I Can't Remember the Title But the Cover is Blue

As any retail or service worker will tell you, customers can be irrational, demanding, abusive, and brain-scramblingly, mind-bendingly strange. They can also be kind, thoughtful, funny, and full of pathos. Something about the often-fraught interaction between customer and worker - with the dividing line of the counter between them, and the commercial imperative, with its curious etiquette and toleration of all kinds of suspect behaviour brooding above - dims down certain inhibitions, and has a kind of hot-house effect on eccentricity. In *I Can't Remember the Title But the Cover is Blue*, veteran bookseller Elias Greig collects the best, worst and most interesting customer encounters from his years as a Sydney bookseller. From ill-behaved children to nostalgia seniors and everything in between, this hilarious and unpredictable book is the perfect gift for anyone who's ever been on the wrong side of a store counter.

Oregon Blue Book

The ultimate guide to Project Blue Book by one of the lead astronomers for the US Air Force program to investigate UFO sightings—and featured in History Channel's Project Blue Book. Originally released in 1977, this new edition by the world's foremost authority on UFOs distills 12,000 sightings and 140,000 pages of Project Blue Book evidence into a coherent explanation. Whether you believe in little green men or an official government cover-up policy, The Hynek UFO Report is required reading. Have UFOs really been reported by every nation across the globe? Can all the eyewitness reports simply be fantasy? Are we victims of mass hallucination or just plain lies? Have close encounters actually occurred? Is the government concealing deep secrets at a hidden location? The Hynek UFO Report is rational, logical, and realistic. It is for anyone interested in UFOs, the possibility of extraterrestrial life, and the role of the US government in hiding the truth from the public.

How do you find a book when you can't recall the title...or the author? This homage to a common reader's

dilemma is a gift the booklover in your life won't soon forget. Readers know all too well the comedy and tragedy of forgetting the name of a must-find book. Inspired by this torturous predicament, artist Marina Luz creates paintings of books based on the descriptions we use when we can't remember their titles—mining Internet book-search forums for the quirky, vague, and often hilarious language we come up with in these moments. This volume collects dozens of these imaginary books into a library all their own: Titles like "Cat, Possibly Named Henry," "It Was All a Dream," or "Something-Something, Beverly Hills" inspire dreaming up their contents, often as entertaining as trying to guess the real book behind them. A celebration of book love unlike any other, this petite book is a clever gift for bibliophiles that will spark knowing smiles. **PERFECT GIFT FOR BOOKLOVERS:** The collection will spark recognition for everyone who has encountered this phenomenon (so, virtually every reader) and especially those who have worked in a bookstore, who know intimately well how often this dilemma arises. This impulse-priced delight is an excellent way to make book-loving friends feel seen. **A UNIQUE APPRECIATION OF BOOK LOVE:** This is a loving tribute to the wonderful and bizarre ways that books leave impressions on our souls, if not always perfectly in our memories. It's a fun and fresh appreciation of bibliophilia that still delivers long after the first read. Perfect for: • Bibliophiles • Booksellers • People seeking gifts for the booklovers in their life

5 Year Diary

In the mid 3rd century BC, King Ptolemy II Philadelphus of Egypt ordered a translation of the ancient Hebrew scriptures for the Library of Alexandria, which resulted in the creation of the Septuagint. The original version, published circa 250 BC, only included the Torah, or in Greek terms, the Pentateuch. The Torah is the five books traditionally credited to Moses, circa 1500 BC: Cosmic Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. The first edition was followed by the second, around 225 BC which added the books of Joshua, Judges, and Ruth, which was later known as the Octateuch. This version of the Septuagint was later carried south into the Kingdom of Kush by the Jews fleeing Egypt in 200 BC when Judea was in revolt and the Ptolemys attempted to exterminate the Jews in Egypt. The Octateuch later became the Torah of the Beta Israel community in Sudan and Ethiopia known as the Orit. A number of stories exist to explain the origin of the Beta Israel community, the 'Ethiopian Jews' indigenous to Ethiopia, Eritrea, and Sudan. The recorded story of the origin of the Ethiopian Jews was reported by Eldad ha-Dani in the late 800s AD. Eldad ha-Dani was a dark-skinned Jew from a country south of Kush, modern northern Sudan, who was captured by pagan Ethiopians, and ultimately sold on the coast of what might be modern Kenya or Tanzania, to a Jew from the Parthian Empire, who took him back to modern Iran. He later traveled through the Middle East and the Mediterranean Sea. He claimed that he was from a country of Jews, south of Kush, who were the descendants of the tribes of Dan, Gad, Naphtali, and Asher, who had left Israel during the civil war that split the Kingdom into Judea and Samaria. Modern secular scholars doubt there was a united kingdom of Israel, however, if the civil war did happen, it would have happened in 922 BC when Jeroboam I and Rehoboam split the kingdom of Solomon. If true, this would make the Ethiopian Jews neither Jews, nor Samaritans, but a third branch of the Judeo-Samaritan religions, and arguably, older than the others. The Christian text *Kebrä Nagast* claims that Judaism entered into Ethiopia slightly earlier when the Ethiopian Queen of Sheba traveled to Israel and was impregnated by King Solomon. Her son Menelik I led a group of Jews to Ethiopia when he stole the Ark of the Covenant. Other than the Ethiopian Orthodox Christians, few consider the *Kebrä Nagast* historically valid. Some members of the Beta Israel community claim the Ethiopian Jews were originally members of the Jewish tribes led by Moses that chose not to enter into Canaan with Joshua, and instead traveled south and settled in the land of Moses' Ethiopian wife, mentioned in Numbers chapter 12. A third story of the origin of the Ethiopian Jews, took place shortly after the Greeks had taken control over Egypt and

Judea, when King Ptolemy I resettled Judeans in southern Nubia. This would have taken place between 305 and 282 BC, and later the Jews migrated south for various reasons. However they ended up in Ethiopia, they have traditionally used a variation of the Octateuch, which they call the Orit. The Octateuch is documented as being the version of the Septuagint that was published around 225 BC. Like the Ethiopian Christian Bible, the Orit appears to have had sections 'updated' from Hebrew and Arabic sources over the past two thousand years. Octateuch: The Original Orit is a 21st-century translation aimed at restoring the original Orit.

The Analytical-Literal Translation of the Old Testament (Septuagint): Volume I: The Torah (ALT) is a companion to the Analytical-Literal Translation of the New Testament. Both are translated by Gary F. Zeolla (www.Zeolla.org). The ALT: Old Testament is available in five volumes. Most Old Testaments are based on the Hebrew text. But this Old Testament (OT) is based on the Greek Septuagint (LXX). The LXX is a third century B.C. Greek translation of the Hebrew Bible. The name and abbreviation comes from the tradition that 70 (or 72) Jewish scholars worked on its translation, six from each of the 12 tribes of Israel. The importance of the LXX is that it was THE Bible of the early Church. The purpose of the ALT is to provide a translation of the Greek Septuagint that will enable the reader to come as close to the Greek text as possible without having to be proficient in Greek.

Prize-winner in three categories of the 2019 Wales Book of the Year Award, *The Blue Book of Nebo* paints a spellbinding and eerie picture of society's collapse, and the relationships that persist after everything as we know it disappears. After nuclear disaster, Rowenna and her young son are among the rare survivors in rural north-west Wales. Left alone in their isolated hillside cottage, after others have died or abandoned the towns and villages, they must learn new skills in order to remain alive. With no electricity or modern technology they must return to the old ways of living off the land, developing new personal resources. While they become more skilled and stronger, the relationship between mother and son changes in subtle ways, as Dylan must take on adult responsibilities, especially once his baby sister Mona arrives. Despite their close understanding, mother and son have their own secrets, which emerge as in turn they jot down their thoughts and memories in a found notebook. As each reflects on their old life and the events since the disaster which

has brought normal, twenty-first century life to an end, The Blue Book of Nebo becomes a collective confidante, representing the future of their people and a new history to live by. In this prize-winning and best-selling new novel, Manon Steffan Ros not only explores the human capacity to find new strengths when faced with the need to survive, but also the structures and norms of the contemporary world.

A surprisingly little-known marque today, Elcar once ranked among the finest vehicles on American roads. Built to exacting standards in Elkhart, Indiana, an Elcar could compete head-to-head on the basis of performance, quality, or price with the products of much larger manufacturers. Ultimately done in by weak distribution and the ravages of the Depression, Elcar today stands as an example of an ambitious company that transformed itself, successfully if temporarily, from a maker of buggies and harnesses into a respected car manufacturer in the early days of the automotive age. This remarkably exhaustive history, researched over several decades from all available sources, including interviews with former Elcar employees, details every Elcar model and the Pratt vehicles that preceded them, as well as the personalities behind the cars. Extensive appendices provide a complete model history, with specifications; a full corporate chronology; an illustrated accounting of all Elcars and Pratts known to survive whole or in part today; a roster of company employees; a descriptive list of all ads and brochures ever produced by the company; and a wealth of other data that can be found nowhere else. Lavishly illustrated and surpassingly thorough, this book is a well of information on a significant but forgotten line of automobiles.

This work examines the cognitive capacity of great apes in order to better understand early man and the importance of memory in the evolutionary process. It synthesizes research from comparative cognition, neuroscience, primatology as well as lithic archaeology, reviewing findings on the cognitive ability of great apes to recognize the physical properties of an object and then determine the most effective way in which to manipulate it as a tool to achieve a specific goal. The authors argue that apes (Hominoidea) lack the human cognitive ability of imagining how to blend reality, which requires drawing on memory in order to envisage alternative future situations, and thereby modifying behavior determined by procedural memory. This book reviews neuroscientific findings on short-term working memory, long-term procedural memory, prospective memory, and imaginative forward thinking in relation to manual behavior. Since the manipulation of objects by Hominoidea in the wild (particularly in order to obtain food) is regarded as underlying the evolution of behavior in early Hominids, contrasts are highlighted between the former and the latter, especially the cognitive implications of ancient stone-tool preparation.

By examining a broad range of visual forms, media and forms such as art, film, graphic novels, maps, media, and photography, the book advances current debates about visual culture. The book enriches contemporary theories of the visual taking the Arctic as a spatial entity and also as a mode of exploring contemporary and historical visual practices, including imaginary constructions of the North. Original contributions include case studies from all the countries along the Arctic shore, with Russian material occupying a large section due to the country's impact on the region
