

And The Weak Suffer What They Must

And the Weak Suffer What They Must?

****THE SUNDAY TIMES NUMBER ONE BESTSELLER**** The most recognisable economist on the planet, Yanis Varoufakis, puts forth his case to reform an EU that currently fails its weakest citizens. In this startling account of Europe's economic rise and catastrophic fall, Varoufakis pinpoints the flaws in the European Union's design – a design thought up after the Second World War, and one responsible for Europe's fragmentation and resurgence of racist extremism. When the financial crisis struck in 2008, the political elite's response ensured it would be the weakest citizens of the weakest nations that paid the price for the bankers' mistakes. Drawing on his personal experience of negotiations with the eurozone's financiers, and offering concrete policies to reform Europe, the former finance minister of Greece shows how we concocted this mess and points our way out of it. *And The Weak Suffer What They Must?* highlights our history to tell us what we must do to save European capitalism and democracy from the abyss. With the future of Europe under intense scrutiny after Brexit, this is the must-read book to explain Europe's structural flaws and how to fix them. On Justice, Power & Human Nature

Designed for students with little or no background in ancient Greek language and culture, this collection of extracts from *The History of the Peloponnesian War* includes those passages that shed most light on Thucydides' political theory--famous as well as important but lesser-known pieces frequently overlooked by nonspecialists. Newly translated into spare, vigorous English, and situated within a connective narrative framework, Woodruff's selections will be of special interest to instructors in political theory and Greek civilization. Includes maps, notes, glossary.

Thucydides and the Ancient Simplicity

Thucydides' *History of the Peloponnesian War* is the earliest surviving realist text in the European tradition. As an account of the Peloponnesian War, it is famous both as an analysis of power politics and as a classic of political realism. From the opening speeches, Thucydides' Athenians emerge as a new and frightening source of power, motivated by self-interest and oblivious to the rules and shared values under which the Greeks had operated for centuries. Gregory Crane demonstrates how Thucydides' history brilliantly analyzes both the power and the dramatic weaknesses of realist thought. The tragedy of Thucydides' history emerges from the ultimate failure of the Athenian project. The new morality of the imperialists proved as conflicted as the old; history shows that their values were unstable and self-destructive. Thucydides' history ends with the recounting of an intellectual stalemate that, a century later, motivated Plato's greatest work. *Thucydides and the Ancient Simplicity* includes a thought-provoking discussion questioning currently held ideas of political realism and its limits. Crane's sophisticated claim for the continuing usefulness of the political examples of the classical past will appeal to anyone interested in the conflict between the exercise of political power and the preservation of human freedom and dignity. *Thucydides' History of the Peloponnesian War* is the earliest surviving realist text in the European tradition. Confronting the Classics

Mary Beard is one of the world's best-known classicists - a brilliant academic, with a rare gift for communicating with a wide audience both through her TV presenting and her books. In a series of sparkling essays, she explores our rich classical heritage - from Greek drama to Roman jokes, introducing some larger-than-life characters of classical history, such as Alexander the Great, Nero and Boudicca. She invites you into the places where Greeks and Romans lived and died, from the palace at Knossos to Cleopatra's Alexandria - and reveals the often hidden world of slaves. She takes a fresh look at both scholarly controversies and popular interpretations of the ancient world, from The Golden Bough to Asterix. The fruit of over thirty years in the world of classical scholarship, *Confronting the Classics* captures the world of antiquity and its modern significance with wit, verve and scholarly expertise.

On War

"War is the continuation of politics by other means," is a chapter heading from Carl von Clausewitz's controversial classic *On War*, which first appeared in 1832 and remains essential reading for military scientists and tacticians two centuries later. This new 2017 edition of Volume I from Enhanced Media Publishing features a revised translation of the original English version with modern American English spelling and punctuation.

The Battle of Bretton Woods

A sweeping history of the drama, intrigue, and rivalry behind the creation of the postwar economic order. When turmoil strikes world monetary and financial markets, leaders invariably call for 'a new Bretton Woods' to prevent catastrophic economic disorder and defuse political conflict. The name of the remote New Hampshire town where representatives of forty-four nations gathered in July 1944, in the midst of the century's second great war, has become shorthand for enlightened globalization. The actual story surrounding the historic Bretton Woods accords, however, is full of startling drama, intrigue, and rivalry, which are vividly brought to life in Benn Steil's epic account. Upending the conventional wisdom that Bretton Woods was the product of an amiable Anglo-American collaboration, Steil shows that it was in reality part of a much more ambitious geopolitical agenda hatched within President Franklin D. Roosevelt's Treasury and aimed at eliminating Britain as an economic and political rival. At the heart of the drama were the antipodal characters of John Maynard Keynes, the renowned and revolutionary British economist, and Harry Dexter White, the dogged, self-made American technocrat. Bringing to bear new and striking archival evidence, Steil offers the most compelling portrait yet of the complex and controversial figure of White—the architect of the dollar's privileged place in the Bretton Woods monetary system, who also, very privately, admired Soviet economic planning and engaged in clandestine communications with Soviet intelligence officials and agents over many years. A remarkably deft work of storytelling that reveals how the blueprint for the postwar economic order was actually drawn, *The Battle of Bretton Woods* is destined to become a classic of economic and political history.

How to Fight Inequality

Inequality is the crisis of our time. The growing gap between a few at the top and the rest of society damages us all. No longer able to deny the crisis, every government in the world is now pledged to fix it – and yet it keeps on getting worse. In this book, international anti-inequality campaigner Ben Phillips shows why winning the debate is not enough: we have to win the fight. Drawing on his insider experience, and his personal exchanges with the real-life heroes of successful movements, he shows how the battle against inequality has been won before, and he shares a practical plan for defeating inequality again. He sets a route

map for us to overcome deference, build our collective power, and create a new story. Most books on inequality are about what other people ought to do about it – this book is about why winning the fight needs you. Tired of feeling helpless in the face of spiralling inequality? Want to know what you can do about it? This is the book for you.

Thucydides and Herodotus

Thucydides and Herodotus is an edited collection which looks at two of the most important ancient Greek historians living in the 5th Century BCE. It examines the relevant relationship between them which is considered, especially nowadays, by historians and philologists to be more significant than previously realized.

Talking to My Daughter

****THE SUNDAY TIMES BESTSELLER**** Yanis Varoufakis, world renowned economist, writes to his daughter to teach her the hazards of capitalism. 'Why is there so much inequality?' asked Xenia to her father. Answering her questions in a series of accessible and tender letters, Varoufakis educates her to what economics and capitalism is and why it is so dangerous. Taking from memories of her childhood and a variety of well-known tales - from Oedipus and Faust to Frankenstein and The Matrix - Varoufakis turns Talking To My Daughter into an enjoyable and engaging read, without ever shying from the harder truths. Greece's former finance minister explains everything you need to know to understand why economics is the most important drama of our times. In answering his daughter's deceptively simple questions, Varoufakis disentangles our troubling world with remarkable clarity and child-like honesty, as well as inspiring us to make it a better one. The Need for Roots

\\"Hailed by Andre Gide as the patron saint of all outsiders, Simone Weil's short life was ample testimony to her beliefs. In 1943, the final year of her life, unable to join the resistance movement in France, she worked in London for the Free French government in exile. Here she was commissioned to outline a plan for the renewal of Europe after the scourge of Nazism. The Need for Roots was the direct result. In it she seized the opportunity to denounce the false values of contemporary civilization. In the cult of materialism she witnessed a devastating loss of spirit and consequently of human values. To counteract this she sets out a radical vision for spiritual and political renewal with a passion for truth which sweeps through these pages. The book has become a lasting spiritual testament for our age, where we are confronted, as T.S. Eliot

comments, by a genius akin to that of the saints.\"--Jacket.

The Conceit of Humanitarian Intervention

The Conceit of Humanitarian Intervention rejects, on political, legal, ethical, and strategic grounds, the widespread claim that military force can be used effectively-and on the basis of a universal consensus-to stop mass atrocities. As such, it is an against-the-current treatment of an important practice in world politics.

Brill's Companion to Thucydides

The Art of War

Sun Tzu's The Art of War is a widely acclaimed book on military strategy that has influenced and shaped the idea of Western and Eastern nations military philosophy. It presents complete instructions on how to win battles and manage conflicts. The theories proposed in The Art of War are extremely beneficial on the battle ground and has been tried and tested by many successful military generals around the world. The Art of War has established its significance not just as a valuable book for military strategies but it also gives lesson in diplomacy and public administration and planning. The Art of War remains the most influential strategy text in East Asian warfare and has influenced both East Asian and Western military theory and thinking and has found a variety of applications in a myriad of competitive non-military endeavors across the modern world including espionage, culture, politics, business, and sports.

We Must Not Be Enemies

At the end of his first inaugural address, delivered to a nation deeply divided and on the brink of civil war, Abraham Lincoln concluded, "We are not enemies, but friends. We must not be enemies." Lincoln's words ring true today, especially for a new generation raised on political discourse that consists of vitriolic social media and the echo chambers of polarized news media. In We Must Not Be Enemies, Michael Austin combines American history, classical theories of democracy, and cognitive psychology to argue that the health of our democracy depends on our ability to disagree about important things while remaining friends.

He argues that individual citizens can dramatically improve the quality of our democracy by changing the way that we interact with one another. Each of his main chapters advances a single argument, supported by contemporary evidence and drawing on lessons from American history. The seven arguments at the heart of the book are: 1. We need to learn how to be better friends with people we disagree with. 2. We should disagree more with people we already consider our friends. 3. We should argue for things and not just against things. 4. We have a moral responsibility to try to persuade other people to adopt positions that we consider morally important. 5. We have to understand what constitutes a good argument if we want to do more than shout at people and call them names. 6. We must realize that we are wrong about a lot of things that we think we are right about. 7. We should treat people with charity and kindness, not out of a sense of moral duty (though that's OK too), but because these are good rhetorical strategies in a democratic society. For anyone disturbed by the increasingly coarse and confrontational tone of too much of our political dialogue, *We Must Not Be Enemies* provides an essential starting point to restore the values that have provided the foundation for America's tradition of democratic persuasion.

Laws

A lively dialogue between a foreign philosopher and a powerful statesman, Plato's *Laws* reflects the essence of the philosopher's reasoning on political theory and practice. It also embodies his mature and more practical ideas about a utopian republic. Plato's discourse ranges from everyday issues of criminal and matrimonial law to wider considerations involving the existence of the gods, the nature of the soul, and the problem of evil. This translation of Plato's *Laws* by the distinguished scholar Benjamin Jowett is an authoritative choice for students of philosophy, political science, and literature. It is included among Dover Publications' Philosophical Classics, a series that comprises the major works of ancient and modern world philosophy. Low-priced, high-quality, and unabridged, these editions are ideal for teachers and students as well as for general readers.

The Tragedy of Great Power Politics (Updated Edition)

"A superb book...Mearsheimer has made a significant contribution to our understanding of the behavior of great powers."—Barry R. Posen, *The National Interest* The updated edition of this classic treatise on the behavior of great powers takes a penetrating look at the question likely to dominate international relations in the twenty-first century: Can China rise peacefully? In clear, eloquent prose, John Mearsheimer explains why the answer is no: a rising China will seek to dominate Asia, while the United States, determined to remain the world's sole regional hegemon, will go to great lengths to prevent that from happening. The tragedy of great power politics is inescapable.

A Discourse on Inequality

In *A Discourse on Inequality*, Rousseau sets out to demonstrate how the growth of civilization corrupts man's natural happiness and freedom by creating artificial inequalities of wealth, power and social privilege. Contending that primitive man was equal to his fellows, Rousseau believed that as societies become more sophisticated, the strongest and most intelligent members of the community gain an unnatural advantage over their weaker brethren, and that constitutions set up to rectify these imbalances through peace and justice in fact do nothing but perpetuate them. Rousseau's political and social arguments in the *Discourse* were a hugely influential denunciation of the social conditions of his time and one of the most revolutionary documents of the eighteenth-century. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the

The 48 Laws of Power

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

A War Like No Other

One of our most provocative military historians, Victor Davis Hanson has given us painstakingly researched and pathbreaking accounts of wars ranging from classical antiquity to the twenty-first century. Now he juxtaposes an ancient conflict with our most urgent modern concerns to create his most engrossing work to date, *A War Like No Other*. Over the course of a generation, the Hellenic city-states of Athens and Sparta fought a bloody conflict that resulted in the collapse of Athens and the end of its golden age. Thucydides wrote the standard history of the Peloponnesian War, which has given readers throughout the ages a vivid and authoritative narrative. But Hanson offers readers something new: a complete chronological account that reflects the political background of the time, the strategic thinking of the combatants, the misery of battle in multifaceted theaters, and important insight into how these events echo in the present. Hanson compellingly portrays the ways Athens and Sparta fought on land and sea, in city and countryside, and details their employment of the full scope of conventional and nonconventional tactics, from sieges to targeted assassinations, torture, and terrorism. He also assesses the crucial roles played by warriors such as Pericles and Lysander, artists, among them Aristophanes, and thinkers including Sophocles and Plato. Hanson’s perceptive analysis of events and personalities raises many thought-provoking questions: Were Athens and Sparta like America and Russia, two superpowers battling to the death? Is the Peloponnesian War echoed in the endless, frustrating conflicts of Vietnam, Northern Ireland, and the current Middle East? Or was it more like America’s own Civil War, a brutal rift that rent the fabric of a glorious society, or even this century’s “red state—blue state” schism between liberals and conservatives, a cultural war that manifestly controls military policies? Hanson daringly brings the facts to life and unearths the often surprising ways in which the past informs the present. Brilliantly researched, dynamically written, *A War Like No Other* is like no other history of this important war.

Mythologies

“No denunciation without its proper instrument of close analysis,” Roland Barthes wrote in his preface to *Mythologies*. There is no more proper instrument of analysis of our contemporary myths than this book—one of the most significant works in French theory, and one that has transformed the way readers and philosophers view the world around them.

Commentary On Singapore, Volume 1: Foreign Policy, Governance And Leadership

Thought-leaders contributing to this volume include Tommy Koh, Tan Tai Yong, Kishore Mahbubani, Bilahari Kausikan, Han Fook Kwang, and more! This volume comprises essays by Singapore thought-leaders republished from various issues of Commentary, the annual journal of the National University of Singapore Society. In the first section, chapters have been curated to provide historical context and analyses of Singapore's foreign policy. The second section presents views on the orientation, values and interests the new, fourth generation of national leaders might have to adopt as they address the emerging challenges in this policy domain so critical to the city-state's survival. These highly accessible essays provide the general reader valuable grounding and frameworks for thinking about Singapore's approach in navigating the geopolitical shifts in its Asian neighbourhood.

Shifting Terrain

Shifting Terrain places contemporary political, economic, and social questions in long-range historical context. An essay on the new American imperialism is set against one that considers enduring lessons from Thucydides on the hubris of empire. The deep Lockean liberal structure of American politics is treated, along with a case history of the labor movement. Essays on child labor, hunger and poverty explore topics in world political economy as it affects the most dispossessed.

From Slaves to Oil

Famine, drought, internecine wars, corrupt leaders and culture have all been postulated as the cause of African underdevelopment despite its enormous wealth of resources. These myths are a smokescreen for the major causes of poverty, malnutrition, lack of amenities and death in Africa which has been the rapacious looting of the African continent for centuries by Western Powers. In the early twentieth century, King Leopold of Belgium slaughtered ten million Congolese in order to purloin rubber for the nascent automobile industry. One century later, United States, Belgium and France were responsible for the deaths of five million Congolese to gain free access to the vast riches of its resources such as gold, diamonds and, in particular coltan, an essential ingredient in electronic devices. This book explodes many of the myths about the fate of Africa which hide the truth about American and European interference in the development of the continent such as the context of the Black Hawk Down incident in Somalia, responsibility for the Rwanda Genocide, the origins of Boko Haram in Nigeria and its kidnapping of young girls and the real cause of the \"humanitarian intervention\" in Libya. The greater European advancement in military prowess, political organization, strong naval capabilities, particularly during the colonial era, in conjunction with the greed permeating European economic zeitgeist empowered first Europe then America to exploit the continent for cheap or free labor, bases, allies, markets, investments and resources. As a result of this exploitation, African

nations are among the poorest on the planet, suffer the horrors of war on a regular basis, face the plight of hunger and disease more than anywhere else and lose more children before the age of five.

Is The People's Action Party Here To Stay?: Analysing The Resilience Of The One-party Dominant State In Singapore

This book examines the staying power of the People's Action Party, a political party that has governed Singapore since June 1959. A political titan with few chinks in its armour, the party has kept winning elections under three prime ministers and Singapore is about to witness a transition to the fourth prime minister. The party's seemingly unstoppable sterling performance makes the issue of the durability of the PAP highly critical. In light of the serious weakness of the Opposition and the strong performance legitimacy of the ruling party, it is worthwhile asking the question, can the PAP stumble and fall? Addressing this question is highly relevant given that similar political parties and structures have almost all collapsed elsewhere — the Barisan Nasional as the latest casualty with its defeat in Malaysia's 2018 General Elections. With an extensive coverage on domestic and international issues, up-to-date developments on the finalisation of the PAP's 4G leadership, the Workers' Party town council saga, and the efforts to form an opposition coalition led by Tan Cheng Bock are also analysed in this book.

Advances in Cross-Cultural Decision Making

The Cross-Cultural Decision Making (CCDM) research focuses on improved decision making across a variety of cultural constructs, including geographical, historical, sociological, organizational, team, and technology interactions. This includes the research of experts and industry practitioners from multidisciplinary backgrounds, including sociology, linguistics, human-computer interaction, human factors engineering, systems engineering, military science, psychology, neuroscience, instructional design, and education, who showcase the latest advances in our understanding of the role of culture on decision making in numerous settings. Improved decision making among members of diverse teams and within organizational systems, and innovative ways to measure and assess that process, comprise the foundation for many projects discussed in these volumes. The influence of culture on decision making is pervasive, as reflected in the diverse disciplines represented by those individuals and entities involved in sociocultural research and engineering. This CCDM book features papers that discuss emerging concepts, theories, and applications of cross-cultural decision making knowledge. The work described in these chapters reflects dedicated research by a wide range of expert academics and practitioners from around the world.

Singapore Perspectives: Politics

As in other societies, Singapore's politics can be described either in terms of the political parties that have competed for power over the course of its history, or in terms of the citizens who have defined our polity and have driven our democratic processes. Naturally, as Singaporeans have become better informed and more engaged in fashioning their own future, the nature of the contest among the political parties has also shifted. This book is a collection of speeches presented at Singapore Perspectives 2020 by Deputy Prime Minister and Minister for Finance Heng Swee Keat, as well as Minister for Trade and Industry Chan Chun Sing. It also features speeches and discussions by public intellectuals and civic leaders. Each speaker presents a perspective on their 'experience' of politics, both in the traditional sense of elections and governance as well as beyond those formal structures.
