

25: Iraq 1991 (Duel)

F-15C Eagle vs MiG-23/25

Designed following the relatively poor performance of America's multi-role fighters during the Vietnam War, the F-15 Eagle was conceived as a dedicated air superiority fighter. But, having trained for 15 years in the Eagle it wasn't Eastern Bloc operated MiGs that the F-15 eventually came up against, but pilots of Saddam Hussein's Iraqi airforce. This book analyses the combat between the American and Soviet 'Cold War fighters' in a balanced manner, examining how the technical abilities of the aircraft combined with the different levels of training available to opposing pilots and groundcrews allowed the F-15s to destroy the Iraqi offensive abilities within weeks of the First Gulf War starting. Packed with artwork, illustrations and photographs, this book places the reader in the cockpit during one of the last major dogfighting air wars in modern history.

The World's Most Powerful Military Aircraft

Ever since man first took to the air, combat aircraft have been at the cutting edge of aviation technology, resulting in some of the greatest and most complex designs ever built. The World's Greatest Military Aircraft features 52 of the most important military aircraft of the last hundred years, including everything from biplane fighters and carrier aircraft to tactical bombers, transport aircraft, multirole fighters, strategic strike aircraft, and stealth bombers. Each entry includes a brief description of the model's development and history, a profile view, key features, and specifications. Packed with more than 200 artworks and photographs, this is a colorful guide for the military aviation enthusiast.

Persian Gulf War, 1990-1991

For nearly two decades the United States Air Force (USAF) oriented the bulk of its thinking, acquisition, planning, and training on the threat of a Soviet blitzkrieg across the inter German border. The Air Force fielded a powerful conventional arm well rehearsed in the tactics required to operate over a central European battlefield. Then, in a matter of days, the 1990 invasion of Kuwait altered key assumptions that had been developed over the previous decade and a half. The USAF faced a different foe employing a different military doctrine in an unexpected environment. Instead of disrupting a fast paced land offensive, the combat wings of the United States Central Command Air Forces (CENTAF) were ordered to attack a large, well fortified, and dispersed Iraqi ground force. The heart of that ground force was the Republican Guard Forces Command (RGFC). CENTAF's mission dictated the need to develop an unfamiliar repertoire of tactics and procedures to meet theater objectives. How effectively did CENTAF adjust air operations against the Republican Guard to the changing realities of combat? Answering that question is central to this study, and the answer resides in evaluation of the innovations developed by CENTAF to improve its operational and tactical performance against the Republican Guard. Effectiveness and timeliness are the primary criteria used for evaluating innovations.

Airpower against an Army: Challenge and Response in CENTAF's Duel with the Republican Guard

A thorough investigation of the strengths and weaknesses of two of the twentieth century's most lethal combatants; the M1 Abrams and the T-72. The Gulf War bore witness to a number of deadly encounters between these two great adversaries. Heavily armoured, highly mobile and capable of killing at over 2500m the M1 Abrams is, to this day, a veritable fighting machine. Superior to both Iraq's Soviet era T-55 and T-62

tanks, nearly all sources claim that no Abrams tank has ever been destroyed by enemy fire. Despite entering service in 1980, the M1 Abrams remained untested in combat until the Gulf War in 1991, where it was to be confronted by its archenemy the Iraqi-assembled Soviet-designed T-72. Entering production in 1971, the T-72 arguably outstripped its contemporaries in a balance of mobility, protection and firepower. By the time of Operation Desert Storm, however, the tables had turned and the tank suffered due to low quality ammunition and poorly trained crews. In this fascinating study, Steven Zaloga pits these two great fighting machines against one another, plotting the development of the Cold War until both tanks met in combat in the deserts of Iraq and Kuwait.

M1 Abrams vs T-72 Ural

This book is a major reinterpretation of the Iran-Iraq War and is a source for reexamining the U.S. involvement in the Gulf. Pelletiere demonstrates that the war was not a standoff in which Iraq finally won a grinding war of attrition through luck, persistence, and the use of poison gas. Instead, Iraq planned the last campaign almost two years prior to its unfolding. [The Iraqis] trained extensively and expended enormous sums of money to make their effort succeed. What won for them was their superior fighting prowess and greater commitment. Gas--if it was used at all--played only a minor part in the victory.' Pelletiere concludes that the key to understanding the war is the Extraordinary Congress of the Ba'th Party held in July 1986. It was there that the initial planning for the final campaign was done, and this campaign is what decided the fate of the conflict. The study centers around the last Iraqi campaign, which Pelletiere argues was based upon World War II blitzkrieg tactics, but he also treats the background, the politics, and the history of the conflict, and analyzes the significance of the war to the Middle East and to the position of the United States there.

The Iran-Iraq War

This collection of essays reflects the proceedings of a 1991 conference on \"The United States Air Force: Aerospace Challenges and Missions in the 1990s,\" sponsored by the USAF and Tufts University. The 20 contributors comment on the pivotal role of airpower in the war with Iraq and address issues and choices facing the USAF, such as the factors that are reshaping strategies and missions, the future role and structure of airpower as an element of US power projection, and the aerospace industry's views on what the Air Force of the future will set as its acquisition priorities and strategies. The authors agree that aerospace forces will be an essential and formidable tool in US security policies into the next century. The contributors include academics, high-level military leaders, government officials, journalists, and top executives from aerospace and defense contractors.

The Future of Air Power in the Aftermath of the Gulf War

This book presents a broad history of Iraq, from the earliest times to the present, with particular attention to the emergence of modern Iraq in the twentieth century, the power struggles that led to the rise of Saddam Hussein, and recent events such as the Iran-Iraq war, the 1990-91 Gulf crisis, and the continuing depiction of Iraq as a 'pariah' nation. Detailed information is included, much of it unsympathetic to western propaganda, to encourage a deeper understanding and a deeper ethical perception of the 'Iraq Question'.

Iraq

Israel has fought many wars since its founding in 1948, from conventional military conflicts with Arab forces to irregular clashes with guerrilla and terror groups. A study of these confrontations reveals strategic and military patterns. Written by a former member of the Israel Defense Forces, this book compares the wars fought in Lebanon against the Palestine Liberation Organization (1982) and against Hezbollah (2006), and in the Gaza Strip (1956, 1967, 2008-2009 and 2014). The author draws similarities between Israel and Western nations--mainly the United States and Britain--in their waging of conventional and irregular warfare, and offers a comparison of the Vietnam War to Israel's struggle with Hezbollah in the 1990s.

Israel's Way of War

Now that it has become so commonplace, we rarely blink an eye at camera footage framed by the crosshairs of a sniper's gun or from the perspective of a descending smart bomb. But how did this weaponized gaze become the norm for depicting war, and how has it influenced public perceptions? Through the Crosshairs traces the genealogy of this weapon's-eye view across a wide range of genres, including news reports, military public relations images, action movies, video games, and social media posts. As he tracks how gun-camera footage has spilled from the battlefield onto the screens of everyday civilian life, Roger Stahl exposes how this raw video is carefully curated and edited to promote identification with military weaponry, rather than with the targeted victims. He reveals how the weaponized gaze is not only a powerful propagandistic frame, but also a prime site of struggle over the representation of state violence.

Air University Library Index to Military Periodicals

Summarizes a report on the planning and execution of operations in Operation IRAQI FREEDOM through June 2004. Recommends changes to Army plans, operational concepts, doctrine, and Title 10 functions.

A Selected, Annotated Bibliography of Articles on the Gulf War 1990-1991

A New York Times and Washington Post Notable Book • Named a Best Book of the Year by The New Yorker • Nominated for a National Book Critics Circle Award in Nonfiction "Excellent . . . A more intimate picture of the dictator's thinking about world politics, local power and his relationship to the United States than has been seen before." —The New York Times "Another triumph from one of our best journalists." —The Washington Post "Voluminously researched and compulsively readable." —Air Mail From bestselling and Pulitzer Prize-winning author Steve Coll, the definitive story of the decades-long relationship between the United States and Saddam Hussein, and a news-breaking investigation into one of the costliest geopolitical conflicts of our time. When the United States invaded Iraq in 2003, its message was clear: Iraq, under the control of strongman Saddam Hussein, possessed weapons of mass destruction that, if left unchecked, posed grave danger to the world. But when no WMDs were found, the United States and its allies were forced to examine the political and intelligence failures that had led to the invasion and the occupation, and the civil war that followed. One integral question has remained unsolved: Why had Saddam seemingly sacrificed his long reign in power by giving the false impression that he had hidden stocks of dangerous weapons? The Achilles Trap masterfully untangles the people, ploys of power, and geopolitics that led to America's disastrous war with Iraq and, for the first time, details America's fundamental miscalculations during its decades-long relationship with Saddam Hussein. Calling on unpublished and underreported sources, interviews with surviving participants, and Saddam's own transcripts and audio files, Steve Coll pulls together an incredibly comprehensive portrait of a man who was convinced the world was out to get him and acted accordingly. A work of great historical significance, The Achilles Trap exposes how corruptions of power, lies of diplomacy, and vanity—on both sides—led to avoidable errors of statecraft, ones that would enact immeasurable human suffering and forever change the political landscape as we know it.

Through the Crosshairs

Serves as a forum where scholars from Grambling State University and other institutions can meet to present information and exchange ideas. Contains papers on topics such as: Africa's Third Decade of Independence; The Epidemiology of Trachoma in Third World; and The Economic Impacts of the Gulf War.

America and the Iraqi Crisis, 1990-1992

Nuclear Showdown published by Asia expert, Gordon Chang, was of the first books to explore the full

extent of the North Korean nuclear threat, its origins, international implications, and solutions. The United States is the mightiest nation in history, yet for six decades one of the world's weakest states has challenged the superpower and kept it at bay. Today, that country also threatens to change the course of human events with an act of unimaginable devastation. Nuclear Showdown analyses the failed society that has become the gravest threat to America and international order: North Korea. Chang's insightful book reveals the full horror of the crisis threatening to turn Asia into the world's next battleground. How can North Korea be stopped? No one seems to have an answer. For more than half a century, policymakers have failed when it comes to subjugating Kim Il Sung and his son, Kim Jong Il. Nuclear Showdown proposes a solution that can defuse the standoff once and for all.

Operation Iraqi Freedom

Following on from his award-winning book on the history of ancient Persia, Kaveh Farrokh goes on to examine Iran's wartime history from the Safavid dynasty of the 16th and 17th century through to the 1979 Revolution and beyond. He shows how the early military successes were followed by centuries of defeat as the external influences of nations like Russia and Britain began to shape the internal history of Iran, before unraveling the complex, violent 20th century military history of the country, which encompasses two world wars, regional movements, foreign intervention, anti-government revolts, conflicts on the Soviet border, a revolution and an eight-year war with Iraq. Illustrated with contemporary illustrations and photographs this book provides an unparalleled investigation into the bloody martial history of Iran.

The Achilles Trap

This comprehensive new analysis goes far beyond today's headlines and the basic facts and figures on the military forces in the region. Tracing the origin of the military forces in each Middle East country, Tony Cordesman discusses current security developments and provides a qualitative and quantitative analysis of the strength and effectiveness of

Third World Symposium

The Middle East in Modern World History focuses on the history of this region over the past 200 years. It examines how global trends during this period shaped the Middle East and how these trends were affected by the region's development. Three trends from the past two centuries are highlighted: The region as a strategic conduit between East and West The development of the region's natural resources, especially oil The impact of a rapidly globalizing world economy on the Middle East

Nuclear Showdown

The war against Iraq divided opinion throughout the world and generated a maelstrom of spin and counterspin. The man at the eye of the storm, and arguably the only key player to emerge from it with his integrity intact, was Hans Blix, head of the UN weapons inspection team. This is Dr. Blix's account of what really happened during the months leading up to the declaration of war in March 2003. In riveting descriptions of his meetings with Tony Blair, Jacques Chirac, Colin Powell, Condoleezza Rice, and Kofi Annan, he conveys the frustrations, the tensions, the pressure and the drama as the clock ticked toward the fateful hour. In the process, he asks the vital questions about the war: Was it inevitable? Why couldn't the U.S. and UK get the backing of the other member states of the UN Security Council? Did Iraq have weapons of mass destruction? What does the situation in Iraq teach us about the propriety and efficacy of policies of preemptive attack and unilateral action? Free of the agendas of politicians and ideologues, Blix is the plainspoken, measured voice of reason in the cacophony of debate about Iraq. His assessment of what happened is invaluable in trying to understand both what brought us to the present state of affairs and what we can learn as we try to move toward peace and security in the world after Iraq.

Iran at War

An author and subject index to selected and American Anglo-Jewish journals of general and scholarly interests.

After The Storm

This volume addresses the importance of images of nations in international relations. One fundamental assumption is that the behavior of states is not the same as that of individuals. States are social systems whose behavior as a rule directly corresponds neither to the motives of their respective leaders nor to those of their populations. However, it is also self-evident that international activities always depend on personal relationships. The studies presented relate to more or less deliberate attempts to induce change in images. Given the interdisciplinary nature of the subject matter, findings made in public relations, advertising research, prejudice research and other fields are also taken into account. Very often it is impossible to distinguish between the image of the nation-state and the images of big enterprises such as Krupp, Ford, or Coca Cola. For this reason, the country of origin effect is also discussed.

The Middle East in Modern World History

Unlike other publications since the downfall of Saddam's regime, Iraq: Then & Now traces the history of the country from ancient times until the present. Supplementary boxes, many written by Iraqis themselves, reflect on life today as compared with life in Saddam's Iraq and even earlier, describing their experiences, hopes, fears, ambitions and visions for the future. The book self-consciously avoids making any judgement on the political debate surrounding the 2003 war and subsequent occupation; instead it presents the varying views, and offers a rounded, balanced picture. Published to coincide with the fifth anniversary of the change, this guide to the country and its people, provides information on Iraq's culture and archaeology, the south, Baghdad and the Sunni Triangle. The northern region of Iraqi Kurdistan stands apart as a success story and the travel appendix provides essential information for the increasing numbers of visitors to this region.

Disarming Iraq

A book entitled *The Presidential Character* is more timely and necessary than ever. This new issue of James David Barber's classic work appears almost 50 years after its first publication and yet reads like a roadmap to the 2020 presidential election. Its subtitle, "Predicting Performance in the White House," is an apt reflection on the election of 2016. With a revised and updated foreword by George C. Edwards III that brings in the Trump Administration, this book argues that patterns in a person's character, world view, and political style can allow us to anticipate his or her performance as president. How would Barber have categorized Donald J. Trump, who appears to defy every presidential type and norm? This question suggests one of the most provocative and appealing reasons for students, scholars, and voters to re-read *The Presidential Character* at this particular juncture. What should we look for in a president? This text offers explanations and predictions of the performance of past presidents and presidential candidates with many cautionary tales looking forward. Features Presents a revised and updated foreword by presidential scholar George C. Edwards III, Distinguished Professor of Political Science at Texas A&M University, that includes the advent of the Trump Administration and highlights the book's classic and enduring contributions. Includes predictions of presidential performance from Nixon to Bush. Analyzes the media's role in providing information about the political candidates and in shaping public opinion of them. Draws on historical, biographical, and psychological research to help voters make judicious choices in determining the country's highest leaders. Encourages citizens to be actively involved scholars, critics, and participants in their government.

Index to Jewish Periodicals

Arms control and nonproliferation treaties are among the fingers in the dike preventing the unthinkable

nuclear, biological, and chemical catastrophe. For decades the ability to ascertain whether states are hiding germ weapons programs has been nonexistent because the 1975 bioweapons ban has no inspection measures. Yet, in 1995 a small United Nations inspection corps pulled off a spectacular verification feat in the face of concerted resistance from Iraq's Saddam Hussein and popular skepticism that it was even possible to conduct effective biological inspections. Working from sketchy intelligence—and hampered by the Iraqis' extensive concealment and deception measures—the inspectors busted open Iraq's cover stories and wrested a confession of biowarfare agent production from Baghdad. This rigorously researched book tells that compelling story through the firsthand accounts of the inspectors who, with a combination of intrepidity, ingenuity, and a couple of lucky breaks, took the lid off Iraq's bioweapons program and pulled off an improbable victory for peace and international security. The book concludes by drawing lessons from this experience that should be applied to help arrest future bioweapons programs, by placing the Iraq bioweapons saga in the context of other manmade biological risks, and by making recommendations to reduce those risks. While written as an engaging, analytical historical narrative that explains what the biological inspectors knew, when and how they knew it, and how they outmaneuvered the Iraqis, this book's real contributions are the inspectors' blueprint to "get it right" with regard to the verification challenges associated with the bioweapons ban, and the author's roadmap to address the overall biological threats facing the world today.

Images of Nations and International Public Relations

War demands that scholars and policy makers use victory in precise and coherent terms to communicate what the state seeks to achieve in war. The failure historically to define victory in consistent terms has contributed to confused debates when societies consider whether to wage war. This volume explores the development of a theoretical narrative or language of victory to help scholars and policy makers define carefully and precisely what they mean by victory in war in order to achieve a deeper understanding of victory as the foundation of strategy in the modern world.

Iraq Then and Now

The challenge of deterring territorial aggression is taking on renewed importance, yet discussion of it has lagged in U.S. military and strategy circles. The authors aim to provide a fresh look, with two primary purposes: to review established concepts about deterrence, and to provide a framework for evaluating the strength of deterrent relationships. They focus on a specific type of deterrence: extended deterrence of interstate aggression.

The Presidential Character

Weekly news digests cover all of the year's major events and report on such areas as science, sports, medicine, religion, plays, and prominent personalities.

Germ Gambits

This book explores key historical episodes to understand the reasons and consequences of the enduring partiality problem in cooperation between Turkey and Iraq. Notwithstanding their mutual material interdependence and common cultural heritage, these two close neighbors have stayed far from achieving comprehensive cooperation. The author examines contextual-discursive dynamics shaping Turkey-Iraq partial cooperation around critical events, such as the Saadabad-Baghdad pacts, the Gulf War, the US Invasion, and the war against ISIS. Leading pro-government Turkish daily newspapers of the period are analyzed to highlight ambivalent ontological-rhetorical modes and ambiguous political narratives-frames that perpetuate paradoxes of partiality in Ankara's rationalization and contextualization of cooperation with Baghdad and Erbil.

Daily Report, Near East & South Asia

The American Culture of War presents a sweeping, critical examination of every major American war of the late 20th century: World War II, Korea, Vietnam, the First and Second Persian Gulf Wars, through to Operation Enduring Freedom. Lewis deftly traces the evolution of US military strategy, offering an original and provocative look at the motives people and governments used to wage war, the debates among military personnel, the flawed political policies that guided military strategy, and the civilian perceptions that characterized each conflict. Now in its second edition, The American Culture of War has been completely revised and updated. New features include: Completely revised and updated chapters structured to facilitate students' ability to compare conflicts New chapters on Operation Iraqi Freedom and the current conflict in Afghanistan New conclusion discussing the American culture of war and the future of warfare Over fifty maps, photographs, and images to help students visualize material Expanded companion website with additional pedagogical material for both students and researchers. The American Culture of War is a unique and invaluable survey of over seventy years of American military history, perfect for any student of America's modern wars. For additional information and classroom resources please visit The American Culture of War companion website at www.routledge.com/cw/lewis.

Victory in War

Will the U.S. go to war with China over Taiwan or oil? Yes—bestselling authors Ed Timperlake and Jed Babbin say Chinese aggression is virtually inevitable and in their new book, *"Showdown"*

What Deters and Why

Since the unprecedentedly effective performance of the allied air campaign against Iraq during Operation Desert Storm, the role of American air power in future wars has become a topic of often heated public debate. In this balanced appraisal of air power's newly realized strengths in joint warfare, Benjamin Lambeth, a defense analyst and civilian pilot who has flown in most of the equipment described in this book, explores the extent to which the United States can now rely on air-delivered precision weapons in lieu of ground forces to achieve strategic objectives and minimize American casualties. Beginning with the U.S. experience in Southeast Asia and detailing how failures there set the stage for a sweeping refurbishment of the nation's air warfare capability, Lambeth reviews the recent history of American air power, including its role in the Gulf War and in later conflicts in Bosnia, Kosovo, and Serbia. He examines improvements in areas ranging from hardware development to aircrew skills and organizational adaptability. Lambeth acknowledges that the question of whether air power should operate independently or continue to support land operations is likely to remain contentious. He concludes, however, that air power, its strategic effectiveness proven, can now set the conditions for victory even from the outset of combat if applied to its fullest potential.

Military Lessons of the Gulf War

This volume offers a wide-ranging examination of the Iran–Iraq War (1980–88), featuring fresh regional and international perspectives derived from recently available new archival material. Three decades ago Iran and Iraq became embroiled in a devastating eight-year war which served to re-define the international relations of the Gulf region. The Iran–Iraq War stands as an anomaly in the Cold War era; it was the only significant conflict in which the interests of the United States and Soviet Union unwittingly aligned, with both superpowers ultimately supporting the Iraqi regime. The Iran–Iraq War re-assesses not only the superpower role in the conflict but also the war's regional and wider international dimensions by bringing to the fore fresh evidence and new perspectives from a variety of sources. It focuses on a number of themes including the economic dimensions of the war and the roles played by a variety of powers, including the Gulf States, Turkey, France, the Soviet Union and the United States. The contributions to the volume serve to underline that the Iran–Iraq war was a defining conflict, shaping the perspectives of the key protagonists for a generation to come. This book will be of much interest to students of international and Cold War history,

Middle Eastern politics, foreign policy, and International Relations in general.

Daily Report

Syrian-Saudi relations have been a paradox in inter-Arab politics during the oil era. Commentators and analysts have questioned why the two states pursued mutually conflicting aims in almost every major regional or international foreign policy issue and often propagated contrasting ideological banners over the past thirty years; while both acting as though some form of an alignment existed between them? Here, Sonoko Sunayama explores the logic behind the paradoxical longevity of this cooperative relationship and argues that what ultimately makes Saudis and Syrians so indispensable to each other is the perception and the historical appeal of 'shared identities', be they Arabism or Islam.
