Does Not Exist

"Does God Exist?" – the age old question that has occupied humankind ever since the concept of God was conjured up. There are several atheist books currently on the shelves that tackle this question but this book differs by presenting 101 short and concise standalone arguments against God's existence. The Reasons make for thought provoking and compelling reading. An ideal book to dip into at random, "101 Reasons Why God Does Not Exist" is essential reading for negating the irrational and illogical dogma of religion. This book consists of 101 Reasons why BigG doesn't exist. These range from Reason 1. "All Knowledgeable" with intermediate reasons such as 18. "Live A Life Of Fear", 19. "Fondness For Beetles And Water", 92. "Fanatic Literalism" and concluding with Reason 101. "Doublethink".

God: The Failed Hypothesis

Throughout history, arguments for and against the existence of God have been largely confined to philosophy and theology, while science has sat on the sidelines. Despite the fact that science has revolutionized every aspect of human life and greatly clarified our understanding of the world, somehow the notion has arisen that it has nothing to say about the possibility of a supreme being, which much of humanity worships as the source of all reality. This book contends that, if God exists, some evidence for this existence should be detectable by scientific means, especially considering the central role that God is alleged to play in the operation of the universe and the lives of humans. Treating the traditional God concept, as conventionally presented in the Judeo-Christian and Islamic traditions, like any other scientific hypothesis, physicist Stenger examines all of the claims made for God's existence. He considers the latest Intelligent Design arguments as evidence of God's influence in biology. He looks at human behavior for evidence of immaterial souls and the possible effects of prayer. He discusses the findings of physics and astronomy in weighing the suggestions that the universe is the work of a creator and that humans are God's special creation. After evaluating all the

scientific evidence, Stenger concludes that beyond a reasonable doubt the universe and life appear exactly as we might expect if there were no God. This paperback edition of the New York Times bestselling hardcover edition contains a new foreword by Christopher Hitchens and a postscript by the author in which he responds to reviewers' criticisms of the original edition.

Fields of Sense

Markus Gabriel proposes a radical form of ontological pluralism that divorces ontology from metaphysics, understood as the most fundamental theory of absolutely everything (the world). He argues that the concept of existence is incompatible with the exist

God Is All There Is and the Devil Does Not Exist

God Is All There Is and The Devil Does Not Exist seeks to bring about awareness and remind us of Who We Really Are; for God is All There Is and there is No-thing else. There is only One-Consciousness that has individuated It-self and, thusly, there is no Devil in absolute form (as is taught and projected by many). All That Is, existed in a state of being, without the means to express Its being; in a state of being, God is No-thing unto Himself. Out of this conceptual knowing, God/All That Is longed to express, explore and experience It-self for what It knows It-self to be. And so the No-Thing created Some-Thing/Some-Form (all of creation), as a means or device(s), through which It can express, explore and experience It-self fully and abundantly. We live in a world driven by fear, scarcity, competition, chaos, pain, struggle, confusion and discord. It is my firm conviction that all these factors have been born and taken root because we have forgotten, Who We Really Are. God Is All There Is and The Devil Does Not Exist is directed to all the men and women around the globe, who are entangled in shackles of fear, constructed by mythical beliefs and teachings about God and the mock Devil, which have been served to us for eons. The message I bring seeks to liberate and unchain us from these restraints. \"So that we can live freely and express, explore and experience That Which Is within more fully and abundantly.\"

A Normal Relationship Does Not Exist

Dealing with love as a young minority is tough and we just have to wrap our minds around the fact that normal sometimes does not exist for us. I just want a normal relationship. I hear this way too often from females around my age group. So I ask; what is a normal relationship? For me, the word normal coincides with the word standard and I don't think there are any standards to any relationship. All relationships have their problems, big or small.

Presocratics-Arg Philosophers

The purpose of this series is to provide a contemporary assessment and history of the entire course of philosophical thought. Each book constitutes a detailed, critical introduction to the work of a philosopher of major influence and significance.

A Cosmological Reformulation of Anselm's Proof That God Exists

In this book, Richard Campbell reformulates Anselm's proof to show that factual evidence confirmed by modern cosmology validly implies that God exists. Anselm's proof, which was never the "ontological argument" attributed to him, emerges as engaging with current philosophical issues concerning existence and scientific explanation. Because every observable thing has a beginning, it can be deduced that there is always in reality something than which a greater cannot be thought, which exists necessarily. It follows that its non-existence is inconceivable. Anselm then proves that this is the God in whom he believes, who alone so truly exists that He could not be thought not to exist. The contingent nature of the universe is therefore a consequence of the proven belief that God is the Creator of everything else.

Proslogion II [i.e. Two] and III [i.e. Three].

This volume offers a complete translation of the Samyutta Nikaya, The Connected Discourses of the Buddha, the third of the four great collections in the Sutta Pitaka of the Pali Canon. The Samyutta Nikaya consists of fifty-six chapters, each governed by a unifying theme that binds together the Buddha's suttas or discourses. The chapters are organized into five major parts. The first, The Book with Verses, is a compilation of suttas composed largely in verse. This book ranks as one of the most inspiring compilations in the Buddhist canon, showing the Buddha in his full grandeur as the peerless "teacher of gods and humans." The other four books deal in depth with the philosophical principles and meditative structures of early Buddhism. They combine into orderly chapters all the important short discourses of the Buddha on such major topics as dependent origination, the five aggregates, the six sense bases, the seven factors of enlightenment, the Noble Eightfold Path, and the Four Noble Truths. Among the four large Nikayas belonging to the Pali Canon, the Samyutta Nikaya serves as the repository for the many shorter suttas of the Buddha where he discloses his radical insights into the nature of reality and his unique path to spiritual emancipation. This collection, it seems, was directed mainly at those disciples who were capable of grasping the deepest dimensions of wisdom and of clarifying them for others, and also provided guidance to meditators intent on consummating their efforts with the direct realization of the ultimate truth. The present work begins with an insightful general introduction to the Samyutta Nikaya as a whole. Each of the five parts is also provided with its own introduction, intended to guide the reader through this vast, ocean-like collection of suttas. To further assist the reader, the translator has provided an extensive body of notes clarifying various problems concerning both the language and the mean

The Connected Discourses of the Buddha

Atheism: The Basics is a concise and engaging introduction to belief in the non-existence of deities. Atheism has long fascinated people but debate around this controversial position may seem daunting. In this lively and lucid book, Graham Oppy addresses the following important questions: • What does it mean to be an atheist? • What is the difference between atheism, agnosticism, theism and innocence? • How has atheism been distributed over time and place? • What does science tell us about atheism? • Are there good reasons to be an atheist? • Are there good reasons not to be an atheist? • What do we mean by 'new atheism'? With a glossary of key terms and suggestions for further reading throughout, the book considers key philosophical arguments around atheism, making this an ideal starting point for anyone seeking a full introduction to the arguments between those who hold atheistic beliefs and those who do not.

Atheism: The Basics

The Presocratics were the founding fathers of the Western philosophical tradition, and the first masters of rational thought. This volume provides a comprehensive and precise exposition of their arguments, and offers a rigorous assessment of their contribution to philosophical thought.

The present work offers a complete translation of the Aguttara Nikaya, the fourth major collection in the Sutta Piṭaka, or Basket of Discourses, belonging to the Pali Canon

The Numerical Discourses of the Buddha

A former abbot of one of the largest Tibetan Buddhist monasteries in the world, Khensur Jampa Tegchok has been teaching Westerners about Buddhism since the 1970s. With a deep respect for the intellectual capacity of his students, Khensur Tegchok here unpacks with great erudition Buddhism's animating philosophical principle - the emptiness of all appearances. Engagingly edited by bestselling author Thubten Chodron, emptiness is here approached from a host of angles far beyond most treatments of the subject, while never sacrificing its conversational approach.

Insight into Emptiness

Ranging from his early treatises, the Monologion (a work written to show his monks how to meditate on the divine essence) and the Proslogion (best known for its advancement of the so-called ontological argument for the existence of God), to his three philosophical dialogues on metaphysical topics such as the relationship between freedom and sin, and late treatises on the Incarnation and salvation, this collection of Anselm's essential writings will be a boon to students of the history of philosophy and theology as well as to anyone interested in examining what Anselm calls "the reason of faith."

In Search of a Theory of Everything is on a quest for the theory that will ultimately explain all the phenomena of nature via a single immutable overarching law.

In Search of a Theory of Everything

The Washington Post Notable Non-Fiction of 2013 “I can imagine few more enjoyable ways of thinking than to read this book.”—Sarah Bakewell, New York Times Book Review, front-page review Tackling the “darkest question in all of philosophy” with “raffish erudition” (Dwight Garner, New York Times), author Jim Holt explores the greatest metaphysical mystery of all: why is there something rather than nothing? This runaway bestseller, which has captured the imagination of critics and the public alike, traces our latest efforts to grasp the origins of the universe. Holt adopts the role of cosmological detective, traveling the globe to interview a host of celebrated scientists, philosophers, and writers, “testing the contentions of one against the theories of the other” (Jeremy Bernstein, Wall Street Journal). As he interrogates his list of ontological culprits, the brilliant yet slyly humorous Holt contends that we might have been too narrow in limiting our suspects to God versus the Big Bang. This “deft and consuming” (David Ulin, Los Angeles Times) narrative humanizes the profound questions of meaning and existence it confronts.

From an engineer and futurist, an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer, more abundant future. The science fiction of the 1960s promised us a future remade by technological innovation. We’d vacation in geodesic domes on Mars, have meaningful conversations with computers, and drop our children off at school in flying cars. Fast-forward 60 years, and we’re still stuck in traffic in gas-guzzling sedans and boarding the same types of planes we flew in over half a century ago. What happened to the future we were promised? In *Where Is My Flying Car?*, J. Storrs Hall sets out to answer this deceptively simple question. What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific, technological, and social roots of the economic stagnation that started in the 1970s. From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture hostile to progress, Hall recounts how our collective ambitions for the future were derailed, with devastating consequences for global wealth creation and distribution. He then outlines a framework for a future powered by exponential progress—one in which we build as much in the world of atoms as we do in the world of bits, one rich in abundance and wonder. Drawing on years of original research and personal engineering experience, *Where Is My Flying Car?*, originally published in 2018, is an urgent, timely analysis of technological progress over the last 50 years and a bold vision for a better future.

This “rich and rewarding work” explores the connections between ancient Buddhist doctrine and contemporary philosophy (Publishers Weekly). Tiantai Buddhism emerged in sixth century China from an idiosyncratic and innovative interpretation of the Lotus Sutra. It went on to become one of the most complete, systematic, and influential schools of philosophical thought developed in East Asia. In *Emptiness and Omnipresence*, Brook A. Ziporyn puts Tiantai into dialogue with modern philosophical concerns to draw out its implications for ethics, epistemology, and metaphysics. Ziporyn explains Tiantai’s unlikely roots, its positions of extreme affirmation and rejection, its religious skepticism and embrace of religious myth, and its view of human consciousness. Ziporyn reveals the profound insights of Tiantai Buddhism while stimulating philosophical reflection on its unexpected effects.

Where Is My Flying Car?

These are exciting times for philosophical theorizing about propositions, with the last 15 years seeing the development of new approaches and the emergence of new theorists. Propositions have been invoked to explain thought and cognition, the nature and attribution of mental states, language and communication, and in philosophical treatments of truth, necessity and possibility. According to Frege and Russell, and their followers, propositions are structured mind- and language-independent abstract objects which have essential and intrinsic truth-conditions. Some recent theorizing doubts whether propositions really exist and, if they do, asks how we can grasp, entertain and know them? But most of the doubt concerns whether the abstract approach to propositions can really explain them. Are propositions really structured, and if so where does their structure come from? How does this structure form a unity, and does it need to? Are the representational and structural properties of propositions really independent of those of thinking and language? What does it mean to say that an object occurs in or is a constituent of a proposition? The volume takes up these and other questions, both as they apply to the abstract object approach and also to the more recently developed approaches. While the volume as a whole does not definitively and unequivocally reject the abstract objection approach, for the most part, the papers explore new critical and constructive directions. This book was originally published as a special issue of the Canadian Journal of Philosophy.

As Linux® on System z® becomes more prevalent and mainstream in the industry, the need for it to deliver higher levels of availability is increasing. IBM® supports the High Availability Linux (Linux-HA) project, which provides high availability functions to the open source community. One component of the Linux-HA project is the Heartbeat program, which runs on every known Linux platform. Heartbeat is part of the framework of the Linux-HA project. This IBM Redbooks® publication provides information to help you evaluate and implement Linux-HA release 2 by using Heartbeat 2.0 on the IBM System z platform with either SUSE® Linux Enterprise Server version 10 or Red Hat® Enterprise Linux® 5. To begin, we review the fundamentals of high availability concepts and terminology. Then we discuss the Heartbeat 2.0 architecture and its components. We examine some of the special considerations when using Heartbeat 2.0 on Linux on System z, particularly Linux on z/VM®, with logical partitions (LPARs), interguest communication by using HiperSockets™, and Shoot The Other Node In The Head (STONITH) by using VSMSSERVE for Simple Network IPL (snIPL). By reading this book, you can examine our environment as we outline our installation and setup processes and configuration. We demonstrate an active and passive single resource scenario and a quorum scenario by using a single resource with three guests in the cluster. Finally, we demonstrate and describe sample usage scenarios.

Emptiness and Omnipresence

Is the world an illusion? Is our Universe a hologram? This is a magical world. “All there Is” is you; you are the magnificent reflection of “All That Is” in the world of Existence and three dimensions. Let us wake up from this illusion. We have to realize we will leave this body one day; we have to realize all of our possessions will be left behind as we depart for our next new adventure. This is not a book of divine informative revelation. These words do not come from heaven. These writings (knowledge) arose in the Heart through Universal Intuition and were written from Oneself to oneself without the interference of the author’s personal thoughts (ego). What you call ‘I’ is your identity. Bonding yourself with your identity creates the ‘I am’ ego personality. This identity of yours is not actually you, it is an illusory state of what you are not. In Reality, you are not your ego-identity. The external world and its social parameters play a big role in forming this ego-identity. You do not own anything, no name, no form or any image that you can call ‘I’. You have not constructed or created these. You do not own anything you think you can control or possess. When you identify yourself with these things, the things that you are not (or do not own), you are creating a self-imposed prison for yourself and living inside of it. In other words, you create your ‘ego-personality. In this case, we have to ask the following question - who am I Really? Are you really all that you claim to own,

names, forms and images? Are you only made up of body and mind? When you identify with these beliefs and those of the collective world consciousness you get lost and break away from your true Reality. When you claim ownership of these names, forms and images, you create your 'ego-personality. Whenever you say 'I am' this or that, you are identifying with that thing which you now claim as your own and you unify yourself with that thing. If you do not identify with anything, if you do not claim ownership of anything, the 'I' ceases to exist. Removing the 'I', dissolving it, is the ultimate freedom we seek. The walls of the self-imposed prison of ego personality you possessively created will fall away. Here, in this liberated state of being, the necessity for choice or decision falls away too. You act just as is needed in each moment of life as it arises in the Now. Thoughts of "should I have done this or that?" will disappear. The mind is like software running on a computer. The "virus" that corrupts the software is the ego. It is this ego-personality that creates erroneous beliefs and then claims ownership of them. Only when this virus is removed by an antivirus program, Mind reveals itself in its full capacity. With this cleaning up process, human minds become increasingly liberated and expansively intelligent. In this Book, knowledge of advanced life is being released into the public publishing domain for the first time. This life can be described with concepts of "Absolute Human", "Birth of Absolute Humanity", "Experiencing Non-Existence" and "Beyond Non-Existence". We believe through our life experience that the only way to change our individual and collective point of view is to know NON-EXISTENCE. The will behind the writing and publishing of this knowledge in the Book arose in servitude.

New Essays on the Nature of Propositions

The relationship between thought, language, and the world is an intimate one. When we have an idea or thought about the world and we wish to express that idea or thought to others we utter a sentence or make a statement. If the statement correctly describes the world then it is true. Moreover, it seems as though our ability to have more complex or sophisticated thoughts about the world increases as the complexity of our language or our ability to use the language increases. Understanding the complex relationship between language, thought, and the world is one of the central aims of philosophy. This book is an attempt to increase our understanding of this complex relationship by focusing on certain philosophical issues that arise from our ability to refer to objects in the world through the use of language. In particular, it is an attempt to solve the puzzles of reference and belief that Frege and Russell presented within the context of a theory of direct reference for proper names.

Achieving High Availability on Linux for System z with Linux-HA Release 2

Straight from the Heart brings together an inspiring collection of Buddhist teachings, songs of realization, meditation instructions, and enlightened poetry—all chosen for their power to speak directly to the student. Drawn from Indian Mahayana and Vajrayana Buddhism as well as from all four schools of Tibetan Buddhism, some will impress with their beautiful poetry and powerful imagery, others with their profound power of instruction. Still others share personal advice for life that seems to come directly from the mouth of the author, and some serve as immediate and profound practice instructions. Several are just delightfully unconventional, even outrageous, letting in fresh air on petrified views or musty traditions. Most of them are simply unknown precious gems, which deserve a wider audience. Each of the works is preceded by a brief introduction and a short biography of its author. Many of these are legendary accounts of supernatural feats, edifying examples for students on the same spiritual path meant to expand their limited outlook with "mind-blowing" stories. Miraculous deeds, magnificent songs, and pithy instructions distinguish this collection assembled by the Buddhist scholar and translator Karl Brunnhölzl, whose years of work among dharma texts and his skill as a translator yield a rich mine of teachings all chosen for their ability to speak directly to the heart.
