What does running for 10 minutes daily do to your body?

Let's take a look at how it changes your body composition and your overall physical system, and what changes the body undergoes during an average run.

How Running Changes Your Body

Running is a great sport to get in shape, burn some steam, and build muscles.

Understanding what your body goes through will help you become a stronger runner.

That surge of adrenaline is the ATP converting to another powerful molecule, adenosine diphosphate (ADP).

If you're a new runner, this is where it may become tricky to maintain your running pace.
