

2020

India 2020

In this ground-breaking vision document, first published in 1998, Dr A.P.J. Abdul Kalam and Y.S. Rajan offer a blueprint for India to be counted among the world's top five economic powers by the year 2020. They cite growth rates and development trends to show that the goal is not unrealistic. Past successes—the green revolution and satellite-based communication linking remote regions of the country, for instance—bear them out. The same sense of purpose can make us a prosperous, strong nation in a matter of years, assert Kalam and Rajan. This is a book that every citizen who hopes for a better India must read.

Economic Outlook for Southeast Asia, China and India 2020 – Update Meeting the Challenges of COVID-19

The Economic Outlook for Southeast Asia, China and India is a bi-annual publication on regional economic growth, development and regional integration in Emerging Asia. The update of the Outlook comprises three main parts, each highlighting a particular dimension of recent economic developments in the region.

The English Prison Health System After a Decade of Austerity, 2010-2020

Austerity has reconfigured and scaled back the governance and delivery of public services and negatively affected society's most vulnerable groups. This book opens up the closed world of English prisons to examine its impact on prison health governance and healthcare delivery. It argues that austerity has been a decade-long, large-scale political experiment that has caused debt to balloon, eroded the prison health system and perpetuated a cycle of punishment resulting in sicker prisoners. In short, austerity has violated prisoners' human rights. Drawing on interviews and data from existing longitudinal and economic analyses, the book demonstrates how austerity has resulted in high rates of recidivism, diminished what remains of the welfare state, and increased inequality and punitiveness. Despite a decade of failure, there is a marked political reluctance to dispense with austerity, and the governmental juggernaut continues to produce the same result. As the spectre of recession increases, caused in part by Brexit and COVID-19, these failures are ever more perilous. This book blends the interdisciplinary perspectives of criminology, public health, sociology, law, social policy, politics, and economics to enable greater understanding of the impact of austerity on health governance, prison healthcare, the prison workforce, and prisoners' health and safety. It challenges current policy, practice and thinking, and is a must read for anyone who wants to reflect on how the political economic structure can affect the governance and delivery of healthcare services in marginalised settings, beyond prisons, and indeed beyond England.

Pure Power - wind energy targets for 2020 and 2030

The Latin American Economic Outlook (LEO) 2020 focuses on the role of digital transformation in helping to navigate through challenging times. The Covid-19 pandemic is having a profound impact on socio-economic conditions, accentuating the already complex scenario faced by a region with significant structural weaknesses. This unprecedented crisis comes at a time of high aspirations and reinforces the need to transform the very foundations of the development model in the region.

Latin American Economic Outlook 2020 Digital Transformation for Building Back Better

Fabricate 2020 is the fourth title in the FABRICATE series on the theme of digital fabrication and published in conjunction with a triennial conference (London, April 2020). The book features cutting-edge built projects and work-in-progress from both academia and practice. It brings together pioneers in design and making from across the fields of architecture, construction, engineering, manufacturing, materials technology and computation. Fabricate 2020 includes 32 illustrated articles punctuated by four conversations between world-leading experts from design to engineering, discussing themes such as drawing-to-production, behavioural composites, robotic assembly, and digital craft.

Fabricate 2020

The Europe Union's massive efforts to rebuild after the coronavirus pandemic present a unique opportunity to transform its economy, making it more green and digital – and ultimately more competitive. The Investment Report 2020-2021 looks at the toll the pandemic took on European firms' investment and future plans, as well as their efforts to meet the demands of climate change and the digital revolution. The report's analysis is based on a unique set of databases and data from a survey of 12 500 firms conducted in the summer of 2020, in the midst of the COVID-19 crisis. While providing a snapshot of the heavy toll the pandemic took on some forms of investment, the report also offers hope by pointing out the economic areas in which Europe remains strong, such as technologies that combine green and digital innovation.

EIB Investment Report 2020/2021

Zaroon Al-Khuraishi was a scientist who often felt like this realm did not belong to him and he would perish soon just like his late mother who had killed herself due to depression when she came to know that her parents and brother had been influenced by the dreadful contagious disease. When his friend offered him something, which had a high chance of his demise, will he agree with the offer? Or will he decline? The author has penned down the events that happened in 2020 for the upcoming generations to read and to know what we all have gone through. This is a work of fiction where the author tries to portrait the events that happened during the world in 2020 through various imaginative dimensions possible. How people had suffered and why? What is the reason behind this horrendous pandemic? We all know that there is always a reason behind everything but what is the reason behind this pandemic? Is there anything which we have to do to overcome the calamities like this? Are we missing out on something?

The World In 2020

This book constitutes the refereed proceedings of the International Conference on Business and Technology (ICBT2021) organized by EuroMid Academy of Business & Technology (EMABT), held in Istanbul, between 06–07 November 2021. In response to the call for papers for ICBT2021, 485 papers were submitted for presentation and inclusion in the proceedings of the conference. After a careful blind refereeing process, 292 papers were selected for inclusion in the conference proceedings from forty countries. Each of these chapters was evaluated through an editorial board, and each chapter was passed through a double-blind peer-review process. The book highlights a range of topics in the fields of technology, entrepreneurship, business administration, accounting, and economics that can contribute to business development in countries, such as learning machines, artificial intelligence, big data, deep learning, game-based learning, management information system, accounting information system, knowledge management, entrepreneurship, and social enterprise, corporate social responsibility and sustainability, business policy and strategic management, international management and organizations, organizational behavior and HRM, operations management and logistics research, controversial issues in management and organizations, turnaround, corporate entrepreneurship, innovation, legal issues, business ethics, and firm governance, managerial accounting and firm financial affairs, non-traditional research, and creative methodologies. These proceedings are reflecting quality research contributing theoretical and practical implications, for those who are wise to apply the technology within any business sector. It is our hope that

the contribution of this book proceedings will be of the academic level which even decision-makers in the various economic and executive-level will get to appreciate.

Financial Technology (FinTech), Entrepreneurship, and Business Development

COVID-19 is profoundly affecting the ways in which we live, learn, plan, and develop. What does COVID-19 mean for the future of digital information use and delivery, and for more traditional forms of library provision? Libraries, Digital Information, and COVID gives immediate and long-term solutions for librarians responding to the challenge of COVID-19. The book helps library leaders prepare for a post-COVID-19 world, giving guidance on developing sustainable solutions. The need for sustainable digital access has now become acute, and while offering a physical space will remain important, current events are likely to trigger a shift toward off-site working and study, making online access to information more crucial. Libraries have already been providing access to digital information as a premium service. New forms and use of materials all serve to eliminate the need for direct contact in a physical space. Such spaces will come to be predicated on evolving systems of digital information, as critical needs are met by remote delivery of goods and services. Intensified financial pressure will also shape the future, with a reassessment of information and its commercial value. In response, there will be a massification of provision through increased cooperation and collaboration. These significant transitions are driving professionals to rethink and question their identities, values, and purpose. This book responds to these issues by examining the practicalities of running a library during and after the pandemic, answering questions such as: What do we know so far? How are institutions coping? Where are providers placing themselves on the digital/print and the remote/face-to-face continuums? This edited volume gives analysis and examples from around the globe on how libraries are managing to deliver access and services during COVID-19. This practical and thoughtful book provides a framework within which library directors and their staff can plan sustainable services and collections for an uncertain future. - Focuses on the immediate practicalities of service provision under COVID-19 - Considers longer-term strategic responses to emerging challenges - Identifies key concerns and problems for librarians and library leaders - Analyzes approaches to COVID-19 planning - Presents and examines exemplars of best practice from around the world - Offers practical models and a useful framework for the future

Libraries, Digital Information, and COVID

In 2020, the European Union faced the COVID-19 crisis. This book tells the unlikely story of how the European Union survived a crisis that arrived on the heels of a difficult decade during which the EU wrestled with repeated crises, from the Euro Area, to refugees, populism, and geopolitics. Against all odds, a divided polity with a weak centre and low competences in crucial policy domains, managed to overcome powerful disincentives to coordinate its way out of the pandemic and create central capacity building. Pandemic Polity-Building argues that this puzzling outcome stems from COVID-19's crisis characteristics and the EU's polity features. The relative symmetric nature of the pandemic and the deeply disruptive economic shocks revealed the potential long-term externalities of a lack of joint action at the European level. The EU coordinated a common vaccine procurement scheme and pooled its fiscal firepower. The polity perspective presented here shows how the EU overcame conflicts and managed to coordinate and create new capacity in its centre while relying on a new geography of solidarity within the EU. The polity approach allows the authors in this volume to show how the EU did not take a federal path to polity formation. Instead, it moved towards a polity that serves as an imperfect but solidaristic safety net for its member states. The polity approach thus allows this volume to present a firm analytical grasp over the complex crisis politics unleashed on the EU's compound polity. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations.

Pandemic Polity-Building

68 Company Book - PLASTIC AND RUBBER

This standard work is one of the leading authorities on Swiss arbitration law. The fully revised and supplemented Fifth Edition provides up-to-date information on the law and practice of international and domestic arbitration in Switzerland. The book provides a comprehensive analysis of all relevant aspects of arbitration, including the concept of arbitration, the sources of arbitration, arbitrability, and all aspects concerning the validity and scope of the arbitration agreement and its autonomy. Other topics include competence-competence, the jurisdiction of the arbitral tribunal, the arbitral procedure, the effects and limits of arbitral awards, setting aside as well as the recognition and enforcement of awards in Switzerland. Frequently referred to in the case law of the Swiss Federal Supreme Court, the book is an indispensable tool for legal scholars dealing in depth with a controversial issue. At the same time, it is an invaluable and user-friendly source of information and reference for arbitration practitioners in Switzerland and abroad. The book's appendices contain useful supplementary materials, including a detailed table of cases and an accurate translation of the arbitration provisions of the Swiss Private International Law Act and the Swiss Code of Civil Procedure.

International and Domestic Arbitration in Switzerland

This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries and European countries,. We invited science education experts from 29 “Belt and Road” countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Discuss new insights of science education in future years; 3) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road.

Science Education in Countries Along the Belt & Road

A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

How to Practice Mayan Astrology

International Business in Times of Crisis classifies studies of crises relevant to international business research following a global pandemic which exposed systems failures and fragilities closely across global economic, financial, political, and social systems.

International Business in Times of Crisis

This book discusses the applications, challenges, and future trends of machine learning in medical domain, including both basic and advanced topics. The book presents how machine learning is helpful in smooth conduction of administrative processes in hospitals, in treating infectious diseases, and in personalized medical treatments. The authors show how machine learning can also help make fast and more accurate disease diagnoses, easily identify patients, help in new types of therapies or treatments, model small-molecule drugs in pharmaceutical sector, and help with innovations via integrated technologies such as artificial intelligence as well as deep learning. The authors show how machine learning also improves the physician's and doctor's medical capabilities to better diagnosis their patients. This book illustrates advanced, innovative techniques, frameworks, concepts, and methodologies of machine learning that will enhance the efficiency and effectiveness of the healthcare system. Provides researchers in machine and deep learning with a conceptual understanding of various methodologies of implementing the technologies in medical areas; Discusses the role machine learning and IoT play into locating different virus and diseases across the globe, such as COVID-19, Ebola, and cervical cancer; Includes fundamentals and advances in machine learning in the medical field, supported by significant case studies and practical applications.

International Indian Ocean Expedition, USC&GS Ship Pioneer, 1964

This cartoon book covers the events, which became highlights in years 2020 and 2021, like Corona, floods, migration of workers, elections, farmers agitation, festivals, board results etc.. Cartoons are for everybody. Cartoons are the smartest way of communication without annoying anybody. Cartoons are joys of life. This book will also educate...

Machine Learning for Critical Internet of Medical Things

This book explores the metaphors used in public and media communication to ask how language shapes our moral reasoning about the global coronavirus crisis. The author offers insights into the metaphors, metonyms, allegories and symbols of the global crisis and examines how they have contributed to policy formation and communication. Combining metaphor theory with moral foundations theory, he places metaphors in their historical contexts, and then critically questions why certain tropes might be used in particular situations to persuade and convince an audience. The book takes an integrated approach, involving ideas from cognitive linguistics, history, social psychology and literature to produce a multi-layered and thematically rich interpretation of the language of the pandemic and its social and political consequences. It will be relevant to readers with a background in these areas, as well as anyone with a general interest in the language used to make sense of this global event.

Earth 2020

One of the biggest draws on the sports calendar, the NCAA men's basketball tournament routinely thrills fans with \"bracket buster\" upsets. From Loyola Marymount's emotional 1990 run following the death of team leader Hank Gathers to UMBC in 2018 becoming the first 16-seed to defeat a 1-seed, March Madness holds the sporting world captive for a few weeks each year and changes the lives of players. Drawing on dozens of original interviews, this book chronicles the tournament's many underdog tournament runs, with insights into the teams beyond their exploits on the hardwood.

2020 & 2021 - The Cartoon Book

This book constitutes the refereed proceedings of the 5th Multidisciplinary International Symposium on Disinformation in Open Online Media, MISDOOM 2023, which was held in Amsterdam, The Netherlands, during November 21–22, 2023. The 13 full papers presented in this book were carefully reviewed and selected from 19 submissions. The papers focus on misinformation, disinformation, hate speech,

disinformation campaigns, social network analysis, large language models, generative AI, and multi-modal embeddings.

Metaphors of Coronavirus

Cinderella at the Big Dance

Accurate estimation, diagnosis, and prevention of COVID-19 is a global challenge for healthcare organizations. Innovative measures can introduce and implement AI, and Mathematical Modeling applications. This book provides insight into the recent advances of applications, statistical methods, and mathematical modeling for the healthcare industry. This book covers the state-of-the-art applications of AI and Machine Learning in past epidemics, pandemics, and COVID-19. It offers recent global case studies, and discusses how AI and statistical methods, initiatives, and applications such as Machine Learning, Deep Learning, Correlation and Regression Analysis play a major role in the prediction, diagnosis, and prevention of a pandemic. It will also focus on how AI and statistical applications can facilitate and restructure the healthcare system. This book is written for Researchers, Students, Professionals, Executives, and the general public.

Disinformation in Open Online Media

Opening day in Milwaukee is an event like no other in baseball--all the pomp and reverence for the return of the season, with a tailgate party like only Brewers fans know how to throw. Each opener creates treasured memories, like Hank Aaron's return to Milwaukee, Sixto Lezcano's walk-off grand slam, the momentous opening of Miller Park, Lorenzo Cain's game-saving grab or the debuts of a couple of kids named Yount and Molitor. Chronicling a half-century of baseball lore, this book relives 53 home openers and the traditions, oddball characters, unlikely heroes and Hall of Fame legends they featured.

06 Company Book - PAPER AND STATIONERY

Orality formed us. Orality forms us. Orality will forever form us. Orality is a central theme of our lives. In this fast-paced world, few Christian workers take the time to look back to learn and build on the lessons of the past. Wise Christian workers, however, do not forge ahead into new horizons without first investigating past horizons. They understand in this complex world there are too many strong shoulders of the past to be overlooked. The dozen practiced researchers contributing to New and Old Horizons in the Orality Movement offer such inquirers wisdom from the past that can boldly and boundlessly improve the future of the modern-day orality movement.

Intelligent Computing Applications for COVID-19

These proceedings represent the work of contributors to the 22nd European Conference on e-Learning (ECEL 2023), hosted by University of South Africa, Pretoria, South Africa on 26-27 October 2023. The Conference Co-Chairs Associate Professor Sarah Jane Johnston and Associate Professor Shawren Singh both from University of South Africa, Pretoria, South Africa. ECEL is now a well-established event on the academic research calendar and now in its 22nd year the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research. It is especially relevant that the conference is being hosted by UNISA this year as the university celebrates its 150th anniversary. UNISA has been a pioneer in first distance and now e-Learning. The conference will also host the final round of the 9th e-Learning Excellence Awards where innovate case

histories will be presented. The opening keynote presentation is given by Professor Thenjiwe Meyiwa, Vice Principal for the Research, Postgraduate Studies, Innovation and Commercialisation at University of South Africa who will speak on, “The Role of African Feminisms in Shaping a Sustainable Future of Being and Learning”. An afternoon keynote on Thursday will be made by Dr Zolile Martin Mguda, University of South Africa on the topic of “ChatGPT: The first year”. The second day of the conference will open with an address by Dr Isabel Tarling, MD, Limina, South Africa with the title “Developing Digital Standards for Learning and Teaching in South Africa’s Schools”. With an initial submission of 100 abstracts, after the double blind, peer review process there are 45 Academic research papers, 3 PhD research papers and 1 Masters Research paper published in these Conference Proceedings. These papers represent research from Belgium, Canada, Chile, Czech Republic, France, Germany, Ghana, Greece, Hong Kong, Ireland, Japan, Malaysia, Mozambique, Norway, Oman, Perú, Poland, Portugal, Romania, Singapore, South Africa, Sri Lanka, Sweden, Switzerland, Turkey and the United Kingdom.

Opening Day in Milwaukee

Value-added tax (VAT) is a mainstay of revenue systems in more than 160 countries. Because consumption is a more stable revenue base than other tax bases, VAT is less distorting and hence more likely to encourage investment, savings, optimum labor supply decisions, and growth. VAT is not without criticism however, and faces its own specific technical and policy challenges. This book, the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies, offers authoritative perspectives on VAT’s full spectrum—from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality. The contributors—leading tax practitioners and academics—examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book, including: revenue generation and revenue efficiency; single rate versus multiple rates; susceptibility to fraud; exemptions and exceptions; compliance cost for businesses; policy and compliance gaps in revenue collection; adjustment rules caused by the transactional nature of the tax; transfer pricing issues; treatment of vouchers; permanent establishments and holding companies; payment of refunds; cross-border digital transactions; and supplies for free or below cost price. The second part offers six country reports—on New Zealand, Japan, China, Colombia, Ethiopia, and India—to demonstrate the different ways in which VAT operates in a variety of national economies. Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one, it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions. This invaluable book serves as an expert guide to VAT policy development in this area. It will be welcomed not only by concerned government officials but also by tax professionals (both lawyers and accountants) and academics in tax law.

New and Old Horizons in the Orality Movement

The new look on the history of art and its blind spots, the far-reaching digitization of structures and content, the changing role of museums and art criticism, new forces from influencers to NFTs: Hardly any market system has evolved as profoundly in the last decade as the distribution of art. With 25 years of experience in the art industry, Dirk Boll acts as a continuous chronicler and seasonal commentator of these pervasive developments. His handbook *Art and its Market* is a reliable source of in-depth knowledge about the inner workings of global art market systems. How do auctions, the network of galleries, and fairs work? How are prices being made, and how do trends both in the production of art as well as its collection emerge? What is more, this edition provides comprehensive information on the practical issues of art acquisition: What are the customs and pitfalls, the economic interdependencies between the artists, buyers and other market players, and the legal regulations governing the trade with art?

22nd European Conference on e-Learning

In the era of COVID-19, many people have suffered high levels of stress and mental health problems. To

cope with the widespread of suffering (physical, psychological, social, and economical) the positive psychology of personal happiness is no longer the sole approach to examine personal wellbeing. Other approaches such as Viktor Frankl's theory of self-transcendence provide a promising framework for research and intervention on how to achieve resilience, wellbeing, and happiness through overcoming suffering and self-transcendence. The existential positive psychology of suffering complements the positive psychology of happiness, which is championed by Martin Seligman, as two equal halves of the circle of wellbeing and optimal mental health. This Research Topic aims to examine the different approaches to Positive Psychology and their influence on individual wellbeing during the COVID-19 era. One of the exciting development in the positive psychology of wellbeing is the mounting research on the adaptive benefits of negative emotions, such as shame, guilt, and anger, as well as the dialectical process of balancing negative and positive emotions. As an example, based on all the empirical research and Frankl's self-transcendence model, Wong has developed the existential positive psychology of suffering (PP2.0) as the foundation for flourishing. Here are a few main tenets of PP2.0: (1) Life is suffering and a constant struggle throughout every stage of development, (2) The search for self-transcendence is a primary motive guided by the meaning mindset and mindful mindset. (3) Wellbeing cannot be sustainable without overcoming and transforming suffering. In this Research Topic we welcome diverse approaches discussing the following points: • The dialectic process of overcoming the challenges of every stage of development as necessary for personal growth and self-transcendence; • The role of self-transcendence in resilience, virtue, meaning, and happiness; • The upside of negative emotions; • The new science of resilience based on cultivating the resilient mindset and character; • How to make the best use of suffering to achieve our potentials & mental health.

Virtues and Fallacies of VAT: An Evaluation after 50 Years

This book explains why some international institutions succeed and others fail - and what we can do to improve them.

Art and its Market

Reconfiguring Global Societies in the Pre-Vaccination Phase of the COVID-19 Pandemic examines lived experiences of the COVID-19 pandemic in communities and societies around the world before the arrival of vaccines. This collection presents analyses of scholars from eight countries, all of whom were engaged in the unfolding crisis of social forces across the world. This timely volume conveys valuable insights about how public officials, the state, healthcare workers, and, ultimately, citizens responded to consequences of the pandemic upon not only the body but also social relations in community, city, and society. The contributing scholars document how state apparatuses, urban configurations, places of employment, legal structures, and ways of life responded to crisis-altered social conditions during the pandemic. The book investigates what societies experiencing crisis around the world reveal about the state's efficacy and inefficacy in fulfilling its social contract for its citizens, especially on unresolved issues related to social relations based on politics, race, ethnicity, gender, and crime. This collection brings together a cross section of scholars experiencing the same temporal moment of crisis together, watching and observing how the pandemic of their age uncoiled itself into the fabric of community, onto the institutions and bureaucracies of society, and into the most intimate confines of the home.

COVID-19 and Existential Positive Psychology (PP2.0): The New Science of Self-Transcendence

The field of sustainability continues to evolve as a discipline. The world is facing multiple sustainability challenges such as climate change, water depletion, ecosystem loss, and environmental racism. The Handbook of Sustainability will provide a comprehensive reference for the field that examines in depth the major themes within what are known as the three E's of sustainability: environment, equity, and economics. These three themes will serve as the main organizing body of the work. In addition, the work will include sections on history and sustainability, major figures in the development of sustainability as a discipline, and

important organizations that contributed or that continue to contribute to sustainability as a field. The work is explicitly global in scope as it considers the very different issues associated with sustainability in the global north and south

Making International Institutions Work

This Handbook provides a succinct overview of sport in the Middle East, drawing in scholars from a wide variety of geographical and disciplinary backgrounds (history, politics, sociology, economics and regional studies), with different methodological approaches, to create the 'go-to' text on the subject. After the introduction, 33 chapters from leading subject experts cover areas including history, politics, society, economy and nationhood. The authors help shed light on how certain Middle Eastern countries have become increasingly active in international sports, and the efforts made to positioning themselves as the new global 'sports hubs'. Split into five sections, the book offers a multi-disciplinary analysis of a diverse range of sports across the geographic Middle East, including football, mixed martial arts, rugby, athletics and cycling. The authors highlight and respond to issues such as the naturalisation of athletes, female athleticism, sports media and supporter cultures. The Routledge Handbook of Sport in the Middle East stands apart from previous research through offering first-hand accounts of sport in the area from authors who live and work in the region or have a history of regularly visiting and conducting research in the region. It will be of interest to academics and students alike, in the fields of Middle East politics, sport, sport in the Middle East, international relations, governance and sociology.

Reconfiguring Global Societies in the Pre-Vaccination Phase of the COVID-19 Pandemic

This book analyses the fifteen-year-long strategic partnership between NATO and the Gulf Cooperation Council (GCC). The book goes on to address several key questions raised in the year since the inception of the Istanbul Cooperation Initiative (ICI): Is the initiative a framework for consultation on Gulf and regional security issues? Is it a security initiative or a defensive one? Even more importantly, how was this initiative developed? Was there a mutual eagerness, on the part of NATO or that of the four Gulf States, to develop it? Is it possible for the initiative to be redeveloped and have other dimensions and outlooks in the future? Throughout the book, the author provides a comprehensive understanding and assessment of NATO's policies and their impact on the security of the Arab Gulf region.

The Palgrave Handbook of Global Sustainability

This book attempts to answer the question: "How can Europe 2020, the EU's new strategy for smart, sustainable and inclusive growth, lead to a stronger social EU with less poverty and greater social cohesion?" Examined in depth are achieving the EU's ambitious social objectives to lift at least 20 million people out of the risk of poverty and exclusion by 2020 and the Union's four other mutually reinforcing targets. A key objective of the book is to take a critical look at and draw lessons from the past, 2000-2010 Lisbon Strategy. Another important objective is to explore the format and role of EU coordination and cooperation in the social field in the new EU governance framework, in a context marked by slow recovery after the global economic crisis. Finally, the book also makes proposals for the further reinforcement of this coordination and cooperation and for the improvement of the different instruments available at EU, national and sub-national levels.

Routledge Handbook of Sport in the Middle East

Economic development has long been acknowledged for its beneficial effects on human well-being. In the context of economic globalization and vertical specialization, increasing the quality of export products is more critical and necessary to export success and sustainable development. The product's quality is

inextricably linked to its manufacture and production, which need various types of energy and raw materials. Meanwhile, the adoption of more environmentally friendly and cleaner energy sources contributes to the achievement of sustainable production. Therefore, product quality may provide a new perspective from which to investigate the systematic relationship between greener and renewable energy sources, sustainable production and environmental regulations, as well as the nature of export competitiveness. Generally, export product quality has referred to the quality of manufactured products within the product lines. Quality refers to the relative price of a country's varieties within their respective product lines. Product sophistication assesses the composition of the aggregate exports. Different varieties of same product as per quality level are being produced by several developing and emerging economies. Within any given product line, quality converges both conditionally and unconditionally to the world's benchmark; increases in institutional quality and human capital are associated with faster quality upgrading. In turn, faster growth in quality is associated with more rapid output growth.

NATO and the Gulf Countries

Global cities are facing an almost unprecedented challenge of change. As they re-emerge from the Covid 19 pandemic and get ready to face climate change and other, potentially existential threats, they need to look for new ways to support wealth and wellbeing creation – leveraging Big Data and AI and suing them into their physical reality and to become greener, more inclusive and resilient, hence sustainable. This book describes how new digital technologies could be used to design digital and physical twins of cities that are able to feed into each other to optimize their working and ability to create new wealth and wellbeing. The book also describes how to increase cities' social and economic resilience during crisis time and addressing their almost fatal weaknesses – as it became all too obvious during the recent COVID 19 crisis. Also, the book presents a framework for a critical discussion of the concept of “smart-city”, suggesting its development into a “cyber” and “meta” one – meaning, not only digital systems can allow physical ones (e.g. cities, citizens, households and companies) to become “smarter”, but also the vice versa is true, as off line data and real life behaviours can support the optimization and development of virtual brains as a sum of big data and artificial intelligence apps all sitting “over the cloud”. An analysis of the fundamental dynamics of this emerging “info-telligence” economy, and of the potential role of big digital players like Amazon, Google and Facebook is then paving the way to discuss a few strategic forays on how traditional sectors such as financial services, real estate, TMT or health could also evolve, leveraging Big Data and AI in a cyber-physical integrated setting. Finally, a number of thought provoking use cases that could be designed around individuals, and to improve the success and the resilience of households and companies living and working in urban areas are discussed, as an example of one of the most exciting future markets to come: the one of global, sustainable cities

Europe 2020
