Green Ants vs. Army Ants (Who Would Win?)

This exceedingly timely book looks at the history of black activist athletes and the important role of the black community in making sure fair play existed, not only in sports, but across U.S. society. Most books that focus on ties between sports, black athletes, and the Civil Rights Movement focus on specific issues or people.

They discuss, for example, how baseball was integrated or tell the stories of individuals like Jackie Robinson or Muhammad Ali. This book approaches the topic differently. By examining the connection between sports, black athletes and the Civil Rights Movement overall, it puts the athletes and their stories into the proper context. Rather than romanticizing the stories and the men and women who lived them, it uses the roles these individuals played—or chose not to play—to illuminate the complexities and nuances in the relationship between black athletes and the fight for racial equality. Arranged thematically, the book starts with Jackie Robinson's entry into baseball when he signed with the Dodgers in 1945 and ends with the revolt of black athletes in the late 1960s, symbolized by Tommie Smith and John Carlos famously raising their clenched fists during a medal ceremony at the 1968 Olympics. Accounts from the black press and the athletes themselves help illustrate the role black athletes played in the Civil Rights Movement. At the same time, the book also examines how the black public viewed sports and the contributions of black athletes during these tumultuous decades, showing how the black communities' belief in merit and democracy—combined with black athletic success—influenced the push for civil rights.

We Will Win the Day

Winners are individuals who surpass the efforts of all others and can claim victory in their competitive endeavors. There are probably more famous quotes on winning and succeeding than on most other topics combined. Many of these quotations have come from a variety of thinkers, coaches, philosophers and scientists including the likes of Confucius, Socrates, Gandhi, Martin Luther King, Einstein, Stephen Hawking, Vince Lombardi, John Wooden and 'Bear' Bryant. It is interesting to note that while great thinkers and coaches view winning as their goal, they emphasize that preparation for the event is of even greater importance. This has never been more evident than in this day and age, where competition to rise to the top is pursued by so many and winning is revered by all. The result of this intense competition is that winners are analyzed meticulously. Along with the potential rewards of fame, wealth, public recognition and power, aspiring to win can easily become emotional and personal, and our determination to succeed amplified. In pursuit of the prize we have targeted, we can shorten our journey by finding a mentor, someone who has already successfully traveled that route, in order to achieve our goal sooner rather than later. To develop The Will to Win, the mindset you desire can be mentored and guided by the CelebrityExperts(R) in this book. These guides can often save you the anguish of making the same mistakes they made, and losing precious time along the way. So if you've got The Will to Win, read on and let this book be your guide.

A Wall Street Journal and Washington Post Bestseller A playbook for creating your company's winning strategy. Strategy is not complex. But it is hard. It's hard because it forces people and organizations to make specific choices about their future—something that doesn't happen in most companies. Now two of today's best-known business thinkers get to the heart of strategy—explaining what it's for, how to think about it, why you need it, and how to get it done. And they use one of the most successful corporate turnarounds of the past century, which they achieved together, to prove their point. A.G. Lafley, former CEO of Procter & Gamble, in close partnership with strategic adviser Roger Martin, doubled P&G's sales, quadrupled its profits, and increased its market value by more than \$100 billion in just ten years. Now, drawn from their years of experience at P&G and the Rotman School of Management, where Martin is dean, this book shows how leaders in organizations of all sizes can guide everyday actions with larger strategic goals built around the clear, essential elements that determine business success—where to play and how to win. The result is a playbook for winning. Lafley and Martin have created a set of five essential strategic choices that, when addressed in an integrated way, will move you ahead of your competitors. They are: • What is our winning aspiration? • Where will we play? • How will we win? • What capabilities must we have in place to win? •

What management systems are required to support our choices? The stories of how P&G repeatedly won by applying this method to iconic brands such as Olay, Bounty, Gillette, Swiffer, and Febreze clearly illustrate how deciding on a strategic approach—and then making the right choices to support it—makes the difference between just playing the game and actually winning.

Over the past century, high school and college athletics have grown into one of America's most beloved — and most controversial — institutions, inspiring great loyalty while sparking fierce disputes. In this richly detailed book, Pamela Grundy examines the many meanings that school sports took on in North Carolina, linking athletic programs at state universities, public high schools, women's colleges, and African American educational institutions to social and economic shifts that include the expansion of industry, the advent of woman suffrage, and the rise and fall of Jim Crow. Drawing heavily on oral history interviews, Grundy charts the many pleasures of athletics, from the simple joy of backyard basketball to the exhilaration of a state championship run. She also explores conflicts provoked by sports within the state — clashes over the growth of college athletics, the propriety of women's competition, and the connection between sports and racial integration, for example. Within this chronicle, familiar athletic narratives take on new meanings, moving beyond timeless stories of courage, fortitude, or failure to illuminate questions about race, manhood and womanhood, the purpose of education, the meaning of competition, and the structure of American society.

Will to Win

The Instant New York Times Bestseller. A war is being waged against us by radical Islamists, and, as current events demonstrate, they are only getting stronger. Al-Qaeda has morphed into a much more dangerous, menacing threat: ISIS. Lt. General Michael T. Flynn is blunt and urgent. This book aims to inform the American people of the grave danger we face in the war on terror?and will continue to face?until our government takes decisive action against the terrorists that want nothing more than to destroy us and our way of life. Flynn spent more than thirty three years in Army intelligence, and as Director of the Defense Intelligence Agency worked closely with Generals Stanley McChrystal and David Petraeus, Admiral Mike Mullen, Director of National Intelligence James Clapper, and other policy, defense, intelligence, and war-fighting leaders. From coordinating on-the-ground operations in Iraq, Afghanistan, and elsewhere, to building reliable intelligence networks, to preparing strategic plans for fighting terrorism, Flynn has been a firsthand witness to government screw-ups, smokescreens, and censored information that our leaders don't want us to know. The Field of Fight succinctly lays out why we have failed to stop terrorist groups from growing, and what we must do to stop them. The core message is that if you understand your enemies, it's a lot easier to defeat them?but because our government has concealed the actions of terrorists like Osama bin Laden and groups like ISIS and al Qaeda, and the role of Iran in the rise of radical Islam, we don't fully understand the enormity of the threat they pose against us. A call to action that is sensible, informed, and original, The Field of Fight asserts that we must find a way to not only fight better, but to win.
