Walker Evans is widely recognized as one of the greatest American photographers of the twentieth century, and the J. Paul Getty Museum owns one of the most comprehensive collections of his work, including more of his vintage prints than any other museum in the world. This lavishly illustrated volume brings together for the first time all of the Museum's Walker Evans holdings. Included here are familiar images—such as Evans's photographs of tenant farmers and their families, made in the 1930s and later published in *Let Us Now Praise Famous Men*—and images that are much less familiar—such as the photographs Evans made in the 1940s of the winter quarters of the Ringling Brothers circus, or his very late Polaroids, made in the 1970s. In addition, many previously unpublished Evans photographs, and variant croppings of classic images, appear here for the first time. Author Judith Keller has written a lively, informative text that places these photographs in the larger context of Evans's life and career and the culture—especially the popular culture—of the time. In so doing, she has produced an indispensable volume for anyone interested in the history of photography or American culture in the twentieth century. Also included is the most comprehensive bibliography on Walker Evans published to date.

What can early Jewish courtroom narratives tell us about the capacity and limits of human justice? By exploring how judges and the act of judging are depicted in these narratives, *Trial Stories in Jewish Antiquity: Counternarratives of Justice* challenges the prevailing notion, both then and now, of the ideal impartial judge. As a work of intellectual history, the book also contributes to contemporary debates about

the role of legal decision-making in shaping a just society. Chaya T. Halberstam shows that instead of modelling a system in which lofty, inaccessible judges follow objective and rational rules, ancient Jewish trial narratives depict a legal practice dependent upon the individual judge's personal relationships, reactive emotions, and impulse to care. Drawing from affect theory and feminist legal thought, Halberstam offers original readings of some of the most famous trials in ancient Jewish writings alongside minor case stories in Josephus and rabbinic literature. She shows both the consistency of a counter-tradition that sees legal practice as contingent upon relationship and emotion, and the specific ways in which that perspective was manifest in changing times and contexts.

The Code of Federal Regulations of the United States of America

"The transformation of politics in Latin America, the consolidation of a democratic consensus in the Anglophone Caribbean, and the able performance of many democratic governments in fashioning economic policies made this book intellectually possible. Most of Latin America's democratic governments have carried economic reforms more effectively than their authoritarian predecessors and have remained stunningly resilient despite many problems. The naysayers have not been proven right. Indeed, even if democratic governments were to be overthrown tomorrow, the history of democratic politics in the 1980s and 1990s is already noteworthy." -- from the Introduction In Democratic Politics in Latin America and the Caribbean, Jorge Domnguez focuses on the successful accomplishments of democratic politics in the region -- a process that nations in Eastern Europe, Asia, and Africa seek to emulate. Domnguez considers the role of British colonial rule and United States policies. But he also examines the development of parties, other civil institutions, and competitive markets, which lend permanence to democracy. He also discusses the prospects for democracy in Cuba and Mexico. Despite recurrent problems, Domnguez concludes, the outlook is good for stable democracies in Latin America and the Caribbean.

Essays in diatonic set theory, transformation theory, and neo-Riemannian theory -- the newest and most exciting fields in music theory today. The essays in Music Theory and Mathematics: Chords, Collections, and Transformations define the state of mathematically oriented music theory at the beginning of the twenty-first century. The volume includes essays in diatonic set theory, transformation theory, and neo-Riemannian theory -- the newest and most exciting fields in music theory today. The essays constitute a close-knit body of work -- a family in the sense of tracing their descent from a few key breakthroughs by John Clough, David Lewin, and Richard Cohn in the 1980s and 1990s. They are integrated by the ongoing dialogue they conduct with one another. The editors are Jack Douthett, a mathematician and music theorist who collaborated extensively with Clough; Martha M. Hyde, a distinguished scholar of twentieth-century music; and Charles J. Smith, a specialist in tonal theory. The contributors are all prominent scholars, teaching at institutions such as Harvard, Yale, Indiana University, and the University at Buffalo. Six of them (Clampitt, Clough, Cohn, Douthett, Hook, and Smith) have received the Society for Music Theory's prestigious Publication Award, and one (Hyde) has received the ASCAP Deems Taylor Award. The collection includes the last paper written by Clough before his death, as well as the last paper written by David Lewin, an important music theorist also recently deceased. Contributors: David Clampitt, John Clough, Richard Cohn, Jack Douthett, Nora Engebretsen, Julian Hook, Martha Hyde, Timothy Johnson, Jon Kochavi, David Lewin, Charles J. Smith, and Stephen Soderberg.

Facing America: Iconography and the Civil War investigates and explains the changing face of America during the Civil War. To conjure a face for the nation, author Shirley Samuels also explores the body of the nation imagined both physically and metaphorically, arguing that the Civil War marks a dramatic shift from identifying the American nation as feminine to identifying it as masculine. Expressions of such a change appear in the allegorical configurations of nineteenth-century American novels, poetry, cartoons, and political rhetoric. Because of the visibility of war's assaults on the male body, masculine vulnerability became such a dominant facet of national life that it practically obliterated the visibility of other vulnerable bodies. The simultaneous advent of photography and the Civil War in the nineteenth century may be as influential as the conjoined rise of the novel and the middle class in the eighteenth century. Both advents herald a changed understanding of how a transformative media can promote new cultural and national identities. Bodies immobilized because of war's practices of wounding and death are also bodies made static for the camera's gaze. The look of shock on the faces of soldiers photographed in order to display their wounds emphasizes the new technology of war literally embodied in the impact of new imploding bullets on vulnerable flesh. Such images mark both the context for and a counterpoint to the "look" of Walt Whitman as he bends over soldiers in their hospital beds. They also provide a way to interpret the languishing male heroes of novels such as August Evans's *Macaria* (1864), a southern elegy for the sundering of the nation. This book crucially shows how visual iconography affects the shift in postbellum gendered and racialized identifications of the nation.

Trial Stories in Jewish Antiquity

It is commonplace that warfare was integral to the European expansion, pitting the superiorities of the European against the inferiorities of the 'native'. The aim of this book is to look deeper, and to examine the technological, political and economic structures and capacities of the competing forces that shaped their ability to wage war, and the impact that colonial wars had on European and non-European states and societies alike. Questions of the extent to which one side could adapt its military institutions, tactics and technology to those of its opponents figure prominently. This was far from an inevitable one-way process, and environment and disease remained vital factors. The studies also situate these conflicts within the broader debate concerning the so-called military revolution, and show that our ideas of this need to be reconsidered in the light of what was happening outside Europe.
