## **Fair Play: Reese's Book Club**

AN INSTANT NEW YORK TIMES BESTSELLER • A REESE'S BOOK CLUB PICK Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh\*t I Do List. Tired of being the “shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. “Winning” this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

## **Redesigning America's Community Colleges**

In the United States, 1,200 community colleges enroll over ten million students each year—nearly half of the nation's undergraduates. Yet fewer than 40 percent of entrants complete an undergraduate degree within six years. This fact has put pressure on community colleges to improve academic outcomes for their students. Redesigning America's Community Colleges is a concise, evidence-based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions. It makes a compelling case that two-year colleges can substantially increase their rates of student success, if they are willing to rethink the ways in which they organize programs of study, support services, and instruction. Community colleges were originally designed to expand college enrollments at low cost, not to maximize completion of high-quality programs of study. The result was a cafeteria-style model in which students pick courses from a bewildering array of choices, with little guidance. The authors urge administrators and faculty to reject this traditional model in favor of “guided pathways”—clearer, more educationally coherent programs of study that simplify students' choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost. Distilling a wealth of

data amassed from the Community College Research Center (Teachers College, Columbia University), Redesigning America's Community Colleges offers a fundamental redesign of the way two-year colleges operate, stressing the integration of services and instruction into more clearly structured programs of study that support every student's goals.

## **What Are You Grouping For?, Grades 3-8**

Bring out daring readers with dynamic small groups! Like many educators in intermediate classrooms across the country, you may be using guided reading principles to teach reading. Whether you're following targeted reading levels or sticking with your school's established routines, chances are that guided reading has become synonymous with small group reading for you and your students. But . . . are your students getting the most out of small groups? Are readers of all ability levels experiencing the dynamic learning that can occur in small groups? Do you feel confident that the way you're grouping kids is based on their wants and needs? Intermediate grade readers don't need to be guided as much as they need to be engaged—and authors Julie Wright and Barry Hoonan have solutions for doing just that using small groups. *What Are You Grouping For?* offers the practical tools, classroom examples, and actionable steps essential for starting, sustaining, and mastering the management of small groups. This book explains the five teacher moves that work together to support students' reading independence through small group learning—kidwatching, pivoting, assessing, curating, and planning—and provides examples to guide you and your students toward success. From must-have beginning-of-the-year strategies to step-by-step advice for implementation, this guide breaks down the processes that support small groups and help create effective instructional reading programs. Based on more than 45 years of combined experience in the classroom, this resource will empower you with tools to ensure that your readers are doing the reading, thinking, and doing—not you.

Understanding leadership from a scriptural perspective is not a strong point in the American Christian community. This book is my attempt to put the experience of over twenty years of pastoring into written form for the benefit of others. Some lessons were learned through difficulties and mistakes. Some were learned by the teaching and example of others. I do believe that the pattern of congregational structure put forth in these pages is scriptural. It is a pattern that will work for large or small congregations. It has worked well in our congregations for many years. These are congregations planted especially to win the lost sheep of the house of Israel. If it can work in this context a field known for its difficulty it can probably work in most other contexts.

*Political Management* lays out the core tools to manage government, campaigns and parties. The first book to combine management concepts with politics and government, it provides core theories for what Political Planning, Political HR, Political Organising, Political Leadership and Political Reviewing involve, illustrated with high level political practitioner interviews, examples and political documents. The text presents the 4 Ds of Political Management - Deliberating, Designing, Doing and Dancing - to convey that Political Management is more of a dance than a march. Even presidents and prime ministers do not have enough formal authority to control the myriad of practitioners, players, processes and policies involved in 21st century governance. In this book, the author demonstrates why political practitioners in campaign teams, parties, government departments and political offices need political management tools to utilise the resources they have available and overcome multiple obstacles that practical politics presents. By offering a clear sense of what political management involves and providing the theoretical frameworks to be used in empirical research, this book will stimulate significant future study. It will be invaluable to practitioners, scholars and students in politics, government, policy, leadership, management, public administration, and political management.
