The State of World Fisheries and Aquaculture 2018

The 2018 edition of The State of World Fisheries and Aquaculture emphasizes the sector's role in achieving the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, and measurement of progress towards these goals. It notes the particular contributions of inland and small-scale fisheries, and highlights the importance of rights-based governance for equitable and inclusive development. As in past editions, the publication begins with a global analysis of trends in fisheries and aquaculture production, stocks, processing and use, trade and consumption, based on the latest official statistics, along with a review of the status of the world's fishing fleets and human engagement and governance in the sector. Topics explored in Parts 2 to 4 include aquatic biodiversity; the ecosystem approach to fisheries and to aquaculture; climate change impacts and responses; the sector's contribution to food security and human nutrition; and issues related to international trade, consumer protection and sustainable value chains. Global developments in combating illegal, unreported and unregulated fishing, selected ocean pollution concerns and FAO's efforts to improve capture fishery data are also discussed. The issue concludes with the outlook for the sector, including projections to 2030. As always, The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience, including policy-makers, managers, scientists, stakeholders and indeed all those interested in the fisheries and aquaculture sector.

Forest Products Annual Market Review 2018-2019

Achieving the UN Sustainable Development Goals by 2030 will, to a great degree, depend on implementing a "circular economy". In the forest sector, this relates to how we manage forests and use forest products. The Forest Products Annual Market Review covers recent trends, policies and market intelligence on forest products along with production, consumption and trade statistics for the UNECE region; all of which are critical to the role of forests in creating a more circular economy.

Annual Report on the Development of the Indian Ocean Region (2018)

The report was written by senior scholars of international studies and Indian Ocean studies and focuses on international relations in Indian Ocean region and covers many aspects of "Indo-Pacific". The report includes both strategic review and major events and related data in this region. This book also includes the origin, the aims, frameworks and regional and global impact of "Indo-Pacific". The book includes the authors from 5 different institutes in China which provide readers with a full and authentic picture of "Indo-Pacific" most recent development. This year's Annual Report is the Sixth of this kind and the only one which covers exclusive on the Indian Ocean region in China.

Melville's Taxation: Finance Act 2018

This edition brings the book completely up to date with the provisions of Finance (No.2) Act 2017 and Finance Act 2018, including: • Making Tax Digital (MTD) developments • Scottish rates of income tax • Reduction in the dividend allowance • Gift Aid donor benefit rules • Cash basis for property income • Mileage rates for landlords • Reforms to venture capital schemes • Increase in the diesel supplement •

Increase in R&D expenditure credit • Freezing of indexation allowance • Reform of corporation tax loss relief • Freezing of VAT registration threshold

Tuberculosis – The Singapore Experience, 1867–2018

Through a rich account of tuberculosis in Singapore from the mid-nineteenth century to the present day, this book charts the relationship between disease, society and the state, outlining the struggles of colonial and post-colonial governments to cope with widespread disease and to establish effective public health programmes and institutions. Beginning in the nineteenth century when British colonial administrators viewed tuberculosis as a racial problem linked to the poverty, housing and insanitary habits of the Chinese working class, the book goes on to examine the ambitious medical and urban improvement initiatives of the returning British colonial government after the Second World War. It then considers the continuation and growth of these schemes in the post-colonial period and explores the most recent developments which include combating the resurgence of TB and the rise of antimicrobial resistance.

Stern'S Guide to the Cruise Vacation: 2018 Edition

The extent of detail given . . . is good not only for the novice cruiser finding their way around . . . but also for the veteran cruiser who wants to know the latest about the newest ships (CyberCruises.com). This is the book with which to gain a full and thorough understanding of the wonderful world of cruising. Repeat cruisers and novices alike will gain from the volume of featuresmenus, daily schedules, photos, as well as details on every cruise ship and port of call throughout the world. This should be the encyclopedia for any cruise aficionado (World of Cruising). People who've never cruised beforeor those who have, but find themselves faced with a confusing onslaught of new shipsneed to know a great deal, and this book goes a long way in providing it (Chicago Tribune). Sterns Guide to the Cruise Vacation is one of the most comprehensive authorities and a must-have for both the novice and the seasoned cruiser (Porthole Magazine).

TALIS 2018 Results (Volume II) Teachers and School Leaders as Valued Professionals

This report aims to provide an in-depth analysis of teachers' and school leaders' perceptions of the value of their profession, their work-related well-being and stress, and their satisfaction with their working conditions. It also offers a description of teachers' and school leaders' contractual arrangements, opportunities to engage in professional tasks such as collaborative teamwork, autonomous decision making, and leadership practices.

India Emerging

India, like most democratic developing nations, is prone to populist politics. In the search of votes, politicians look for popular solutions with mass appeal. Some popular solutions benefit the poor, some hurt the economy. Poor economics leads to falling numbers. Falling numbers get statistically captured as economic data. And, the impact of such economic data is immense. This data can lift or crash currency markets, stock markets, affect credit ratings, fuel inflation, affect new investments and even result in mass layoffs. However, there is always a story behind the data. These stories are guided mostly by executive decisions. Some decisions are far-reaching and beneficial to the masses, some cater to political vote banks, some are guided by increasing activism, some serve the need for social justice, some are aimed at environmental protection, while some are simply driven by the greed of power or wealth. This is the story of every regime. The book narrates this compelling data story in a layman's language. Even where data is wrong it leaves behind a tell-tale mark of anomalies, which trips the economy sooner than later. Fudged, incorrect or lazily collected data is worse than genuine but unimpressive data as you do not know what to correct. India Emerging thus captures this dialogue on the pros and cons of economic and political decisions that can be understood by the common voter who is neither an economist nor an academician.

Proceedings of 10th World Congress on Medicinal Chemistry & Drug Design 2018

June 14-15, 2018 Barcelona, Spain Key Topics : Medicinal Chemistry, Pharmaceutical Sciences, Drug Design and Drug Development, CADD (Computer Aided Drug Design), Bioorganic and Medicinal Chemistry, Pharmacology and toxicology, Anticancer agents in Medicinal Chemistry, Analytical Chemistry, Pharmaceutical Industry, Organic Chemistry, Clinical Pharmacology, Evolution of Organic and Medicinal Chemistry in Pharma, Organic and Medicinal Chemistry Technologies for Drug Discovery, QSAR (Quantitative Structure-Activity Relationship) Fragment-Based Drug Design, Applications of Organic and Medicinal Chemistry in Drug Discovery, Market Dynamics, Conclusions and Future Trends, Medicinal Plants,

Achieving the Sustainable Development Goals Through Sustainable Food Systems

This publication offers a systemic analysis of sustainability in the food system, taking as its framework the Sustainable Development Goals of the 2030 Agenda of the United Nations. Targeted chapters from experts in the field cover main challenges in the food system and propose methods for achieving long term sustainability. Authors focus on how sustainability can be achieved along the whole food chain and in different contexts. Timely issues such as food security, climate change and migration and sustainable agriculture are discussed in depth. The volume is unique in its multidisciplinary and multi-stakeholder approach. Chapter authors come from a variety of backgrounds, and authors include academic professors, members of CSO and other international organizations, and policy makers. This plurality allows for a nuanced analysis of sustainability goals and practices from a variety of perspectives, making the book useful to a wide range of readers working in different areas related to sustainability and food production. The book is targeted towards the academic community and practitioners in the policy, international cooperation, nutrition, geography, and social sciences fields. Professors teaching in nutrition, food technology, food sociology, geography, global economics, food systems, agriculture and agronomy, and political science and international cooperation may find this to be a useful supplemental text in their courses.

Malaysia's 14th General Election and UMNO's Fall

The 2018 Malaysian General Election will stand as a major defining event in Malaysian history, when the ruling Barisan Nasional coalition unexpectedly lost power in the country they had ruled for over half a century. This volume brings together scholars who assess one fundamental factor that brought about this game-changing event in Malaysian politics: intra-elite feuding in the leading Malay-based political parties. This study provides an analysis of individual state politics as well as national trends shaped by the actions of leaders in government and the opposition. An indispensable guide for scholars studying the politics of Malaysia and of Southeast Asia more broadly, it will be of great interest for all readers with an interest in Malaysian politics.

Case Digest on Insolvency and Bankruptcy Code, 2016

This book consolidates the judgments and orders passed by the Supreme Court, High Courts across India and the Tribunal including Appellate Tribunal during January 2019 - December 2019 in the form of a digest based on qualitative research. The cases have been presented in a comprehensible manner under each provision giving the essence of the judgment in a concise manner. The insolvency practitioners, judicial officers, regulators and other stakeholders will find the IBC digest extremely useful in their endeavours. Key features Covers gist of more than 700 judgements and orders Cover judgements and orders passed during January 2019 - December 2019 For easy reference, table of cases arranged: – Section-wise – Alphabet-wise – Authority-wise Conclusive heading/topic allocated to all cases digested Includes updated text of Insolvency and Bankruptcy Code, 2016 with footnotes

Science Education in Countries Along the Belt & Road

This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries and European countries,. We invited science education experts from 29 “Belt and Road” countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Discuss new insights of science education in future years; 3) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road.

Area-Wide Management of Fruit Fly Pests

Fruit fly (Diptera: Tephritidae) pests have a profound impact on horticultural production and economy of many countries. It is fundamental to understand their biology and evaluate methods for their suppression, containment, or eradication. Area-Wide Management of Fruit Fly Pests comprises contributions from scientists from around the world on several species of tephritids working on diverse subjects with a focus on area-wide management of these pests. The first three sections of the book explore aspects of the biology, ecology, physiology, behavior, taxonomy, and morphology of fruit flies. The next two sections provide evidence on the efficacy of attractants, risk assessment, quarantine, and post-harvest control methods. The fifth and sixth sections examine biological control methods such as the Sterile Insect Technique and the use of natural enemies of fruit flies. The seventh section focuses on area-wide integrated pest management and action programs. Finally, the eighth section examines social, economic, and policy issues of action programs aimed at involving the wider community in the control of these pests and facilitate the development of control programs. Features: Presents information on the biology of tephritid flies. Provides knowledge on the use of natural enemies of fruit flies for their biological control. Includes research results on models and diets used for the Sterile Insect Technique. Reports developments on the chemical ecology of fruit flies that contribute to make control methods more specific and efficient. Reviews subjects such as Holistic Pest Management and Area-Wide Management Programs including social, economic, and policy issues in various countries. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/9780429355738>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Mandated Corporate Social Responsibility

This book examines the Indian mandate for Corporate Social Responsibility (CSR) and its implementations in various individual organizations. Although the mandate is applicable only to certain large and stable companies, many believe that India is poised to become the birthplace of social, economic and environmental transformation, given the immense size of the Indian population and its challenging socio-economic index. The book explores the various facets of CSR investigation and places special emphasis on the Schedule VII of the Indian Companies Act of 2013, which defines specific areas of intervention for these companies. In addition, it provides a wealth of first-hand case studies that exemplify the ongoing developments and the fundamental challenges and opportunities of mandated CSR.

Enhancing Healthcare and Rehabilitation

Summary Description This book is primarily a celebration of the qualitative work undertaken internationally by a number of experienced researchers. It also focuses on developing the use of qualitative research for health and rehabilitative practitioners by recognizing its value methodologically and empirically. We find that the very nature of qualitative research offers an array of opportunities for researchers in being able to understand the social world around us. Further, through experience and discussion, this book identifies the multifaceted use of qualitative methods in the healthcare and rehabilitative setting. This book touches on the

role of the researcher, the participants involved, and the research environment. In short, we see how these three central elements can affect the nature of qualitative work in attempts to offer originality. This text speaks to a number of audiences. Students who are writing undergraduate dissertations and research proposals, they may find the myriad of examples stimulating and may support the rationale for methodological decisions in their own work. For academics, practitioners, and prospective qualitative researchers this book also aims to demonstrate an array of opportunism in the field of qualitative research and how they may resonate with arguments proffered. It is anticipated that readers will find this collection of qualitative examples not only useful for informing their own research, but we also hope to enlighten new discussions and arguments regarding both methodological and empirical use of qualitative work internationally. Features Encompasses the importance of qualitative research and how it can be used to facilitate healthcare and rehabilitation across a wide range of health conditions. Evaluates empirical data whilst critically applying it to contemporary practices. Provides readers with an overview with future directions and influence policy makers in order to develop practice. Focuses on an array of health conditions that can affect groups of the population, coincided with life issues and the care and family support received. Offers innovative methodological insights for prospective researchers in order to add to the existing evidence base.

Educating for Critical Consciousness

In this politically and democratically urgent collection, George Yancy and contributors argue that more than ever, we are in need of classrooms that function \"dangerously\"—that is, classrooms where people are not afraid to engage in critical discussions that call into question difficult political times. Collectively they demonstrate the ways activist authors and scholars must be prepared to engage in risk and vulnerability as a defense of our democratic right to practice forms of pedagogical transgression. Ideal for scholars and students of critical pedagogy, philosophy of education, and political theory, this collection delineates the necessity of critical consciousness through education, and provides ways of speaking back against authoritarian control of imaginative and critical capacities.

The Handbook of Cross-Border Ethnic and Religious Affinities

Increasingly, ethnic and religious variables are taken into account to explain conflict and relations between nations. However, ethnic and religious groups exist beyond the confines of frontiers. In Africa, for example, hundreds of ethnic groups were divided by colonial borders, and many retained kinship connections to their brethren in other countries, thus creating “cross-border ethnic/religious affinity.” Such cross-border connections affect a variety of foreign policy, from diplomacy to the use of force. An internal problem can spread to other states, or external actors can become involved in domestic disputes due to such factors. Therefore data on cross-border connections are essential to measure and assess their actual or potential effects on foreign policy or conflict. This unique resource serves both qualitative and quantitative researchers. For ease of use, it is divided in sections for each region of world, with the entries organized by pairs of contiguous countries. Each entry for a pair of countries briefly discusses the ethnic and religious groups that are common to both countries and the historical and current connections between these groups. The entries are organized based on the Correlates of War country codes, which are widely used by researchers and allow for country pairs to be organized geographically within each section to facilitate easy use of the data.

Costa Rica

This 2019 Article IV Consultation highlights that Costa Rican government recognizes the challenges and is planning a broad array of measures, although the political and social environment remains difficult. The Consultation focused on policies that would help restore fiscal sustainability, strengthen the inflation targeting framework, enhance resilience of the financial system, and boost potential and inclusive growth. The fiscal reform constitutes a critical step towards restoring fiscal sustainability, but full and timely

implementation is key. Further frontloaded fiscal consolidation, based largely on revenue measures, should be implemented to further reduce debt and financing pressures, while taking measures to protect the poor. It is also recommended that monetary policy should continue to remain data dependent and balance downside risks to inflation stemming from slower activity and upside risks to inflation arising from tighter global financial conditions. Structural reforms, including those planned under the Organisation for Economic Co-operation and Development accession process should be implemented to improve competitiveness and foster inclusive growth.

How to Practice Mayan Astrology

A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

Vegetarianism and Veganism

This detailed and comprehensive overview of meat-free diets introduces readers to their long history in human cultures and analyzes some of the important questions and issues surrounding their practice in today's world. Vegetarianism and Veganism: A Reference Handbook provides a history and background of vegetarianism and veganism from prehistorical times to the present day, along with detailed discussions of the practice in each historical period since that time. The ancillary chapters provide additional information on important individuals and organizations in the field, relevant data and documents on the topic, an annotated bibliography, a chronology of important events, and a glossary of terms likely to be encountered in the field. Of special interest is the Perspectives chapter, in which stakeholders in the topic write about some specific aspect of its importance in their own lives. Intended for high school, college, and general readers, the volume covers the field of vegetarianism and veganism in cultures from around the world. Some specific topics include ancient views of vegetarianism, religious stands on the practice, the growth of vegetarian and vegan institutions, and current controversies over the practice of meat-free diets. It also includes a host of resources that readers can use to continue their own research in the field.

The CAADP 2020 biennial review: Why many countries are off-track

This note analyzes the trajectory of the benchmark and its implications for the effort required of countries to remain on-track or get on-track toward achieving the goals and targets of the Malabo Declaration by 2025. It also analyzes the change in the overall score obtained by different countries between the 2018 and 2020 BRs by decomposing the contribution of different indicators to the change. This helps to explain why fewer countries were on-track in the 2020 BR compared to the 2018 BR. The note concludes with a look at the potential challenges countries may face, most notably those brought on by the COVID-19 pandemic, and prospects for them to remain or get on-track in future BRs.

The Bitcoin Dystopia

Bitcoin, the brainchild of Satoshi Nakamoto, is as unfathomable as its elusive creator. Is it an instrument of exchange, like currency notes, or is it an investment tool? While many of us could still be grappling with the concept of cryptocurrency, fortunes have already been built and lost; lives have been impacted and, in some cases, ruined in this whole new uncharted universe of digital money. Piecing together published information from various sources, *The Bitcoin Dystopia: The Prelude* offers a bird's eye view of the current state of affairs with regard to cryptocurrency and the larger world in which it is situated. At the same time, the book makes a bold prediction about the future of the world through a provocative storytelling approach that is atypical of non-fiction. Bitcoin is unorthodox and any attempt to grasp its impact should be anything but conventional.

The Cup of Coffee Club

"This is one of the very best baseball books in years." Booklist, Starred Review Reaching the major leagues is a pipe dream for most young baseball players in America. Very few ever get to live it out. A select number of those players face the elation and frustration of getting to play in just one major league game. *The Cup of Coffee Club: 11 Players and Their Brush with Baseball History* tells the unique stories of eleven of these players. It details their struggles to reach the major leagues, their one moment in the limelight, and their struggles to get back. They include a former Major League Baseball manager, the son of a Baseball Hall of Famer, and two different brothers of Hall of Famers. Exclusive interviews with each of the players provide insight into what that single seminal moment meant and how they dealt with the blow of never making another major league appearance again. Spanning half a century of baseball, each player's journey to Major League Baseball is distinct, as is each of their responses to having played in just a single game. *The Cup of Coffee Club* shares their unique perspectives, providing a better understanding of just how special each major league game can be.

Proceedings of the 5th International Conference on Decision Support System Technology – ICDSST 2019 & EURO Mini Conference 2019

Beyond Decommissioning: The Reuse and Redevelopment of Nuclear Installations presents the most up-to-date research and guidance on the reuse and redevelopment of nuclear plants and sites. Consultant Michele Laraia extensively builds upon experience from the redevelopment of non-nuclear industrial sites, a technical field that has considerably predated nuclear applications, to help the reader gain a very thorough and practical understanding of the redevelopment opportunities for decommissioned nuclear sites. Laraia emphasizes the socioeconomic and financial benefits from very early planning for site reuse, including how to manage the decommissioning transition, anticipate financial issues, and effectively utilize available resources. With an increasing number of decommissioning projects being conducted worldwide, it is critical that knowledge gained by experts with hands-on experience is passed on to the younger generation of nuclear professionals. Besides, this book describes the experiences of non-nuclear organizations that have reutilized the human, financial, and physical site assets, with adaptations, for a new productive mission, making it a key reference for all parties associated with nuclear operation and decommissioning. Those responsible for nuclear operation and decommissioning are encouraged to incorporate site reuse within an integrated, beginning-to-end view of their projects. The book also appeals to nuclear regulators as it highlights more opportunities to complete nuclear decommissioning safely, speedily, and in the best interests of all concerned parties. - Includes lessons learned from worldwide case studies of reuse and repurposing of nuclear plants from both the nuclear and non-nuclear industries - Provides practical guidance on a broad-spectrum of factors and opportunities for nuclear decommissioning - Identifies the roles and responsibilities of parties involved, including nuclear operators, regulators and authorities, land planners and environmentalists

Beyond Decommissioning

The Internet of Things (IoT) is a network of devices and smart things that provides a pervasive environment in which people can interact with both the cyber and physical worlds. As the number and variety of connected objects continue to grow and the devices themselves become smarter, users' expectations in terms of adaptive and self-governing digital environments are also on the rise. Although, this connectivity and the resultant smarter living is highly attractive to general public and profitable for the industry, there are also inherent concerns. The most challenging of these refer to the privacy and security of data, user trust of the digital systems, and relevant authentication mechanisms. These aspects call for novel network architectures and middleware platforms based on new communication technologies; as well as the adoption of novel context-aware management approaches and more efficient tools and devices. In this context, this book explores central issues of privacy, security and trust with regard to the IoT environments, as well as technical solutions to help address them. The main topics covered include:

- Basic concepts, principles and related technologies
- Security/privacy of data, and trust issues
- Mechanisms for security, privacy, trust and authentication
- Success indicators, performance metrics and future directions.

This reference text is aimed at supporting a number of potential audiences, including

- Network Specialists, Hardware Engineers and Security Experts
- Students, Researchers, Academics and Practitioners.

Security, Privacy and Trust in the IoT Environment

This volume explores the two themes of equity in employment for Muslim women, and the identity and aspirations of Muslim youth in an age of Islamophobia in Western countries through conceptual and empirical studies of employment discrimination and alienation in the UK and the Netherlands. To these accounts are added a worldwide perspective on how women (and especially ethnic minority and Muslim women) experience, and try to overcome ethno-religious discrimination in entry to employment. The themes of Muslim women and youth struggling to survive are illustrated by accounts of teachers from Gaza who are providing 'alternative families' for children traumatised and orphaned through Israeli attacks. The idea of peaceful resistance, and Islamic patience in the face of persecution is developed throughout the book, and applied in a variety of settings.

Muslim Women Seeking Power, Muslim Youth Seeking Justice

If you want to make money in the stock market, all the information in the world will not help unless you do some research, devise a game plan, and stay focused. John Connelly shares formulas that can help you determine the trend – bullish or bearish – of an index or security in this trading guide. His system will help you take advantage of price momentum and limit exposure when momentum moves against you. By using the strategies in this guide, you'll be able to:

- identify sector leaders that will likely outperform the S&P 500 index;
- find free tools and technical indicators to use in your research;
- remove emotional aspects of investing that reduce returns.

The book tracks five major markets and fifty-five different indexes around the world by region and country. It also highlights how options, calls, and puts can maximize your chance to make money while minimizing risk. By focusing on when an index or security changes direction and confirming the change has occurred, you can capture the majority of moves. Find out how to do it step by step and start walking down a path that leads to stock market riches.

San Francisco Blue Book; the Fashionable Private Address Directory, San Francisco-Oakland-Berkeley-Alameda

This book makes an original contribution to our knowledge of the world's major defence industries. Experts from a wide range of different countries – from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea – describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation's defence spending, its spending on defence R&D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and

performance of the industry. The analysis of 'structure' includes discussions of entry conditions, domestic monopoly/oligopoly structures and opportunities for competition. The section on 'conduct' analyses price/non-price competition, including private and state funded R&D, and 'performance' incorporates profitability, imports and exports together with spin-offs and technical progress. The conclusion explores the future prospects for each nation's defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years' time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

Tech Smart

"This book focuses on the different challenges and opportunities for social transformation in India, Myanmar and Thailand, by centering communities and individuals as the main drivers of change. In doing so, it includes discussions on a wide array of issues including women's empowerment and political participation, ethno-religious tensions, plurilingualism, education reform, community-based healthcare, climate change, disaster management, ecological systems, and vulnerability reduction. Two core foundations are introduced for ensuring broader transformations. The first is the academic diplomacy project – a framework for an engaged academic enquiry focusing on causative, curative, transformative, and promotive factors. The second is a community driven collective struggle that serves as a grassroots possibility to facilitate positive social transformation by using locally available resources and enabling the participation of the resident population. As a whole, the book conveys the importance of a diversification of engagement at the grassroots level to strengthen the capacity of individuals as decisive stakeholders, where the process of social transformation makes communities more interconnected, interdependent, multicultural and vital in building an inclusive society."

The Economics of the Global Defence Industry

Frequent and fair elections, open to all, are fundamental elements of a democracy. The United States, through its local, state, and national contests, holds more elections, more often, than any other democracy in the world. But in recent years, there have been troubling signs that our system of campaigns and elections has become much more fragile than we had previously thought. More specifically, in the past twenty years, campaigns have changed profoundly: social media and viral messaging compete with traditional media, races once considered local in nature have become nationalized, Supreme Court decisions on campaign finance law now encourage mega-donors, voters are more polarized, party affiliation has waned, and the middle ideological ground has given way to extremist language and voter rage. Twice in sixteen years we have seen winning presidential candidates gaining fewer popular votes than their opponents. The fundamental right of every citizen to vote has been impeded by state legislatures demanding tighter access, more identification, and accusations of voter fraud. And we have faced the real threat of foreign influence in our national elections. This book offers the most up-to-date examination of campaigns and elections, including the challenges and opportunities they present. It addresses fundamental questions about who votes in American elections, how legislative districts are reapportioned and why it matters, the realities of voter fraud, the pros and cons of reforming the Electoral College, the impact of dark money on campaigns, and the role of political consultants and specialists, among other topics. Given the fragility of our election process, what are the threats to a healthy American democracy? Do the candidates with the most money always win? This is not simply a book on how campaigns are run, but why campaigns and elections are integral components of American democracy and how those fundamental elements may be vulnerable to misuse.

Social Transformations in India, Myanmar, and Thailand: Volume I

The SAGE Handbook of the 21st Century City focuses on the dynamics and disruptions of the contemporary city in relation to capricious processes of global urbanisation, mutation and resistance. An international range of scholars engage with emerging urban conditions and inequalities in experimental ways, speaking to new

ideas of what constitutes the urban, highlighting empirical explorations and expanding on contributions to policy and design. The handbook is organised around nine key themes, through which familiar analytic categories of race, gender and class, as well as binaries such as the urban/rural, are readdressed. These thematic sections together capture the volatile processes and intricacies of urbanisation that reveal the turbulent nature of our early twenty-first century: Hierarchy: Elites and Evictions Productivity: Over-investment and Abandonment Authority: Governance and Mobilisations Volatility: Disruption and Adaptation Conflict: Vulnerability and Insurgency Provisionality: Infrastructure and Incrementalism Mobility: Re-bordering and De-bordering Civility: Contestation and Encounter Design: Speculation and Imagination This is a provocative, inter-disciplinary handbook for all academics and researchers interested in contemporary urban studies.

Campaigns and Elections

This eBook consists of 5 titles: Computerised Accounting (UBS Accounting) Level 1 Computerised Accounting (UBS Accounting) Level 2 Computerised Accounting (AutoCount) Level 1 Computerised Accounting (AutoCount) Level 2 Computerised Accounting (SQL Accounting)

The SAGE Handbook of the 21st Century City

The concept of risk in global life has not been fully understood and explored and this book attempts to examine what it entails in the fast changing, interconnected and complex world. As a foundational component of safety systems, risk has been considered relatively simple, predictable, and therefore, assessable and manageable phenomenon. Social and political sciences prefer the terminology of security to capture the dimension of risk which is more complex and more consequential to survival. Risk has become more human-made and intentional today, and this book explores innovative approaches and engages in theoretical and policy debates to capture its political and security dimensions.

Computerised Accounting Applications: UBS Accounting, AutoCount, SQL Accounting (5 in 1 eBooks)

One Arab country after another is signing historic, game-changing peace, trade, investment, and tourism deals with Israel. At the same time, Russia, Iran, and Turkey are forming a highly dangerous alliance that could threaten the Western powers. Rosenberg explains the sometimes encouraging, sometimes violent, yet rapidly shifting landscape in Israel and the Arab/Muslim world. He introduce readers to some of the most complex and controversial leaders in the world, and explores the future of religion-- and peace-- in the Middle East. -- adapted from jacket

Security and Safety in the Era of Global Risks

Canada's Constitution Act (1982) recognises three Indigenous groups: Indians (now referred to as First Nations), Inuit, and Métis. Indigenous peoples make a vital contribution to the culture, heritage and economic development of Canada. Despite improvements in Indigenous well-being in recent decades, significant gaps remain with the non-Indigenous population. This study focuses on four priority issues to maximise the potential of Indigenous economies in Canada.
