Since the discovery of X-ray diffraction in 1913 over 100 000 different inorganic substances (also called compounds or phases) have been structurally characterized. The aim of this reference work is to provide the researcher with a comprehensive compilation of all up to now crystallographically identified inorganic substances in only one volume. All data have been processed and critically evaluated by the \"Pauling File\" editorial team using a unique software package. Each substance is represented in a single row containing information adapted to the number of chemical elements.

This eagerly awaited new edition has been significantly revised after extensive user feedback to meet current

teaching requirements. The first major textbook to be published since the rejuvenation of the Lisbon Treaty, it retains the best elements of the first edition – the engaging, easily understandable writing style, extracts from a variety of sources showing the creation, interpretation and application of the law and comprehensive coverage. In addition it has separate chapters on EU law in national courts, governance and external relations reflecting the new directions in which the field is moving. The examination of the free movement of goods and competition law has been restructured. Chapter introductions clearly set out what will be covered in each section allowing students to approach complex material with confidence and detailed further reading sections encourage further study. Put simply, it is required reading for all serious students of EU law.

A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

## **Investigation of Illegal Or Improper Activities in Connection with 1996 Federal Election Campaigns**

This book is designed to complement the author's A New Land Law, integrating with that work in its simplified terminology, and emphasising a three-fold functional classification of leases – short residential tenancies, long residential leases and commercial leases. Rented housing is treated as a unified whole, with particular prominence being given to shorthold arrangements. The book includes reference to the changes to the allocation and homelessness regimes proposed by Part II of the Homes Bill 2000. It also considers the impact of the Human Rights Act 1998, the changes to repossession procedures implemented by the Woolf Reforms, and the year 2000 bumper crop of decisions on housing law. Leasehold tenure is undergoing dramatic changes. The book draws a functional distinction between long residential leases and rental

arrangements, based on the registrability of long leases, their freedom from rent controls and security of tenure, special controls of management and forfeiture, and enfranchisement rights. Extensive coverage is given to the Commonhold and Leasehold Reform Bill 2000, introduced into the House of Lords in December 2000, and promising improvements in the enfranchisement schemes, additional management controls, and a commonhold scheme. Topics on commercial leases (business and agricultural) given special attention include the reasonable recipient principle for the construction of notices, a decision on the effect on a sub-tenant of an upwards notice to quit by his head tenant, and Law Commission proposals on the Termination of Tenancies (1999).
