

# Chance Compare Hypotheses

## Hypothesis (redirect from Hypotheses)

reject several hypotheses before solving the problem. According to Schick and Vaughn, researchers weighing up alternative hypotheses may take into consideration:...

## Occam's razor

razor advocates that when presented with competing hypotheses about the same prediction and both hypotheses have equal explanatory power, one should prefer...

## Testing hypotheses suggested by the data

In statistics, hypotheses suggested by a given dataset, when tested with the same dataset that suggested them, are likely to be accepted even when they...

## Null hypothesis (redirect from Null hypotheses)

samples; all have null hypotheses. There are also at least four goals of null hypotheses for significance tests: Technical null hypotheses are used to verify...

## Data dredging

significant at the 1% significance level, and so on, by chance alone. When enough hypotheses are tested, it is virtually certain that some will be reported...

## Alternative hypothesis (redirect from Alternative hypotheses)

Hypotheses are formulated to compare in a statistical hypothesis test. In the domain of inferential statistics, two rival hypotheses can be compared by...

## Statistical hypothesis test (redirect from Testing statistical hypotheses)

simple hypotheses, this is the test's probability of incorrectly rejecting the null hypothesis. The false positive rate. For composite hypotheses this is...

## Sudden unexplained death in childhood (section Hypotheses)

febrile seizure hypotheses SUDC is rare, with a reported incidence in the United States of 1.2 deaths per 100,000 children, compared to 54 deaths per...

## Misuse of p-values (section Representing probabilities of hypotheses)

likelihood of hypotheses. The p-value does not in itself allow reasoning about the probabilities of hypotheses, which requires multiple hypotheses or a range...

## Plaque hypotheses

Plaque hypotheses are theories to explain the role of plaque bacteria in dental caries and in periodontal disease. They rely heavily on the postulates...

## **Analysis of variance**

statistical methods used to compare the means of two or more groups by analyzing variance. Specifically, ANOVA compares the amount of variation between...

## **Power (statistics)**

as this where several hypotheses are under consideration, it is common that the powers associated with the different hypotheses differ. For instance,...

## **P-value**

the hypotheses of interest about its distribution, different null hypothesis tests have been developed. Some such tests are the z-test for hypotheses concerning...

## **68–95–99.7 rule**

probability not just to the hypothesis itself but to all possible alternative hypotheses. For this reason, statistical hypothesis testing works not so much by...

## **Carbonado (section Hypotheses for origin)**

scarce.&quot; The origin of carbonado is controversial, and some proposed hypotheses are as follows: Direct conversion of organic carbon under high-pressure...

## **Technological singularity (redirect from Singularity Hypotheses)**

intelligence (specifically seed AI) is the most popular option among the hypotheses that would advance the singularity.[citation needed] The possibility of...

## **Fine-tuned universe (category Astronomical hypotheses)**

possible categories of hypotheses concerning fine-tuning and order: (i) chance, (ii) regularity, (iii) combinations of regularity and chance, (iv) uncaused,...

## **Marcan priority (category Hypotheses)**

agreements. Different answers to this question give rise to different synoptic hypotheses. The most widely accepted hypothesis is the two-source hypothesis, that...

## **Nominative determinism (category Hypotheses)**

technology (with references that check out, please) together with any hypotheses you may have on how it comes about. The editors of Feedback, John Hoyland...

## **Research design**

research tests a priori hypotheses — outcome predictions that are made before the measurement phase begins. Such a priori hypotheses are usually derived from...
