The Five Percent

One in every twenty difficult conflicts ends up grinding to a halt. That's fully 5 percent of not just the diplomatic and political clashes we read about in the newspaper, but disputations and arguments from our everyday lives as well. Once we get pulled into these self-perpetuating conflicts it is nearly impossible to escape. The 5 percent rule us. So what can we do when we find ourselves ensnared? According to Dr. Peter T. Coleman, the solution is in seeing our conflict anew. Applying lessons from complexity theory to examples from both American domestic politics and international diplomacy -- from abortion debates to the enmity between Israelis and Palestinians -- Coleman provides innovative new strategies for dealing with intractable disputes. A timely, paradigm-shifting look at conflict, *The Five Percent* is an invaluable guide to preventing even the most fractious negotiations from foundering.

Subtracting Fractions

Logan Vanderveer has a joke he's been telling since college: he's ninety-five percent straight. He did some experimenting in school, but none of the men he fooled around with inspired him to abandon \"the plan\" meet a nice girl, get married, and settle down, just like his parents always said. None of them except Ellis Floyd, who aroused desires and feelings that scared Logan. So much so that he abandoned their burgeoning relationship just as it might have become something. But four years later, Ellis is back, and Logan finds himself questioning his sexuality in a big way. Ellis doesn't fit into Logan's plan. He's happy being a starving artist, whereas Logan has sold his soul to corporate America. Ellis is ripped jeans, and Logan is tailored suits. And, most notably, Ellis is out. But seeing him again is dredging up memories--like how it feels to kiss Ellis, and that time they almost went all the way. With chemistry like theirs, Logan isn't sure he can--or should--keep ignoring the other five percent.

When Calouste Gulbenkian died in 1955 at the age of 86, he was the richest man in the world, known as 'Mr Five Per Cent' for his personal share of Middle East oil. The son of a wealthy Armenian merchant in Istanbul, for half a century he brokered top-level oil deals, concealing his mysterious web of business interests and contacts within a labyrinth of Asian and European cartels, and convincing governments and oil barons alike of his impartiality as an 'honest broker'. Today his name is known principally through the Gulbenkian Foundation in Lisbon, to which his spectacular art collection and most of his vast wealth were bequeathed. Gulbenkian's private life was as labyrinthine as his business dealings. He insisted on the highest 'moral values', yet ruthlessly used his wife's charm as a hostess to further his career, and demanded complete obedience from his family, whom he monitored obsessively. As a young man he lived a champagne lifestyle, escorting actresses and showgirls, and in later life - on doctor's orders - he slept with a succession of discreetly provided young women. Meanwhile he built up a superb art collection which included Rembrandts and other treasures sold to him by Stalin from the Hermitage Museum. Published to mark the 150th

anniversary of his birth, Mr Five Per Cent reveals Gulbenkian's complex and many-sided existence. Written with full access to the Gulbenkian Foundation's archives, this is the fascinating story of the man who more than anyone else helped shape the modern oil industry.
