Why We Do what We Do

"Edward Deci, one of the country's outstanding social psychologists, writing with former New York Times science and health editor Richard Flaste, offers some bad news and some good news: Rewards and punishments do not make workers perform more effectively, or students learn better, or families function more smoothly - that's the bad news. Indeed, it is the deadening of interest and commitment, from too much control, from overreliance on rewards and threats, that keeps people from peak performance." "But the good news is that people have an innate energy, interest, and excitement about the world that can be encouraged, and when they find greater satisfaction in what they do, they are more effective. Deci shows us how people work more efficiently, learn more intelligently, and treat each other better when their sense of autonomy is encouraged. Give students the reasons why they need to learn something boring, bring workers into the decision process whenever possible, avoid the use of threats, and amazing results will ensue, because people are inherently interested in the world, and they perform optimally when their autonomy is supported. While this good news is a call for autonomy, it is not a call for anarchy. People need limits and structure, but the way these are provided makes all the difference. Reading this book will revolutionize the way we think about motivation - and will give readers insight into what makes us tick."--BOOK JACKET.

The Highlights Book of Things to Do

Recent neuroscience, in replacing the old model of the brain as a single centralized source of control, has emphasized plasticity, the quality by which our brains develop and change throughout the course of our lives. Our brains exist as historical products, developing in interaction with themselves and with their surroundings. Hence there is a thin line between the organization of the nervous system and the political and social organization that both conditions and is conditioned by human experience. Looking carefully at contemporary neuroscience, it is hard not to notice that the new way of talking about the brain mirrors the management discourse of the neo-liberal capitalist world in which we now live, with its talk of decentralization, networks, and flexibility. Consciously or unconsciously, science cannot but echo the world in which it takes place. In the neo-liberal world, plasticity can be equated with flexibility—a term that has become a buzzword in economics and management theory. The plastic brain would thus represent just

another style of power, which, although less centralized, is still a means of control. In this book, Catherine Malabou develops a second, more radical meaning for plasticity. Not only does plasticity allow our brains to adapt to existing circumstances, it opens a margin of freedom to intervene, to change those very circumstances. Such an understanding opens up a newly transformative aspect of the neurosciences. In insisting on this proximity between the neurosciences and the social sciences, Malabou applies to the brain Marx's well-known phrase about history: people make their own brains, but they do not know it. This book is a summons to such knowledge.

Working with the Shadow is not working with evil, per se. It is working toward the possibility of greater wholeness. We will never experience healing until we can come to love our unlovable places, for they, too, ask love of us. How is it that good people do bad things? Why is our personal story and our societal history so bloody, so repetitive, so injurious to self and others? How do we make sense of the discrepancies between who we think we are—or who we show to the outside world—versus our everyday behaviors? Why are otherwise ordinary people driven to addictions and compulsions, whether alcohol, drugs, food, shopping, infidelity, or the Internet? Why are interpersonal relationships so often filled with strife? Exploring Jung's concept of the Shadow—the unconscious parts of our self that contradict the image of the self we hope to project—*Why Good People Do Bad Things* guides you through all the ways in which many of our seemingly unexplainable behaviors are manifestations of the Shadow. In addition to its presence in our personal lives, Hollis looks at the larger picture of the Shadow at work in our culture—from organized religion to the suffering and injustice that abounds in our modern world. Accepting and examining the Shadow as part of

one's self, Hollis suggests, is the first step toward wholeness. Revealing a new way of understanding our darker selves, Hollis offers wisdom to help you to acquire a more conscious conduct of your life and bring a new level of awareness to your daily actions and choices.

It's evaporated great fortunes and run companies into the ground. It's made adversity unbearable and turned struggle into shame. Every great philosopher has warned against it, in our most lasting stories and countless works of art, in all culture and all ages. Its name? Ego, and it is the enemy - of ambition, of success and of resilience. In *Ego is the Enemy*, Ryan Holiday shows us how and why ego is such a powerful internal opponent to be guarded against at all stages of our careers and lives, and that we can only create our best work when we identify, acknowledge and disarm its dangers. Drawing on an array of inspiring characters and narratives from literature, philosophy and history, the book explores the nature and dangers of ego to illustrate how you can be humble in your aspirations, gracious in your success and resilient in your failures. In *WHY YOU ACT THE WAY YOU DO*, Tim LaHaye explains his unique theory of temperament blends and tells how you can improve yourself by identifying your own personality strengths and weaknesses. Learning why you act the way you do will help you in four ways. It will: 1. Advance you in your job and career 2. Enable you to deal with depression and anger. 3. Improve your relationship with your spouse, or help you select your future husband or wife. 4. Identify for you the specific spiritual gifts God has given you. Even if you've never before read about personality and temperament, *Why You Act the Way you Do* will help you discover your unique potential in your job, your marriage, and your church.

Why You Act the Way You Do

"Our world will change more in this century than in all of human history, driven by many factors including technology, climate change, demographics and inequality. Such extreme change is throwing up unprecedented opportunities and creating an 'adaptive challenge' for individuals, organizations and societies. Those who can adapt to a fast-flowing, complex, volatile and uncertain world will flourish. Those who cannot will suffer greatly. There are clear signs everywhere that we need new ways to think about the world and our place in it. Our old ideas about education, lifestyle, success and happiness no longer work. How is work changing? How can you know what skills will be useful when jobs of the future are still being invented? Will 'jobs' even exist or are we moving to a world of projects and gig work? How do you make sense of all this and more? In *What the Heck Do I Do With My Life?* Ravi Venkatesan makes the case that successful adaptation in the new century requires a 'paradigm shift', a different mindset, new skills and new strategies. Ravi also reflects on how we will need to live life more intentionally, making deliberate choices about who we are, what we do and how we live rather than simply being carried along like a piece of driftwood"--Publisher's description.

The Power of Habit

The inspiring, life-changing bestseller by the author of *LEADERS EAT LAST* and *TOGETHER IS BETTER* In 2009, Simon Sinek started a movement to help people become more inspired at work, and in turn inspire their colleagues and customers. Since then, millions have been touched by the power of his ideas, including more than 28 million who have watched his TED Talk based on *Start With Why* -- the third most popular TED video of all time. Sinek opens by asking some fundamental questions: Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? *Start With Why* shows that the leaders who've had the greatest influence in the world--think Martin Luther King Jr., Steve Jobs, and the Wright Brothers--all think, act, and communicate the same way -- and it's the opposite of what everyone else does. Sinek calls this powerful idea 'The Golden Circle,' and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

The hugely influential book on how the understanding of causality revolutionized science and the world, by the pioneer of artificial intelligence 'Wonderful ... illuminating and fun to read' Daniel Kahneman, Nobel Prize-winner and author of Thinking, Fast and Slow 'Correlation does not imply causation.' For decades, this mantra was invoked by scientists in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer, or carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl's discoveries have enabled machines to think better, The Book of Why explains how we too can think better. 'Pearl's accomplishments over the last 30 years have provided the theoretical basis for progress in artificial intelligence and have redefined the term \"thinking machine\" Vint Cerf

What is anger? Who is allowed to be angry? How can we manage our anger? How can we use it? It might seem like a day doesn't go by without some troubling explosion of anger, whether we're shouting at the kids, or the TV, or the driver ahead who's slowing us down. In this book, the first of its kind, Dr. Ryan Martin draws on 20 years plus of research, as well as his own childhood experience of an angry parent, to take an all-round view on this often-challenging emotion. It explains exactly what anger is, why we get angry, how our anger hurts us as well as those around us, and how we can manage our anger and even channel it into positive change. It also explores how race and gender shape society's perceptions of who is allowed to get angry. Dr. Martin offers questionnaires, emotion logs, control techniques and many other tools to help readers understand better what pushes their buttons and what to do with angry feelings when they arise. It shows how to differentiate good anger from bad anger, and reframe anger from being a necessarily problematic experience in our lives to being a fuel that energizes us to solve problems, release our creativity and confront injustice.

What Not to Do (And How to Do It)

This thoughtful, poetic book uses metaphors and beautiful imagery to explore the reasons for our tears. In a soft voice, Mario asks, “Mother, why do we cry?” And his mother begins to tell him about the many reasons for our tears. We cry because our sadness is so huge it must escape from our bodies. We cry because we don’t understand the world, and our tears go in search of an answer. Most important, she tells him, we cry because we feel like crying. And, as she shows him then, sometimes we feel like crying for joy. This warm, reassuring hug of a book makes clear that everyone is allowed to cry, and that everyone does.

**** A New York Times Bestseller ** NAMED ONE OF THE BEST BOOKS OF THE YEAR BY: Time • The New Yorker • NPR • GQ • Elle • Vulture • Fortune • Boing Boing • The Irish Times • The New York Public Library • The Brooklyn Public Library** “A complex, smart and ambitious book that at first reads like a self-help manual, then blossoms into a wide-ranging political manifesto.”—Jonah Engel Bromwich, The New York Times Book Review One of President Barack Obama's “Favorite Books of 2019” Porchlight's Personal Development & Human Behavior Book of the Year In a world where addictive technology is designed to buy and sell our attention, and our value is determined by our 24/7 data productivity, it can seem impossible to escape. But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind’s role in the environment, and arrive at more meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, *How to do Nothing* is an action plan for thinking outside of capitalist narratives of efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

Do the Work!

A book that will change how you think and transform how you live Forget everything you thought you knew about how to motivate people - at work, at school, at home. It is wrong. As Daniel H. Pink explains in his paradigm-shattering book *Drive*, the secret to high performance and satisfaction in today's world is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and the world. Along the way, he takes us to companies that are enlisting new approaches to motivation, and introduces us to the scientists and entrepreneurs who are pointing a bold way forward.

How to Do Nothing

Ben Horowitz, a leading venture capitalist, modern management expert, and New York Times bestselling author combines lessons both from history and modern organisational practice with practical and often surprising advice to help us build cultures that can weather both good and bad times.

Drive

Virginia Woolf dreamed of the Day of Judgment. The “great conquerors and lawyers and statesmen” come to receive their rewards - crowns, laurels, names carved on marble. But, when he sees people coming with books under their arms, God turns to Peter and says: “Look, those need no reward. We have nothing to give them here. “They have loved reading.” And this is the essence of her essay - sheer love for the written word: a joy in exploring the thoughts and imaginings of the author. If you sometimes get bogged down in a book, Woolf has produced the perfect self-help manual and motivational guide to reading. If you enjoyed 'How Should One Read a Book?', try 'How to Read a Book: The Classic Guide to Intelligent Reading', by Mortimer J Adler. “To read a novel is a difficult and complex art,” says Virginia Woolf. Adeline Virginia Woolf (1882-1941) made an impact during her life, but her fame grew in the decades after her death. The English

writer helped launch the use of stream-of-consciousness in literature and was a pioneer of 20th century modernism. Arguably her greatest legacy, though, comes from how her writing helped to inspire the feminist movements of the second half of the 20th century. Along with members of her family and other authors, Woolf helped found the Bloomsbury Group. After she married the political theorist and author Leonard Woolf in 1912, they went on to found the Hogarth Press. Virginia also had a long relationship with the writer Vita Sackville-West. The affair featured in the 2018 movie *Vita and Virginia*, starring Gemma Arterton and Elizabeth Debicki. Her best-known works include the novels *'Mrs Dalloway'*, *'To the Lighthouse'* and *'Orlando'*.

A refreshing guide to becoming a healthier, happier self. We humans tend to get in our own way time and time again—whether it comes to not speaking up for ourselves, going back to bad romantic partners, dieting for the umpteenth try, or acting on any of a range of bad habits we just can't seem to shake. In *Rewire*, renowned psychotherapist Richard O'Connor, PhD, reveals exactly why our bad habits die so hard. We have two brains—one a thoughtful, conscious, deliberative self, and the other an automatic self that makes most of our decisions without our attention. Using new research and knowledge about how the brain works, the book clears a path to lasting, effective change for behaviors that include: • Procrastination • Overeating • Chronic disorganization • Staying in bad situations • Excessive worrying • Risk taking • Passive aggression • Self-medication Bringing together many different fields in psychology and brain science, Dr. O'Connor gives you a road map to overcoming whatever self-destructive habits are plaguing you, with exercises throughout the book. We can rewire our brains to develop healthier circuitry, training the automatic self to make wiser decisions without having to think about it; ignore distractions; withstand temptations; see ourselves and the world more clearly; and interrupt our reflexive responses before they get us in trouble. Meanwhile, our conscious minds will be freed to view ourselves with compassion at the same time as we practice self-discipline. By learning valuable skills and habits—including mindfulness, self-control, confronting fear, and freeing yourself from mindless guilt—we can open ourselves to vastly more successful, productive, and happy lives.

Why They Do It

From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who

believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.
